

DERMASTIR Sterile Vials - H53EGF

Quantity: 10 vials x 5 ml

DERMASTIR Sterile Vials H53EGF by Alta Care Laboratoires contain 53 ingredients and hyaluronic 50 mg/vial, which stimulate the epidermal growth and elasticity of the skin. Natural Moisture Factor in DERMASTIR H53EGF helps to prevent the TEWL (transepidermal water loss) and retain moisture, promote wound healing, better circulation and nutrient absorption, maintaining the vitality of the skin and its youthful aspect.

The needs of the skin are not limited to hydration. For this reason, Alta Care Laboratoires combines in a unique luxurious anti-aging dense serum essential nutrients such as peptides, coenzymes, minerals, vitamins and amino acids to help the skin become more supple, firm and tight.

4 PEPTIDES

5 COENZYMES

7 MINERALS

12 VITAMINS

24 AMINO ACIDS

VITAMIN C

Boosts your skin's collagen production to give you firmer, more plump skin and smooth out fine lines and wrinkles.

NIACINAMIDE (VITAMIN B3)

Helps to improve the condition of the skin, helping to deal with the signs of pigmentation, sun-damage, aging and dry skin.

ARGININE

Helps restore firmness and fights yellowing skin. May significantly limit the effects of glycation.

RETINOL (VITAMIN A)

Stimulates the production of new cells, also helps to fade dark spots.

Dermastir Sterile Vials - H53EGF

Quantity: 10 vials x 5 ml

Dermastir Sterile Vials H53EGF by Alta Care Laboratoires contain peptides, that are small enough to be passively delivered through the skin and trigger the epidermal growth. Dermastir H53EGF combine different types of peptides that activate different pathways for a better anti-aging effect. The serum form provides a longer time for release of active ingredients.

It can be combined with Dermastir Microneedling, studied and designed specially for Dermastir Sterile vials, to obtain even better results.

Dermastir H53EGF Sterile Vials is a sterile A product and can be used with microneedles 0,25mm – 0,50mm for home use.

Use microneedles 1,00mm – 2,00mm only in a clinic with a certified medical doctor.

Dermastir Gold 24k Microneedling Stamp-On

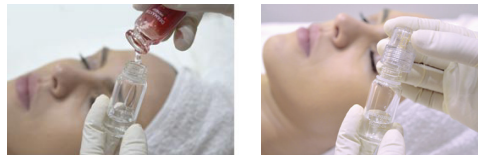

- 1 Move from right to left
- 2 Move from top to bottom
- 3 Move diagonally

Dermastir Gold 24k Microneedling Stamp-On by Alta Care Laboratoires is a quick, effective, hygienic and secure system of delivering active ingredients. The Dermastir Stamp-On creates microtraumas or channels, that stimulating a natural response of the body by repairing these microwounds, triggers skin cells to produce high doses of collagen to construct firmer and younger-looking skin.

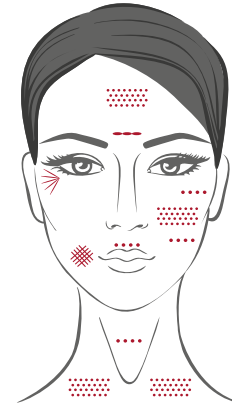

Directions for use

Clean the Dermastir Stamp-On by first pouring at least 75% alcohol in a clean cup. The Dermastir Stamp-On should be all covered with the alcohol for about 20 minutes. Take the Dermastir Stamp-On out, then immerse in a physiological saline for about 5 minutes, and allow it to air dry on paper towel. Pour the serum inside the sterilized bottle of the Dermastir Gold 24k Microneedling Stamp-On and twist the Stamp-On on top and perform different movements: from left to right, from top to bottom or diagonally.
