

AAPE usage guideline (1/2)

General Guideline

1. Mix AAPE Powder(270mg) with AAPE Solvent (6ml)
2. Use Derma Roller(MTS)/ Derma Pen to apply the mixed ingredients

In case the cosmetic causes any trouble to sensitive patients, alternate guideline is suggested.

Alternate Guideline

1. Mix AAPE Powder(270mg) with Normal Saline (4ml)
2. Use Derma Roller(MTS)/ Derma Pen to apply the mixed ingredients
3. After the treatment, the patient can use the AAPE solvent (6ml) at home topically

Usage Instruction

- After mixing the solvent with the powder (by pouring solvent into the powder vial), leave it for 2 to 3 minutes for the complete absorption.
- Mixed ingredient should be used in 3 hours in case it is stored in refrigerator.

Validity

Can be used until the date shown on the product

AAPE usage guideline (2/2)

Storage instruction

- The product should be stored in refrigerator under 6°C.
- The product can be stored in room temperature (25°C~30°C) up to 15 days. Thus, it should be delivered by FedEx, DHL, etc. that takes only 3 to 5 delivery days.
- Right after receiving AAPE, check whether the powder is white. If it has turned into yellowish color, it is more likely that some of proteins have been degraded. We will replace with the new one without any further costs as soon as we receive the picture of defective goods.

Protocol

- Skin: 0.5mm Derma Roller / Derma Pen (every 2 weeks)
