

DERMASTIR®

Dermastir Eye Contour Cream - 35 ml

The skin of the eye contour area is thin and fragile that makes it more vulnerable to UV rays and external aggressions than other skin areas. Due to these characteristics, the eye contour area is the first to show signs of aging.

Dermastir Eye Contour Cream is a perfect solution to mask the first signs of ageing of eye and lip contour area.

Unlike other companies that offer one for all formulations to treat eye contour area, Alta Care Laboratoires has created different formulas in cream and in gel form in 35 ml airless vacuum packing that perform targeted action on specific problems of the eye contour area.

ANTI WRINKLE

DARK CIRCLES

FATIGUE

EYE RADIANCE

AGEING

Adenosine

Increases skin smoothness, relaxes expression lines, repairs damaged cells, anti-inflammatory.

Collagen

Improves smoothness, elasticity, moisture. Boosts the production of collagen and deals with dark circles.

Palmitoyl Pentapeptide-4

Improves wrinkle depth, roughness, volume and density, stimulates the production of collagen and glycosaminoglycans.

Phytoextracts

Antioxidant, depigmenting, depuffing, moisturizing, brightening, wound healing properties.

Directions For Use

Apply the Dermastir Eye Contour Cream daily. You can apply it in the morning and in the evening and post-op.

MADE IN FRANCE

Dermastir Eye Contour Cream - 35 ml

In Dermastir Eye Contour Cream by Alta Care Laboratoires, the osmolarity is 300 that makes it the isotonic solution. It means that there is no risk of side effects under the form of puffy eyes (hypotonic solutions) or dry eyes (hypertonic solution).

> 300

In hypertonic solution, the osmolarity >300 may cause **dryness**

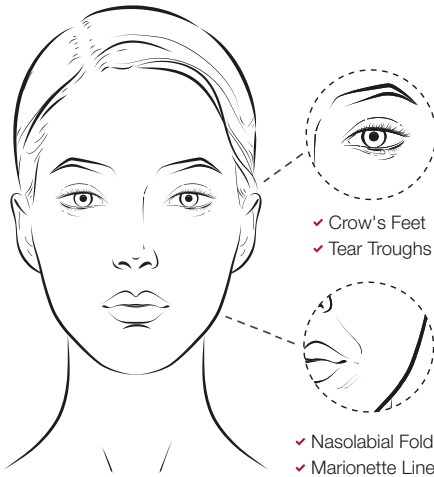

= 300

In isotonic solution, (osmolarity =300) there will be no movement of water

< 300

In hypotonic solution, the osmolarity <300 may cause **puffiness**

Alta Care Laboratoires implements vacuum airless technology. For this reason, it has become possible to present Dermastir Eye Contour Cream in a big 35 ml format. Airless packaging guarantees a high safety profile with no risk of alteration of stability and pH level and protects the formula from oxygen, heat, light, humidity and bacteria.

- ✓ Crow's Feet
- ✓ Tear Troughs

- ✓ Nasolabial Folds
- ✓ Marionette Lines

Oxygen

Airless jar protects from oxidation. The ingredients maintain their bioavailability from the first till the last application.

Heat

Thermos effect. The airless packaging consists of 3 jars nested into 1, protecting from conductive heat.

Light

Metallic coating reflects infrared rays, protecting from the light and direct sun exposure.

Humidity

The airless jar maintains its microclimate and pH level, protecting from the humidity.

Bacteria

Prevents the risk of microbiological contamination. The optimal amount is delivered with the pump. No need to touch the product.

AIRLESS PUMP TECHNOLOGY

Metallic Reflecting Technology

Protects from infrared rays and radiant heat

Actuator Airless Technology

Protects from bacteria

Vacuum Flask Technology

Protects from conductive heat
