Caviar extract

Caviar extract was found to speed up the natural production of collagen and significantly reduce the protein cross-linking (fibronectin). Caviar extract is very rich in vitamins A, D, B1, B2, B6, and micro-elements Co, Cu, P, Si, Zn as well as amino acids such as glycine, lysine, histidine, arginine, and asparagine. These ingredients intensify the processes inside the skin cells and at the same time slow down the aging process by moisturizing the skin. Caviar extract firms your skin and provides the highest possible level of hydration. A light moisture-retaining film protects the skin against external factors such as UV radiation, weather, dehydration, and other external factors. This protection fosters the reduction of superficial lines and wrinkles, thereby improving the skin's appearance. Caviar also stimulates the regeneration of the skin.
