2023 Soccer Catalogue

Quality custom
apparel and
merchandise for
any sporting code.

Play out of your skin.

Established in 2020, Apelle is an Australian-owned and operated sporting apparel and merchandise supplier, boasting a team with over 40 years of industry experience.

Our vision is to provide quality custom apparel for the Australian market, with a focus on teamwear that is comfortable, fashionable and functional both on and off the soccer pitch.

Committed to Quality.

PRODUCT LIFE

Apelle is committed to providing high quality products, using materials which are designed to last, in terms of both form and style. We work with expert manufacturers who use state-of-the-art technology, premium fabrics and embellishments to deliver products that are durable and meet high standards of quality control.

DESIGN

At Apelle, we strive to elevate the standard of teamwear through our quality designs and production. Our experienced design team collaborate with clubs to create customised merchandise and uniforms that are tailored to the unique needs of each sporting team. Our goal is to make players proud to wear their team's colours.

FABRICS

Apelle are committed to using premium fabrics that are comfortable, durable, and long-lasting. Utilising the latest technology, our fabrics offer superior heat transfer and moisture wicking capabilities. Additionally, our antibacterial-treated fabrics provide protection against bacteria and controls odours, making them perfect for both on and off the soccer pitch.

SUSTAINABILITY

We are constantly exploring alternatives to synthetic materials such as polyester, nylon, and acrylic, with an aim to be eco-friendly and sustainable wherever possible. For a more sustainable option, we offer rPET fabrics which are made from recycled plastic bottles. The production of rPET fabrics requires far less resources than that of new fibers and generates fewer CO2 emissions.

QUALITY CONTROL

Apelle have high production standards and rigorous in-house quality control, ensuring consistent quality in every order. We offer pre-production sampling which allows us to guarantee that the fabric, design, colour, style, and fit of our products meet customer expectations, so customers can order with confidence.

Customise your apparel & merchandise.

There's nothing more exciting than turning an idea into reality! Apelle's experienced in-house team can guide you through a range of options to customise your teamwear.

BESPOKE ARTWORK

Our experienced in-house design team will collaborate with you to develop artwork that is tailored to best represent your club. We utilise your club's colors and logo to create custom designs that your players will wear with pride!

PATTERN DEVELOPMENT

Alongside our wide range of products, we develop custom patterns to tailor apparel and merchandise to your exact needs. Our custom patterns prioritise form, fit, comfort and performance, making sure that your teamwear is superior in every way.

DETAILING & EMBELLISHMENTS

We use the latest in technology to detail and embellish your garments with sublimation, embroidery, direct film, direct to garment, heat pressing, blind embossing and screen printing.

Every order,
on time,
every time!

Our experienced team
provide realistic lead
times and production
scheduling upfront,
to ensure every order
is delivered on time,
every time.

End-to-end management.

Apelle offer an end-to-end e-commerce solution which helps manage inventory, process orders and facilitate delivery through our online stores. Our goal is to streamline the entire process to take away the stress and hassle from clubs, so they can concentrate on what they do best.

Sponsorship.

Apelle are passionate about aiding and supporting the sporting community through our grassroot sponsorships.

If you or your team would like to discuss potential sponsorship, get in touch with Caroline on 0405 081 183 or caroline@apelle.com.au

Sublimation.

Sublimation is a printing process that allows for vibrant, full colour, all-over prints that are exceptionally durable. The printing technology uses heat to fuse ink directly into the fabric fibres, allowing the artwork to become part of the fabric itself.

SMOOTH FINISH

Sublimated printing uses heat to chemically bond the ink with the fibres of fabric, rather than lying on top, resulting in a smooth and seamless finish. This allows for sublimated uniforms to feel much lighter, providing players with more comfort than conventional jerseys.

DURABILITY

Sublimated printing allows the graphics to be fused with the fabric fibres, meaning they will not crack or peel over time. This ensures that the player numbers, names, logo, and team colours will remain of the highest quality and clarity throughout the life of the jersey.

INDIVIDUAL CUSTOMISATION

Each individual garment is printed from its own transfer, rather than en masse on a single transfer. This process makes it much easier to add individual customisation, such as numbers or names, to each garment.

LOW QUANTITIES

Thanks to sublimated printing, we can fulfil smaller minimum orders or re-orders, as the setup required for printing is significantly reduced.

Social Responsibility

Apelle recognise our responsibility to ensure that the workers who produce our products are employed under safe, fair, legal and humane conditions. We aim to source all our products from trusted, reliable, and proven suppliers who adhere to the following audit-able compliance standards.

SMETA

Our local suppliers and international manufacturers meet the Sedex Members Ethical Trade Audits (SMETA) Certification standards. SMETA is a social audit methodology assesses all aspects of responsible business practice. The process enables businesses to access their suppliers, monitor health and safety for workers, and signal zero tolerance of human rights abuse such as child and forced labour.

BSCI

Our international suppliers perform BSCI audit to help monitor their supply chain to ensure that all suppliers are treating workers ethically, legally and in a socially responsible manner.

ISO

We work with trusted international manufactures who meet various ISO standards including: ISO 9001, ISO 24001, ISO 45001.

ISO 9001 helps ensure that customers get consistent, good-quality products and services, which in turn brings many business benefits.

ISO 14001 is an internationally agreed standard that sets out the requirements for an environmental management system. It helps organizations improve their environmental performance through more efficient use of resources and reduction of waste.

ISO 45001 is the world's international standard for occupational health and safety, issued to protect employees and visitors from work-related accidents and diseases.

ETI

Our local suppliers are part of ETI (The Ethical Trading Initiative) an alliance which works globally to improve working conditions for people who grow raw materials or produce consumer goods.

WRAP

Our local suppliers meet internationally recognised social compliance standards WRAP (Worldwide Responsible Accredited Production).

OEKO-TEX

Our local suppliers offer OEKO-TEX certified fabrics. OEKO-TEX, ensures that products are free from dangerous substances—chemicals like pesticides, heavy metals, formaldehyde, and undesirable surfactants. The certification is designed to ensure the effect the dyeing industry has on the environment is minimised and the garments are safe for consumers as well as the people who make and sell them.

As Apelle source from multiple suppliers and manufacturers specific product compliance or certifications may vary. Please reach out our team if you wish to find out more information about a specific product or manufacturer.

Elevate your teamwear.
