## An elegant touch to your home with great functionality.

The Swan Lamp is ideal for all types of hobbies including needlework, sewing and quilting. The key feature of the Swan Lamp is bright light over a large area. The Daylight tube provides high contrast and accurate colour matching, making it easier and less tiring to read, work and see detail clearly. The tube is long lasting and low in energy consumption. A long flexible arm allows the light to be positioned exactly where it is needed.

Screen magnification software

Need help seeing your computer screen?

There are a variety of options to help you continue to use your computer if you have low vision or blindness or have difficulty reading. Most of these options can be tried before purchase, so you can work out what is best for you.

Training with this software is also available either through online resources or ask us about individual training.

ZoomText (for Windows)

ZoomText screen magnification software can help with magnification up to 36X, and provide a wide range of options such as large mouse pointers, cursor enhancements and alternative colour schemes. You can have everything on the screen enlarged (including websites and menus) as well as choosing to have information spoken to you.
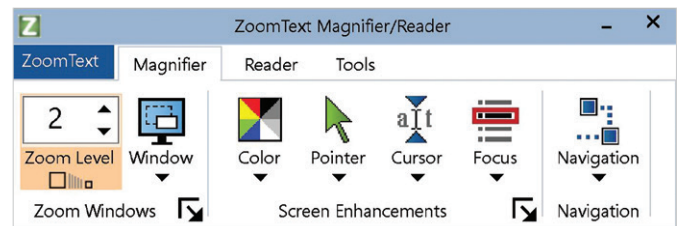

The Intuitive interface allows you to set your own preferences even change particular settings with different programs.

- Training resources available online
- Smooth magnification
- Use across multiple monitors for ultimate productivity
- Compatible with Windows 10.

Inverting the screen relaxes my eyes so I can work longer.

I can easily see and follow the text cursor and mouse pointer.

Large print and high contrast keyboards

Having trouble seeing your keyboard?

For those of us that aren't proficient touch typists, it can sometimes be hard to see the keyboard and ensure you are pressing the right keys. We have a wide range of large print and high contrast keyboards for both Windows and Apple computers.

Want to use your computer without seeing the screen?

JAWS Screen Reader (for Windows)

The JAWS software allows access via the keyboard for those with very low vision or blindness by reading aloud information on the screen.

It works out of the box with most common applications such as Microsoft Office, web browsers, Adobe Acrobat and many more.

Highly customisable with different voices and many different setting options.

- Use with a braille display to access information in refreshable braille
- Scan and read using the convenient OCR feature
- Home or Professional JAWS licences options
- Multi-user licences available with different deployment options
- Training resources are included.

ZoomText Fusion

Combines all the features of ZoomText and JAWS. ZoomText provides the magnification and JAWS the speech.

- Convenient OCR allows recognition and reading aloud of inaccessible PDF and image files with text
- Now compatible with the Pearl camera for a space saving scanning solution
- Ideal for those with progressive vision loss as allows gradual introduction of using a screen reader and keystrokes to access the computer
- It can be run as ZoomText, JAWS or both together as Fusion
- Also ideal for organisations who have users of both JAWS and Zoomtext - one license and installation for both applications.

ZoomText + JAWS = Fusion

Try before you buy!

Trial versions of these software products are available:

JAWS • ZoomText • ZoomText Fusion • OpenBook
TypeAbility • Read & Write • Browsealoud

OpenBook

A fully featured program allowing you to scan and read aloud documents and books on your Windows computer.

Also use to access PDF documents.

For those with some vision, the document can be viewed in real time or in different colours and fonts to suit.

- Quickly scan and read multiple pages
- Save to audio files to read on the go
- Also allows editing of the document, or export to Word
- Pronunciation dictionaries to edit the way a word is spoken if not correct by default
- The self-voicing interface and accessibility with keystrokes allows it to be used by both those with low vision and blindness
- Can also be used with traditional flatbed scanners
- Import other text for reading with the Freedom Import Printer
- Combine with a Pearl portable camera for a space saving, portable reading solution.

TypeAbility

Talking Keyboard Learning Software

TypeAbility is a typing and computer tutor program for the blind and visually impaired, supporting JAWS, Fusion and MAGic.

Touch typing is particularly important for those who need to access the computer using keystrokes, in combination with JAWS or Fusion. Typeability is an engaging talking typing tutor program. A JAWS or Fusion license is needed to provide the speech.

TypeAbility speaks clear and easy to understand instructions for everything the student needs to know. Since TypeAbility has a very large and delightful number of ways of saying things it has a personality, so the student feels that he is being addressed personally.

From the moment TypeAbility opens, TypeAbility stays with the student, never leaving the student to wonder what to do next.

- 99 lessons for complete guidance and practice lessons for learning keyboarding skills and developing typing speed in a systematic manner, using all ten fingers like a touch typist
- Very simple and the most fun to use
- Complete display of all lessons, enables even the low vision students to read and learn to type
- Special functions for teachers to create customised lessons and keep records and track the student's progress
- Comes with quiz games for general knowledge in geography, botany, physics and chemistry.

UTILISING YOUR COMPUTER

Literacy and Typing Software

Speech Recognition Software

Put your voice to work to create reports, emails, forms and more with **Dragon Naturally Speaking** software. You can now dictate And transcribe faster and more accurately than ever before and Spend less time on documentation and more times on activities That contributes to your home or business. Dragon improves over time as it adapts to your voice or Environment to improve accuracy and tailor your documents using voice commands.

- Speak as long as you want to complete documents of any length
- Easily create form based templates and reports
- Import and export from document sharing tools
- Group licensing available for organisations.

Literacy Software

Read&Write lets everyone read, write and express themselves more confidently. An easy-to-use toolbar makes documents, files and web pages more accessible. Read&Write is a big confidence booster for anyone who needs a little support with their reading and writing, at school or in the workplace.

And its friendly literacy features help English Language Learners, as well as people with learning difficulties or requiring dyslexia tools to access:

- Text to Speech
- Word prediction
- Screen masking
- Study tools to highlight and capture segments of text
- Create MP3 files for later playback.

Website Accessibility

The Internet is a cost effective way of reaching your audience, whether you're a commercial company, public sector body or non-profit organisation.

For people with reading difficulties like dyslexia, the elderly, those who lack digital skills or have English as a Second Language, however, your site may be deterring them from buying online or using services. With friendly speech, reading and translation tools.

With friendly speech, reading and translation tools **Browsealoud** makes websites more accessible to a wider audience.

Free trials are available, please contact us.

TACTILE SOLUTIONS

Mountbatten Whisperer

More than a braille writer, this electronic brailler, invented in Australia, does more than just let you produce hardcopy braille. This latest release is quieter than ever-hence the name Whisperer.

- The speech feedback and ergonomic keys help to engage young braille learners
- Mistakes are easily corrected through simple keystrokes
- The basic word editor allows to save and edit documents to PC or mobile device
- Teachers and parents can follow what a student is brailling by connecting by Bluetooth to the MB Mimic app on Android or iOS
- Connect to a computer with the included MB Comms software and send files back and forth.

Duxbury Braille Translator

Industry-standard, professional braille translation software, fully featured and used in all major braille production facilities.

- Translate printed documents to braille ready for embossing
- Files can be imported directly from Word
- Connects to most embossers for braille production
- Supports multiple languages
- Available for Windows or Mac
- Multi user options available.

Focus 14, 40 & 80 Blue Gen 5

This fifth generation of Braille displays is rugged and stronger than ever. The aluminium housing and steel added bumpers designed to absorbed shock and meet the demands of the active users.

- 14, 40 or 80 Braille cells
- 8-dot Braille keyboard
- Seamless Braille with a more crisp and uniform feel
- New Scratchpad feature allows quick note-taking even when not connected to a computer or smartphone
- Read books and WORD documents direct from the SD card.

Dimensions: 368 x 78 x 19 mm
Weight: Approximately 565 grams

ElBraille 40 5th Gen

ElBraille is a portable device designed for braille users, who want to stay connected at school, work, or home as well as on the go.

Combining a Focus 40 braille display and JAWS you have a complete Windows 10 portable computer with input via the Perkins style keyboard and navigation keys and output via speech and refreshable braille.

Dimensions: 370 x 132 x 39 mm
Weight: Approximately 1kg

Tatrapoint Brailler

This six-key Brailler is easy to use, has good quality print and delivers high reliability. This machine has a sturdy and modern design. It is quiet, safe ,easy to handle and allows operation by even small children's hands, as well as by adult spaced fingers.

Weight: 2.7kg

Index EVEREST-D V5 Embosser

World-leading A4 paper tractor-fed braille embosser.

- Speed 120 characters per second
- High resolution tactile graphics
- Automatic booklet format printing
- Horizontal and vertical printing options
- Easily create label sheets
- Managed by a simple app on your iPad or iPhone.

Also available: Index Basic-D V5 Embosser

PIAF

Tactile image maker.

A simple and fast way to prepare Tactile Graphics. Piaf is a machine that makes raised line drawings on special paper, called capsule or swell paper. Users can draw, print or photocopy pictures onto the swell paper and pass it through the Piaf. The heat of the Piaf causes the lines to swell and then the drawing can be read with the fingers. It is ideal for people who are blind and vision impaired. Piaf is being used in a variety of educational, employment and personal settings.

Canute 360

Multi-line braille display.

The world's first multi-line digital Braille e-reader. Canute 360 is a standalone 9 line Braille display. A unique option for poetry, maths, flow-charts, music, tables and graphs. Also, for book readers who don't have access to paper braille volumes, Canute 360 will make reading digital Braille books affordable, practical and enjoyable.

Tactplus

Braille tactile & 3D image printer.

A small, lightweight, quiet, and compact printer, as easy to connect to and print to as any Windows printer. Using special capsule paper, the Tactplus generates a tactile version of any document in WORD, PAINT, or any program, including any embedded graphics or diagrams and including any braille fonts. Teachers can re-use their existing diagramatic resources for their vision-impaired students, just by using WORD or PAINT tools, without needing specialised equipment.
