

Plant Cultural Guide

FLOWERS & FOLIAGE

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
ACHILLEA (YARROW)	18-22°C	12-24"	Full sun	Any well-draining soil	Yes
AGERATUM	15-18°C	9-12"	Full sun. Will tolerate shade when summers are hot	Fertile soil with good drainage. pH between 5.0-6.0	No
AGROSTEMMA	15-18°C	6-9"	Full sun	Rich, well-draining soil	No
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
ALYSSUM	10-13°C (to preserve colours)	6-8"	Sun/ partial shade	Average, well-draining soil	Tender perennial
AMARANTHUS	18°C	12-15" 3-6" for thinner, more upright plants	Full sun	Average, well-draining soil	No
AMMOBIUM	18-21°C	6-9"	Full sun	Light, well-draining soil. pH between 5.5-6.5	Tender perennial
ANCHUSA	16°C	16"	Full sun/ mostly sunny	Average, well-draining soil	Tender perennial
AQUILEGIA (COLUMBINE)	18-21°C	10-15"	Partial shade	Humus-rich, well-draining soil	Yes
ARMERIA (SEA THRIFT)	10-18°C	6-12"	Full sun	Poor but well-draining soil	Tender perennial
ARTEMISIA	18-21°C	12-24"	Full sun	Average soil	No
ASCLEPIAS	18°C	12-24"	Full sun	Well-draining sandy loam or poor soil	No
Notes: The milky sap of this plant may cause skin irritation to those with more sensitive skin.					
ASPARAGUS FERN	18-21°C	24"	Part sun	Well-draining, balanced soil (commercial potting mix)	No
ASTER	16°C	6-12"	Full sun	Fertile, well-draining soil. pH 5.5-7.5 preferred	No

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
AUBRIETA	10-18°C	6"	Full sun, will tolerate part shade	Well-draining, alkaline soil	Tender perennial
AVENS (GEUM)	10-24°C	12-18"	Full sun, afternoon shade	Poor-draining, acidic or alkaline soil	Tender perennial
BABY'S BREATH (GYPSOPHILA)	18°C	8"	Full sun	Poor soil	No
BACHELOR'S BUTTON (CENTAUREA)	10-13°C	2-9"	Full sun	Any soil with good drainage	No
BALSAM	16°C	12-18"	Sun/partial shade	Fertile, well-draining soil	No
BASIL, ORNAMENTAL	18°C	4-8"	Full sun	Moderately rich, moist soil.	No
BEE BALM (MONARDA)	16-22°C	12-18"	Sun/ partial shade	Any well-draining soil	Yes
BEGONIA, FIBROUS ROOTED	16°C	6-8"	Sun/ partial shade	Moist and fertile soil	No
BEGONIA, TUBEROUS ROOTED	13-16°C	8-12" 3-5" in pots	Partial shade/ dappled sunlight	Well-draining soil rich in compost or peat	Tender perennial
BELLIS (ENGLISH DAISY)	10-24°C	5-8"	Full sun	Rich, moist, well-draining soil	Tender perennial
BELLS OF IRELAND	13-16°C	10-12"	Sun/ partial shade	Well-draining soil	No
BLACK-EYED-SUSAN (RUDBECKIA)	16-22°C	12-18"	Full sun	Average, well-draining soil	Tender perennial
BLANKET FLOWER (GAILLARDIA)	21°C	12-18"	Full sun	Average, well-draining soil	Yes
BLAZING STAR (LIATRIS)	16-24°C	12-15"	Full sun, tolerate part shade	Dry, sandy soil	Yes
BUPLEURUM	13-16°C	10"	Sun/ partial shade	Average, well-draining soil	No
BURNING BUSH (KOCHIA)	18°C	20-24"	Full sun	Average soil, pH of 6.0-7.0	No

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
BUTTERFLY WEED	20-24°C	12-18"	Full sun	Poor, dry, sandy soil with acidic or neutral pH	Yes
BROWALLIA	18-21°C	10-14"	Sun/ partial shade	High in organic matter, well-draining, pH of 6.1-7.5 preferred	No
CALENDULA	18°C	6-12"	Sun/ partial shade	Rich, well-draining soil	No
CANDYTUFT (IBERIS)	10°C	6-8"	Full sun	Well-draining, alkaline soil	Yes
CANTERBURY BELLS	18-21°C	9-18"	Full sun/ partial shade	Rich, well-draining, evenly moist	No
CARNATION	13°C	8"	Full sun	Loose, well-draining soil	Yes
CELOSIA	21°C	6-12"	Full sun	Well-draining, moist, fertile soil high in organic matter	No
CENTAUREA (BACHELOR'S BUTTON)	10-13°C	2-9"	Full sun	Any soil with good drainage	No
CERASTIUM TOMENTOSUM (SNOW-IN-SUMMER)	10-20°C	24-36"	Full sun/ partial shade	Dry-average moisture soil, well-draining	Yes
CERINTHE (HONEYWORT)	18-29°C	12-18"	Full sun. Tolerates light shade	Moderate fertility, well-draining soil	No
CHICORY (flower not lettuce)	15-21°C	6-10"	Full sun	Any soil	Yes
CHRYSANTHEMUM	18-21°C (will tolerate frost)	18-24"	Full sun	Well-draining soil	No
CINERARIA	16°C	8-10"	Sun/ partial shade	Fertile, well-draining soil, slightly acidic	No
CLARKIA	18-21°C	6-12"	Sun/ partial shade	Average, well-draining soil	No
CLEOME	21-24°C	12-24"	Full sun	Light, well-draining soil	No

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
COFFEE PLANT	18-24°C	59"	Full shade/ dappled sunlight	Rich, peat- based soil with good drainage	No
COLEUS	16-18°C	12"	Partial shade/ dappled sunlight	Fertile, well- draining soil	No
COLUMBINE (AQUILEGIA)	18-21°C	10-15"	Partial shade	Humus-rich, well-draining soil	Yes
CONEFLOWER	15-21°C	18-24"	Full sun with afternoon shade	Average, well- draining soil	Yes
CORAL BELLS (HEUCHERA)	15-21°C	12-14"	Partial shade, tolerates any lighting	Well-drained, moist, rich soil, pH 6.0-7.0	Tender perennial
COREOPSIS	10-21°C	24-36"	Full sun	Well-draining, moderately moist soil	No
COSMOS	18°C	9-12"	Full sun	Any soil	No
CRASPEDIA	21-24°C	12"	Full sun	Average soil with good drainage	Tender perennial
CRESS, ORNAMENTAL	13-18°C	36-40"	Full sun	Average, well- draining soil	No
CYCLAMEN	16-18°C	4-6"	Bright, dappled light	Well-draining, slightly acidic soil high in organic matter	Tender perennial
CYNOGLOSSUM	18-21°C	9-12"	Sun/ partial shade	Moderate to well-draining soil	No
DAHLIA	18-21°C	9-12"	Full sun	Rich, well- drained soil, pH 6.5-7.0	No
DELPHINIUM	18-21°C	12-18"	Sun/ partial shade	Well-draining, fertile, slightly alkaline	Yes
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
DIANTHUS	18-22°C	6"	Full sun	Rich, sandy, well-draining soil, slightly alkaline	Tender perennial
DIDISCUS	21-22°C	6-12"	Sun/ partial shade	Well-draining, sandy soil	No

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
DIGITALIS (FOXGLOVE)	18-21°C	12"	Sun/ partial shade	Moist well-draining soil	Tender perennial
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
DORONCIUM (LEOPARD'S BANE)	12-24°C	10"	Full sun/ partial shade	Evenly moist, rich, loose soil	Yes
DRACAENA	18-21°C	9-12"	Full shade/ dappled light	Rich soil, high in organic matter, well-draining	No
DUSTY MILLER	16-18°C	9-12"	Full sun	Average, well-draining soil	Tender perennial
ECHINACEA	18-21°C	18-24"	Full sun. Will tolerate partial shade	Average, well-draining soil	Yes
ECHINOPS (GLOBE THISTLE)	10-24°C	18-24"	Full sun	Any well-draining soil	Yes
EDELWEISS (LEONTOPODIUM)	10-24°C	4-12"	Full sun	Well-draining, slightly alkaline to medium acidity	Tender perennial
ELECAMPANE	16-18°C	12-30"	Partial shade. Will tolerate full sun	Any soil as long as it is well-drained	Yes
ENGLISH DAISY (BELLIS)	10-24°C	5-8"	Full sun	Rich, moist, well-draining soil	Tender perennial
ERYNGIUM	13-16°C	18-24"	Full sun	Dry sandy soil. Will tolerate saline conditions. Sensitive to overwatering	Yes
EUCALYPTUS	18-24°C	12-24"	Full sun	Well-draining, fertile soil	Tender perennial
EUPHORBIA (SNOW ON THE MOUNTAIN)	16°C	6-9"	Full sun	Average, well-draining soil. Will tolerate poor conditions	No
Notes: The milky sap of this plant may cause skin irritation to those with more sensitive skin.					
EUSTOMA	18°C	4-8"	Full sun	Moist, well-draining soil, pH of 6.5-7.0	Tender perennial

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
FEVERFEW	15-19°C	24"	Full sun/ light shade	Well-drained sandy or loamy soil, pH of 6.0-6.7	Tender biennial
FLAX	15-18°C	6-8"	Full sun	Well-draining sandy loam	No
FOXGLOVE (DIGITALIS)	18-21°C	12"	Sun/ partial shade	Moist well-draining soil	Tender perennial
GAILLARDIA (BLANKET FLOWER)	21°C	12-18"	Full sun	Average, well-draining soil	Yes
GERANIUM	16-18°C	6-24"	Full sun *Ivy type best in light shade	Rich, moist, well-draining soil	No
GERBERA	16°C	18-24"	Sun/partial shade	Average to rich, well-draining, medium moisture	No
GEUM (AVENS)	10-24°C	12-18"	Full sun, afternoon shade	Poor-draining, acidic or alkaline soil	Tender perennial
GILLIA	12-18°C	6-36"	Full sun	Well-draining sandy soil	No
GLOBE THISTLE (ECHINOPS)	10-24°C	18-24"	Full sun	Any well-draining soil	Yes
GOMPHRENA	21°C	6-8"	Full sun	Any soil with good drainage	No
GYPSOPHILA (BABY'S BREATH)	18°C	8"	Full sun	Poor soil	No
HAREBELLS	10-24"	6"	Sun/ part sun/ part shade	Any soil, moderate to well-draining	Yes
HELIANTHUS (SUNFLOWER)	21-24°C	4-6"	Full sun	Light, well-draining soil	No
HELICHRYSUM (STRAWFLOWER)	18-20°C	12-18"	Full sun. Tolerates partial shade	Average soil. Top layer of compost preferred	Tender perennial
HELIOPSIS	16-20°C	18-24"	Full sun	Average, well-draining soil, dry to medium moisture	Yes
HELIOTROPE	16°C	12-18"	Sun/ partial shade	Average, well-draining soil	Tender perennial

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
HELIPTERUM	16°C	6-8"	Full sun	Well-draining sandy soil	No
HENS & CHICKS (SEMPERVIVUM)	13-21°C	6-12"	Full sun	Well-draining, gritty soil	Tender perennial
HEUCHERA (CORAL BELLS)	15-21°C	12-14"	Partial shade, tolerates any lighting	Well-drained, moist, rich soil, pH 6.0-7.0	Tender perennial
HIBISCUS	21-24°C	24-36"	Full sun	Well-draining, moist soil, high organic matter, pH of 5.8-6.5	Tender perennial
HOLLYHOCK	15-19°C	18"	Full sun	Rich, well-draining, moist soil	Yes
HONEYWORT (CERINTHE)	18-29°C	12-18"	Full sun. Tolerates light shade	Moderate fertility, well-draining soil	No
HYACINTH BEAN	18-21°C	12"	Full sun	Moderately fertile soil	Tender perennial
Notes: Mature seeds must be boiled before eating. They contain a trypsin inhibitor that is broken down by heat as well as a cyanogenic glucoside that is leached out by the cooking water.					
IBERIS (CANDYTUFT)	10°C	6-8"	Full sun	Well-draining, alkaline soil	Yes
ICE PLANT	10-21°C	15-18"	Full sun. Tolerates light shade	Poor, well-draining, dry soils	Tender perennial
IMPATIENS	16-18°C	12-18"	Partial/ full shade	Moist, well-draining soil	No
IPOMOPSIS RUBRA (TEXAS PLUME)	16-21°C	18-24"	Full sun/ partial shade	Dry, sandy, rocky soils	Biennial
JACOB'S LADDER	18-20°C	15"	Full shade/ partial shade	Well-draining, rich, fertile soil	Yes
KALE, ORNAMENTAL	15-19°C	6"	Full sun	Moist, well-draining soil	No
KOCHIA (BURNING BUSH)	18°C	20-24"	Full sun	Average soil, pH of 6.0-7.0	No
LAMB'S EAR (STACHYS)	10-21°C	18-24"	Full sun/ partial shade	Tolerates any soil. Prefers well-draining, drier soils	Yes

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
LARKSPUR	13-16°C	4-6"	Full sun	Rich, well-draining, slight alkaline soil	No
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
LAVATERA	20°C	18-24"	Full sun. Tolerates partial shade	Average, well-draining soil	No
LAVENDER	12-21°C	12-18"	Full sun	Light, well-draining, gravel soil, slightly acidic or slightly alkaline soil preferred	Yes
LEONTOPODIUM (EDELWEISS)	10-24°C	4-12"	Full sun	Well-draining, slightly alkaline to medium acidity	Tender perennial
LEOPARD'S BANE (DORONCIUM)	12-24°C	10"	Full sun/ partial shade	Evenly moist, rich, loose soil	Yes
LIATRIS (BLAZING STAR)	16-24°C	12-15"	Full sun, tolerate part shade	Dry, sandy soil	Yes
LINARIA (TOADFLAX)	15-18°C	6-40"	Full sun	Well-draining sandy soil, dry to medium moisture	Tender perennial
LION'S EAR (WILD DAGGA)	10-20°C	72"	Full sun	Well-draining, loamy sand soil	Tender perennial
LISIANTHUS	21-24°C	4-8"	Full sun	Well-draining soil high in organic matter	No
LOBELIA	18-25°C	4-6"	Sun/ partial shade	Moist, rich, well-draining soils	No
LOVE IN A MIST	18-21°C	6"	Full sun	Well-draining, fertile soil	No
LUNARIA	12-24°C	12-18"	Partial shade/ full sun	Any soil	Biennial
LUPINE	18-24°C	18-24"	Sun/ partial shade	Average, well-draining soil	Yes
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
MARIGOLD	16-24°C	8-18"	Full sun	Average soil	No

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
MARSHMALLOW	10-24°C	12-14"	Full sun	Moist, sandy soils	Yes
MATRICARIA	21°C	18-24"	Full sun	Light, well-draining, moist, fertile soil	Tender perennial
MILKWEED	18-24°C	6-24"	Full sun	Light, well-draining soil	Yes
MIMOSA PUDICA (SENSITIVE PLANT)	18-21°C	15"	Partial shade/ full sun	Any well-draining soil	No
MIMULUS (MONKEY FLOWER)	13-16°C	36"	Full sun	Moist, well-draining soil	No
MONARDA (BEE BALM)	16-22°C	12-18"	Full sun/ partial shade	Any well-draining soil	Yes
MOONFLOWER	15-21°C	6-12"	Full sun	Any loose, well-draining soil	No
MORNING GLORY	21-24°C	2-6"	Full sun. Tolerates light shade	Moist, well-draining soil	No
MYOSOTIS	10-21°C	12"	Full sun/ partial shade	Well-draining, light, moist, acidic or alkaline soil	Yes
NASTURTIUM	18°C	8-12"	Full sun/ partial shade	Well-drained, average soil	No
NEMESIA	13-16°C	4-6"	Full sun with afternoon shade	Moist, well-draining, slightly acidic soil	Yes
NICOTIANA	13°C	12-18"	Full sun/ partial shade	Fertile, well-draining soil	No
NIGELLA	13-18°C	2-9"	Full sun	Average soil with good drainage	No
OBEDIENT PLANT (PHYSOSTEGIA VIRGINIANA)	13-24°C	18-24"	Full sun, tolerates part shade	Prefer moist, slight acidic soil. Will tolerate <i>any</i> soil	Yes
ORLAYA	13-25°C	9-12"	Full sun	Average, well-draining soil. Will tolerate dry soil	No

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
PANSY	13°C	6-10"	Sun/ partial shade	Rich, well-draining soil high in organic matter	No
PEARLY EVERLASTING	13-21°C	18-24"	Full sun/ partial shade	Well-draining soil on the drier side	Yes
PEPPER, ORNAMENTAL	13-16°C	12-24"	Full sun	Well-draining sandy loam, loam, or clay loam	No
PETUNIA	13-16°C	4-12"	Full sun	Light, fertile soil with organic matter	No
PHLOX	10-16°C	8-12"	Full sun	Rich, moist, well-draining sandy soil	No
PHYSOSTEGIA VIRGINIANA (OBEDIENT PLANT)	13-24°C	18-24"	Full sun, tolerates part shade	Prefer moist, slight acidic soil. Will tolerate <i>any</i> soil	Yes
POLKA DOT PLANT	18-21°C	9-12"	Full sun	Consistently moist, well-draining, rich soil	No
POPPY	18-24°C	6-8"	Sun/ partial shade	Moist, well-draining soil	Tender perennial
PORTULACA	13-18°C	10-12"	Full sun	Sandy, well-draining soil. Drought tolerant	No
PRIMULA (PRIMROSE)	15-21°C	6-12"	Shade/ dappled sunlight	Humus-rich, moist, well-draining soil	No
RANUNCULUS	10-15°C	4"	Full sun or bright light	Light, well-draining soil	No
RED HOT POKERS (TORCH LILY)	21°C	18-24"	Full sun	Any average, well-draining soil	Tender perennial
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
ROCKY MOUNTAIN PENSTEMON	16°C	30-36"	Full sun	Dry, average soil with acidic pH	Tender perennial
RUDBECKIA (BLACK-EYED-SUSAN)	16-22°C	12-18"	Full sun	Average, well-draining soil	Tender perennial

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
SALPIGLOSSIS	20-24°C	18"	Full sun. Tolerates light shade	Fertile, well-draining soil	No
SALVIA	21-24°C	12"	Sun/ partial shade	Average soil	No
SANVITALIA (CREEPING ZINNIA)	10-15°C	20"	Full sun	Average, well-draining soil	No
SAPONARIA	21°C	2-9"	Full sun	Average, well-draining soil	No
SAXIFRAGA	18-21°C	10-12"	Full sun/ partial shade	Moderately fertile, well-draining, alkaline soil	Yes
SCABIOSA	16-18°C	9-15"	Full sun	Rich, well-draining soil	No
SCHIZANTHUS	17-19°	12"	Sun/ partial shade	Fertile, evenly moist, well-draining soil	No
SEA THRIFT (ARMERIA)	10-18°C	6-12"	Full sun	Poor but well-draining soil	Tender perennial
SEDUM	10-15°C	6-12"	Full sun/ partial shade	Well-draining soil, neutral-slightly alkaline pH	Yes
SEMPERVIVUM (HENS & CHICKS)	13-21°C	6-12"	Full sun	Well-draining, gritty soil	Tender perennial
SENSITIVE PLANT (MIMOSA PUDICA)	18-21°C	15"	Partial shade/ full sun	Any well-draining soil	No
SHASTA DAISY	10-24°C	24-30"	Full sun, tolerates light shade	Rich, well-draining soil high in organic matter	Yes
SNAPDRAGON	16-18°C	4-12"	Sun/ partial shade	Rich, well-draining, moist soil. Neutral pH preferred	No
SPIDERWORT	15-18°C	14"	Full sun/ full shade	Moist, well-draining, humus rich soil	Tender perennial

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
SPILANTHES (TOOTHACHE PLANT)	18-21°C	8-12"	Full sun	Well-draining soil	No
SNOW-IN-SUMMER (CERASTIUM TOMENTOSUM)	10-20°C	24-36"	Full sun/ partial shade	Dry-average moisture soil, well-draining	Yes
SNOW ON THE MOUNTAIN (EUPHORBIA)	16°C	6-9"	Full sun	Average, well-draining soil. Will tolerate poor conditions	No
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
STACHYS (LAMB'S EAR)	10-21°C	18-24"	Full sun/ partial shade	Tolerates any soil. Prefers well-draining, drier soils	Yes
STATICE	18°C	12"	Full sun	Rich, well-draining soil	No
STOCKS	16-18°C	6"	Full sun	Well-draining, moderately rich soil	No
STRAWFLOWER (HELICHRYSUM)	18-20°C	12-18"	Full sun. Tolerates partial shade	Average soil. Top layer of compost preferred	Tender perennial
SUNFLOWER (HELIANTHUS)	21-24°C	4-6"	Full sun	Light, well-draining soil	No
SWEET ALYSSUM	12-21°C	Groups 6" apart	Full sun, tolerates partial shade	Moist, loamy soil, pH of 6.0-7.0	No
SWEET PEAS	16-18°C	6"	Full sun	Rich, deep, loamy, moist, well-draining soil	No
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
SWEET WILLIAM	10-24°C	8"	Full sun	Well-draining, slightly alkaline soil	Yes
TALINUM	16-21°C	12-18"	Full sun	Average, well-draining soil	No
TEXAS PLUME (IPOMOPSIS RUBRA)	16-21°C	18-24"	Full sun/ partial shade	Dry, sandy, rocky soils	Biennial

Plant	Ideal Temp	Plant Spacing	Sunlight requirements	Soil Type	Frost Hardy
TITHONIA	18-25°C	12-24"	Full sun	Loam or sandy soil, fertile, good drainage	No
TOADFLAX (LINARIA)	15-18°C	6-40"	Full sun	Well-draining sandy soil, dry to medium moisture	Tender perennial
TORCH LILY (RED HOT POKERS)	21°C	18-24"	Full sun	Any average, well-draining soil	Tender perennial
Notes: All parts of this plant are poisonous to humans and animals, including the seeds. Exercise caution when handling.					
TORENIA	8-35°C	8-9"	Full sun to shade	Moist soil high in organic matter	No
VERBENA	16-30°C	18-24"	Full sun	Any well-draining soil	Tender perennial
VERONICA	13-24°C	10"	Full sun, tolerates part shade	Tolerates any type, prefers well-draining soil	Yes
VIOLA	15-21°C	6-9"	Sun/ part shade	Rich, well-draining soil	No
VINCA	20-27°C	8-18"	Partial sun/ full shade	Average, sandy, well-draining soil	No
WALLFLOWER	15-21°C	10-12"	Full sun, tolerate light shade	Fertile soil, rich in organic matter, well-draining but moisture retaining	Yes
YARROW (ACHILLEA)	18-22°C	12-24"	Full sun	Loamy, well-draining soil, pH of 5.5-7.0	Yes
ZINNIA	19-26°C	9-12"	Full sun	Fertile, rich soil high in organic matter	No
