

Grab your favorite markers, crayons, pencils or paints and let's color Amii

Get to know Amii

Amii is a sensitive, quiet, and gentle little ISObot and she has an interest in music. At first the music she creates is simply a math exercise, but after she comes to Earth she learns how to use her emotions to produce a different kind of music. She is inspired by what she sees around her and develops an interest in gardens. Over time Amii sees how gardens can make the world more beautiful. They also provide habitats for animals, and kitchen gardens give us the ability to grow food locally.
