Airport Utility Mac Mojave Download

Freeware

If you do have a 2nd Gen AirPort Express, the setup instructions are covered in the Setup Guide that came with the AirPort Express: If you're using Mac OS X, you can use the Wi-Fi status menu in the menu bar to choose your AirPort Express. When you choose it, AirPort Utility opens to set up your AirPort Express. Download Apple AirPort Utility for Mac to setup and manage airport base stations. Once you've made a backup of your Mac and are ready, follow the steps below to download and install macOS 10.14 Mojave. Verify Compatibility for Mojave. In order to upgrade your Mac operating system (macOS), you must have a compatible Mac computer. The following Macs are compatible and can upgrade to macOS Mojave. Please read me: Ever since macOS Mojave came out (I mean the first DP) Apple removed the support for Atheros based WiFi Adapters from the IO80211Family.kext, so to fix it we need to add the AirPortAtheros40.kext to the Extensions manually.

macOS

2.3 GB

50,260

Take more kinds of screenshots with less effort. Try three handy new built-in apps, and discover great new ones in the redesigned Mac App Store. Now you can get more out of every click.

Download Note: If you already have Mojave installed in your mac and what to update to the latest version download 'Update for Mojave 10.14 or later'. If you can any previous version of macOS installed on your mac (Sierra, High Sierra or any other) click on 'Update for any previous macOS' to download the appropriate file for you.

Put your best work forward.

Dark Mode is a dramatic new look that helps you focus on your work. The subtle colors and fine points of your content take center screen as toolbars and menus recede into the background. Switch it on in the General pane in System Preferences to create a beautiful, distraction-free working environment that's easy on the eyes — in every way. Dark Mode works with built-in apps that come with your Mac, and third-party apps can adopt it, too.

A desktop whose time has come.

Introducing two new time-shifting desktops that match the hour of the day wherever you are.

A really neat way to manage files.

Stacks keeps your desktop free of clutter by automatically organizing your files into related groups. Arrange by kind to see images, documents, spreadsheets, PDFs, and more sort themselves. You can also group your work by date. And if you tag files with project-specific metadata, like client names, sorting by stacks becomes a powerful way to manage multiple jobs. To scrub through a stack, use two fingers on a trackpad or one finger on a Multi-Touch mouse. To access a file, click to expand the stack, then open what you need.

New ways to view. More ways to do.

With macOS Mojave, the Finder becomes even more of a doer. Now you can quickly locate a file by how it looks. Instantly see all of a file's metadata. And perform Quick Actions on files without ever opening an app.

Work on a file without even opening it.

Now a tap of your space bar provides more than just a quick look at a file. It gives you the power to perform actions specific to the kind of file you're viewing — without ever launching an app. So you can mark up a PDF, rotate and crop an image, even trim audio and video. And when you're ready, you can share right from Quick Look, too.

Screenshots are now a snap.

With macOS Mojave, all the controls you need to grab any type of screenshot are one simple shortcut away. Just launch the new Screenshot utility or press Shift-Command-5. An easy-to-use menu includes new screen-recording tools and options for setting a start timer, showing the cursor, and even choosing where you'd like to save your screenshots. Take a screenshot and a thumbnail of it animates to the corner of the screen. Leave it there to automatically save it to the destination you've chosen. You can drag it directly into a document or click it to mark it up and share it right away — without having to save a copy. It's more than easy; it's clutter-free.

Add everyone to the conversation.

With macOS Mojave, you can jump on a FaceTime call with up to 32 people. Invite anyone to join a call anytime it's in progress. And the same call can include both audio and video callers. So you and your friends or colleagues are able to connect using whatever device is closest at hand — Mac, iPhone, iPad, even Apple Watch.

Ready for their big-screen debut.

Three apps people love on iOS are ready to shine with new Mac versions. You can follow your stocks, record a lecture, or turn down the AC, all without leaving your desktop.

Committed to keeping your information yours.

We're always working to protect your privacy and security. macOS Mojave goes further than ever with robust enhancements designed to keep control of your data and keep trackers off your trail.

What's New:

Gallery View: With Gallery View, you can scroll through big previews of your files to visually identify the one you're looking for. So finding that image of the smiling girl by the Ferris wheel or the PDF with a colorful pie chart has never been faster.

Quick Actions: With Quick Actions in the Preview pane, you can work on files right from the Finder. Rotate images, create PDFs, trim video, and more — without having to open an app or rename and save your file. You can even apply them to multiple files at once, or create a custom Quick Action based on an Automator workflow.

Complete Metadata: Metadata provides the key details of any file. Now the Preview pane can display all of a file's metadata, or you can customize it to show just the metadata you want to see. So if you're looking for a specific image, you can quickly confirm the camera model, aperture, exposure, and more.

- Adds support for Group FaceTime video and audio calls, which support up to 32 participants simultaneously, are encrypted end-to-end for privacy, and can be initiated from a group Messages conversation, or joined at any time during an active call.
- Adds over 70 new emoji characters, including new characters with red hair, gray hair and curly hair, new emoji for bald people, more emotive smiley faces and additional emoji representing animals, sports and food.

MacOS Mojave delivers new features inspired by its most powerful users, but designed for everyone. Stay focused on your work using Dark Mode. Organize your desktop using Stacks. Experience four new built-in apps. And discover new apps in the reimagined Mac App Store.

Dark Mode

- Experience a dramatic new look for your Mac that puts your content front and center while controls recede into the background.
- Enjoy new app designs that are easier on your eyes in dark environments.

Desktop

- View an ever-changing desktop picture with Dynamic Desktop.
- Automatically organize your desktop files by kind, date, or tag using Stacks.
- Capture stills and video of your screen using the new Screenshot utility.

Finder

- Find your files visually using large previews in Gallery View.
- See full metadata for all file types in the Preview pane.
- Rotate an image, create a PDF, and more — right in the Finder using Quick Actions.
- Mark up and sign PDFs, crop images, and trim audio and video files using Quick Look.

Continuity Camera

- Photograph an object or scan a document nearby using your iPhone, and it automatically appears on your Mac.

Mac App Store

- Browse handpicked apps in the new Discover, Create, Work, and Play tabs.

- Discover the perfect app and make the most of those you have with stories, curated collections, and videos.

iTunes

- Search with lyrics to find a song using a few of the words you remember.
- Start a personalized station of any artist's music from the enhanced artist pages.
- Enjoy the new Friends Mix, a playlist of songs your friends are listening to.

Safari

- Block Share and Like buttons, comment widgets, and embedded content from tracking you without your permission with enhanced Intelligent Tracking Prevention.
- Prevent websites from tracking your Mac using a simplified system profile that makes you more anonymous online.

Apple News

- Read Top Stories selected by Apple News editors, trending stories popular with readers, and a customized feed created just for you.
- Keep your favorite topics, channels, and saved stories up to date on your Mac and iOS devices.

Stocks

- Create a customized watchlist and view interactive charts that sync across your Mac and iOS devices.
- Browse business news driving the markets curated by Apple News editors.

Voice Memos

- Make audio recordings, listen to them as you work with other apps, or use them in a podcast, song, or video.
- Access audio clips from your iPhone on your Mac using iCloud.

Home

- Organize and control all of your HomeKit accessories from your desktop.
- Receive real-time notifications from your home devices while you work.

Apple releases MacOS Mojave for everyone. How to download and install MacOS Mojave. All the news from macOS Mojave

Here we are! **Apple** has just released the **new MacOS Mojave operating system** for all Macs. In fact, for a few hours the new **MacOS Mojave is available for download**, all focused on quality, reliability and performance.

And in this article we will see together:

- the news of macOS Mojave
- how to download macOS mojave
- how to install macOS Mojave

Do not waste your time and let's get straight to the heart to **discover all the secrets and news of macOS Mojave.**

Download macOS Mojave available

As anticipated, **MacOS Mojave is available for download**: now all Mac users can give a new wave to their computer with **the latest Apple operating system,** focused on **improving quality, reliability and performance.**

And although the main focus is on system **stability** and **performance,** there is no shortage of **interesting news.**
macOS Mojave brings many new features to the Mac, including dark mode, which turns your computer into dark-colored schemes, and a new dynamic desktop with new backgrounds that change throughout the day depending on the time.

There are also **new productivity features like Pile** that keeps the desk tidy by automatically reuniting files of the same type.

The Mac experience has also been improved thanks to the **arrival of some already known iOS apps** , **such as News, Voice Notes and home.** And the **Mac App Store has a whole new look** and even better editorial content that makes it easier to find the right app.

Dark mode: a whole new view for the Mac

Dark mode turns the computer into a dark color scheme that emphasizes the contents and strains the eyes, especially when there is little light, such as in a dark room or in an airplane. Dark mode is integrated into the apps included on the Mac like Mail, Messages, Maps, Calendar and Photos. Users can choose this mode in System Preferences, and third-party developers can integrate it into their apps.
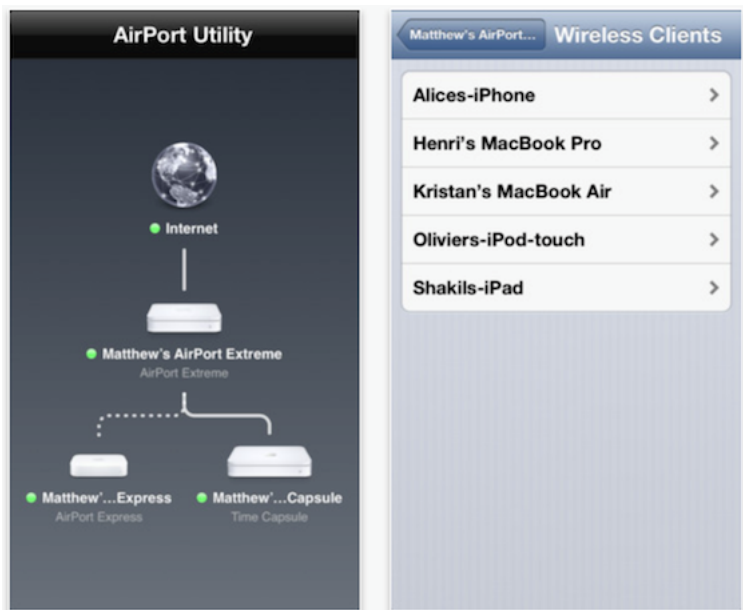

Pile: for a desk always in order

Pile keeps the desk tidy by automatically gathering files of the same type, such as images, presentations, PDFs and documents. Users can also customize Pile and sort files based on other features such as date or tags. To access a file just click to expand a stack and then open it.

Dynamic desk: the dawn of a new desktop

For the first time, MacOS Mojave offers a series of wallpapers that change throughout the day based on the time and location of the user. The background image, with the sand dunes of the Mojave desert, has different lighting depending on the time of day, from dawn to morning, at noon, at dusk and in the evening to give Mac users a desktop always new.

Finder: to do even more

The Finder in MacOS Mojave has a whole new Gallery view that allows users to browse through files, while the Preview panel displays all file metadata, making it easy to manage multimedia content. With the Quick Actions in the Finder Preview panel, users can create PDF documents and protect them with passwords, as well as perform custom Automatic actions. Quick View now allows you to rotate and cut images, annotate PDFs and cut audio and video files; To view a file in Quick View just select it and press the space bar.

Snapshots: the screen is photographed in a flash

Snapshots offers intuitive on-screen controls for quick access to shooting options and new video recording features: just open the Snapshot utility or press Shift-Command-5 to view a series of commands to take pictures and record video of the screen. Mac, including options to set a timer or to choose where to save snapshots.

Continuity for photos: Mac and iPhone united as never before

With Continuity for photos, users can take a picture or scan a nearby object or document with their iPhone and have the photo or scan immediately on the Mac. They will only have to choose "Import from" in Pages, Keynote, Numbers, Notes, Mail and other apps compatible with scanning or shooting with an iOS device nearby.

New apps: News, Stock Exchange, Voice Memos and Home

Some iOS app notes, including News, Voice Memos and Home make their debut on the Mac, so users can do even more things directly from the computer. The News app offers a single place to find reliable information and news edited by the editorial staff and customized for each user. The Borsa app is the best way to track market trends: it offers accurate market news and values in a customizable price list complete with interactive actions and graphs.

With the Home app, users can control compatible accessories with HomeKit, for example they can turn on the lights, adjust the thermostat or take a look at the baby monitor. With Voice Memo it's easier than ever to record personal reminders, lessons, meetings, interviews or ideas to turn into music with the microphone of the Mac, and then listen to them again via iCloud on iPhone, iPad or Mac.

New Mac App Store: new ways to discover great apps for Mac

The Mac App Store has been completely redesigned and now has even better editorial content that makes it easier to search for Mac apps. The new Discover panel highlights new Mac apps, while theme panels for creativity, work, games and programming help users find apps for a project or a specific reason. Stories, collections and videos help you find the perfect app with detailed information and advice on the apps and authors who use them. The Mac App Store also offers many new apps that include productivity tools like Omni Focus 3, and video games like Alto's Adventure and The Gardens Between.

Safari: to whiz on the web with even more security

In Safari, the intelligent antitracking system prevents embedded content, such as "Like" or "Share" buttons and widgets for commenting on social networks, to keep track of users' activities without their permission. In addition, Safari presents simplified system information when users browse web pages, to prevent companies that collect data from creating a unique "fingerprint" that can be used for tracking. To help users better manage passwords, Safari automatically creates, stores, and inserts complex passwords when new online accounts are created, and reports the passwords that are already in use for users to modify them.

Additional features

- Safari now supports site icons in browser panels, so users can identify all open sites at a glance. Site icons can be activated in System Preferences.
- Mail now displays an Emoji menu inside the compose window, so it will be quicker and easier to add emojis to emails.
- Siri on Mac now allows users to control all HomeKit-compatible home accessories and knows even more about food, celebrities and car and motorbike races.
- macOS Mojave introduces the English system languages (United Kingdom), English (Australia), French (Canada) and Chinese (traditional for Hong Kong), improved maps for China and Romanized keyboard input for Japanese.
- Take a screenshot or record a screen video with the new Snapshot utility.

macOS Mojave is already available and can be downloaded as a free update by users of all supported Macs.

What Macs are compatible with MacOS Mojave?

Can I install MacOS Mojave on my Mac? Here is the list of all Macs that support MacOS Mojave and therefore can be updated to this new operating system:

- iMac Pro 2017
- iMac end 2012 or later
- Mac mini end 2012 or later
- MacBook beginning 2015
- MacBook Air mid 2012 or later
- MacBook Pro mid 2012 or later
- Mac Pro end 2013
- Mac Pro mid 2010-2012 but with GPU able to support the Metal framework. To check go *to System Preferences → System Report → Hardware* (left column) → *Graphics / Monitor* → check the item

If you have a Mac that appears in this list you can download and install MacOS Mojave, otherwise I'm sorry but your computer is too old and you have to change it.

How heavy is MacOS Mojave?

The download of the MacOS Mojave update **weighs 6GB.**

Make sure you have internet very fast and have enough space on your Mac's hard drive to be able to **download and install MacOS Mojave.**

How to install macOS Mojave

Before installing the new version of macOS Mojave I suggest you **back up all your data on Mac**; it is not an indispensable but **highly recommended operation**, just in case something goes wrong during installation. In reality you should not lose any data, but you never know.

Once this is done, let's start!

First of all you need to click on this link.

This will open the **Mac App Store page** containing **the update to macOS Mojave.**

From this page you will have to **click on the "See in the Mac App Store" button.**

After opening the **Mac App Store page containing MacOS Mojave** you will have to click on the **download** button, as if it were a normal application.

At the end of the download you will have to click on the **"Continue"** button to start the **installation process.**

Mojave Airport Map

You will need to **enter the password of your Mac.**

After a few clicks, **the installation of the update will start** and, for the duration of the operation, it **will be possible to continue using the Mac.**

After this phase, **the Mac will automatically reboot** and will remain **unusable until the final reboot.**

Mac Mojave Download Link

After the first start, you may **feel a general slowness in the use of the Mac: it is normal,** the system takes several hours to optimize and return to the classic speed of all time.

Mac Os Mojave Direct Download

That's it, now you're ready to enjoy **MacOS Mojave.**
