****Notice: **** Kindly be informed that the sample process requires 15 working days to reach completion. If the samples do not meet the required standards or are deemed unsatisfactory, we will undertake an additional reworking or reallocation attempt.

Samples that meet the stipulated criteria should be duly endorsed on the indicated dates alongside the corresponding SR number. A complete leather side should be utilised as an Interim Master for production. A credit arrangement will be instituted for the side submitted and acknowledged as an Interim Master.

The Master, in this context, serves as a mutual agreement delineating the specifications Mossop Leather is obligated to produce on a larger scale. This is to be carried out within an agreed-upon tolerance range concerning colour and grade.
