Important: The walls, floor and ceilings must be finished; mouldings and heating system must be installed prior to taking measurements.

Window measuring guide

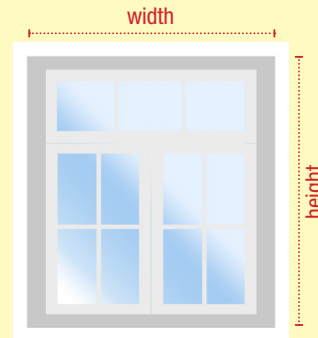

FOR AN INSIDE MOUNT INSTALLATION

Width:

Take the measurements of the width at the top (A), center (B) and bottom (C) of the window. Always measure to the nearest 1/8". Keep the smallest dimension.

Height:

Measure the height also at three different places. Left (D), center (E) and right (F) and apply the biggest dimension.

FOR AN OUTSIDE MOUNT INSTALLATION

Width:

Measure from the outer edge of the left moulding to the outer edge of the right moulding.

Height:

Measure from the outside edge of the top moulding and measure to the outside edge of the bottom moulding.
