

IMPULSE SEALER

Set the right temperature according to the thickness of the selected bags

2-4

for plastic bags or clear pouches

4-6

for thin foil bags or thinner Mylar bags

6-8

for Wallaby Goods Mylar bags

Step 1: Place sealer on a steady surface and plug cord into an outlet.

Step 2: Set your dial. The numbers on the dial correlate with the thickness of the material.

Step 3: Place the bag between the handle and the base. Make sure the heater strip is lined up to seal just above the small notches on either side of the bag's opening. This ensures that when you tear the bag at the notches, the bag may easily be opened.

If the bag has a zipper closure, line it up above that as well. If you seal lower than the notch or zipper, it's OK, just use scissors when you open the bag.

Step 4: Once the bag is in the correct position, press the handle down firmly. The light will stay on for a few seconds. Keep holding down until the light goes off.

Lift the handle and remove the bag. Make sure the seal goes all the way across the bag. For peace of mind, you may repeat this process again, sealing each bag twice to ensure an extra strong seal.

HEATER PAD & METAL STRIP REPLACEMENT

The heater is a durable threaded pad attached to the base of the sealer. After many uses, it's possible that the threading may fray and no longer function properly. To replace, make sure your unit is unplugged, unscrew the pad on either end of the base and replace with a new pad.

How to Replace Fuse

Step 1: Please turn off the power, screw out the fuse rotary knob

Step 2: Pull out the blown fuse

Step 3: Insert a new fuse, screw in the rotary knob

How to Replace Heating Element

Step 1: Use tools to loosen the screws and remove the cover and cloth

Step 2: Replace a new heat seal strip and heating element

Step 3: Reset cover, cloth and use tools to tighten the screws

The sealer comes with TWO replacement kits. If you misplace or wear them both out, you may need to purchase a replacement kit. To do so, call or email Customer Service at:

+1 213-523-3329 | hello@wallabygoods.com

(Each replacement kit contains 1 pad, 1 strip, and 1 fuse)
