

Dermastir Ampoules - Luxury Serum

Dermastir Ampoules are luxurious anti-ageing serums that contain concentrated active ingredients. The active ingredients provide targeted action against signs of ageing and various skin conditions, improving the quality of the skin and its aspect.

Dermastir Ampoules are presented in single-dose 2-3 ml ampoules made of special medical glass that prevents any risk of oxidation or contamination. Thanks to this monodose packaging, the serums deliver to the skin the freshest formula with maximum performance of active ingredients.

SERUMS MONODOSE

Medical glass ampoules

Dermastir Ampoules can be used in combination with aesthetic machines such as ultrasound, galvanic, high frequency, RF, PDT LED

The high concentration of active ingredients of Dermastir Ampoules provides visible results which last even longer if ampoules are used as course treatments. Dermastir Ampoules can be used at home, during aesthetic treatments and with aesthetic machines. Dermastir Ampoules can be used directly on the skin or mixed with a cream or the mask.

Dermastir Luxury Ampoules EGF Oligopeptide

Dermastir EGF Skincare Ampoules are the perfect anti-aging and anti-wrinkle treatment, as they stimulate the production of collagen. A lab-derived oligopeptide, EGF is an anti-aging ingredient that promotes cell renewal and skin repair. When EGF is applied to the skin, tissue regeneration begins as it supports the synthesis of proteins and increases circulation, mitosis, the number of fibroblasts, the accumulation of collagen.

Research has also shown that EGF can enhance the effects of peel therapy, alpha hydroxy acid and microdermabrasion treatments, as well as boost the age-reversal effects of injectable-filler procedures by stimulating the cells to produce

collagen. EGF is also recommended to patients with aged or photo-damaged skin for its regenerative action and its ability to increase the effects of professional age-reversing treatments.

DIRECTION FOR USE

Break the top of the skincare ampoule. Distribute the precious serum directly on the skin or mix in a cream or in a mask. Massage delicately on the interested areas until completely absorbed.

NORMAL PROGRAMME

1. Apply one skincare ampoule every seven days for a month.
2. To consolidate the obtained results repeat phase 1.

INTENSIVE PROGRAMME

1. Apply one skincare ampoule every three days for a month.
2. To consolidate the obtained results repeat phase 1.

WARNINGS: Do not expose yourself to the sun. Avoid contact with eyes and in case rinse with water. The skincare ampoule tip must be broken by using a piece of cloth.

EGF Oligopeptide

Increases epidermal thickness through the action of the epidermal growth factors. With age, the epidermis becomes thinner and transepidermal water loss (TEWL) increases. EGF is mainly indicated to be applied daily to supplement and stimulate the regeneration of the epidermal cells. Apart from age, epidermal cells also become thinner after operations and procedures such as laser and dermabrasions.
