IV. Instructions

1. Turn on/Turn off

Gently press the power switch, then the LED battery indicators are on. If there is no charging devices, power bank will automatically shut down in 30 seconds.

2. How to charge the power bank

- Solar supply
Unfold the solar panels and put the power bank under direct sunlight and sunlight will be converted into electricity to charge built-in lithium battery automatically. **(Strong sunlight is advised.)** That the green light is on means the power bank is being recharged by sunlight or other forms of light.

• Power supply

Connect the TYPE-C or USB input port and wall/car adapter USB port with a cable. The blue LED indicators will be flickering while charging, and all blue indicators on means the power bank has been fully charged. QC3.0/PD wall/car adaptor will quick charge the power bank.

3. Charge mobile phones or other devices

- Cable charging
Turn on the power switch and the blue indicators are on. Plug two ends of the cable into the power bank USB port and the devices.
USB1 port and TYPE-C port support fast charging for mobile phones and devices with fast charging function.

4. LED flashlight function

- First, press the power button for about 3 seconds to turn on the LED flashlight.
- Second, short press the power button again and "flashlight mode" flashlight turns to "SOS mode" flash.
- Third, short press the power switch again, the flashlight function as a strobe.
- Then, long press the power switch to turn off the flashlight.

5. Camping light function

- First, quickly press the power button 2 continuous times to turn on the camping light. (Default is maximum brightness)
- Second, there are 3 brightness levels. Short press power button once to adjust the brightness level.

- Third, quickly press the power button 2 continuous times again and the camping light is off.

Note: Due to safety and power saving reasons, LED flashlight and camping light cannot be turned on at the same time.
