

On-Off-Sure

Corrosion control & verification kit

Since 1989

Korrosionsgruppen

The kit.

Introducing the On-Off-Sure (O-O-S) Measurement Kit:

Your go-to solution for timely corrosion detection.

With O-O-S, you can proactively safeguard against expensive repairs and maintenance by identifying corrosion early. This innovative tool effortlessly indicates whether your assets are under threat from corrosion, ensuring your investments are well-protected.

Contents

The O-O-S Measurement Kit comes with everything you need for comprehensive potential measurements in marine environments:

- A durable, high-quality marine grade carry bag for convenient transportation and storage.
- A specialized electrode with a 10-meter cable, designed for accurate potential measurements in seawater & brackish water.
- A precise corrosion potential multimeter tailored for potential assessment, enhancing the accuracy of your readings.

Resources & tools

To ensure a seamless user experience, the kit includes:

- An easy-to-follow instruction leaflet, complete with a potential table to simplify the interpretation of your results.
- A service book specifically for shipowners & asset owners allowing for meticulous documentation of maintenance and corrosion monitoring.

Interpret your results, on the spot.

Empowering Immediate Analysis with On-Off-Sure (O-O-S):

Our kit revolutionizes the way you interpret corrosion measurement results. With our comprehensive reference tables and intuitive potential infographics, you can instantly decipher your data on-site, without the need for external analysis or prolonged wait times.

O-O-S is meticulously designed to provide a clear, straightforward understanding of the potentials measured, allowing you to make informed decisions promptly.

This instant interpretation feature is not just a convenience; it's a crucial element in maintaining the integrity of your investments in real time.

**Support when you need it.
Globally.**

Since 1989

OUR HISTORY

Since 1989

Corrosion Group has been a leading force in Scandinavia's cathodic protection sector since its establishment in 1989. With its headquarters in Ramlösa, Helsingborg, in southern Sweden, the company has carved out a strong presence in various business areas, including marine, industry, pipelines, and consultations, often extending its expertise to international projects.

3 decades

of experience have honed our processes, which encompass project planning, material handling, and on-site installation, tailored to client-specific conditions.

Following installations, Corrosion Group delivers comprehensive reports that are easy to understand, offering suitable actions and results to ensure effective corrosion prevention.

This narrative reflects Korrosionsgruppen's dedication to maintaining the integrity of metal structures, with a clear mission to lead and innovate within the industry.
