

DERMASTIR Post-Op Retexturizing Neck Mask

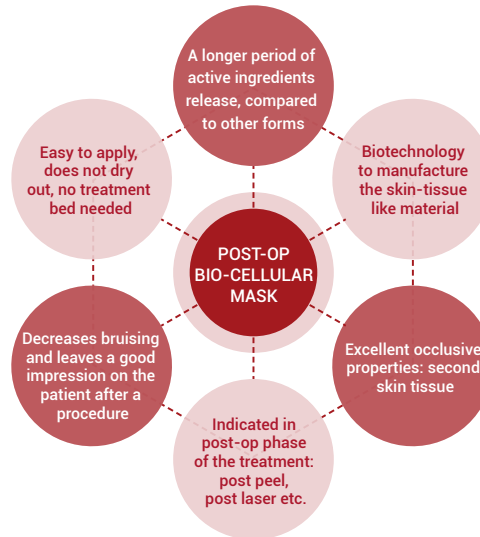

Dermastir Post-Op Bio-Cellular Retexturizing Neck Mask is made from the fermentation of microorganisms, not from mechanical manufacturing process. Alta Care Laboratoires utilizes biotechnology to manufacture the skin tissue-like material. The unique formula produces a protective barrier and collagen production is stimulated. The mask is hydrophilic and it diminishes the TEWL since it can retain moisture levels up to 100 times its own dry weight. The formula was created to inhibit enzymes that break down hyaluronic, collagen and elastin in the skin. Its reticular 3D web structure enables air to penetrate but not liquid, it adheres tightly with the skin and is also known as 'seconds skin tissue'.

Dermastir Post-Op Retexturizing Neck Mask

The skin of the neck area is very thin and delicate and, thus, more exposed to the UV damage and gravitational factors. In order to prevent first signs of ageing such as loss of firmness and elasticity, it is important to treat neck skin daily. However, quite often patients tend to focus on face treatment and pay little attention to the neck and chin area. It leads to a significant, visible to the naked eye, difference of skin quality between face and neck.

Dermastir Post-Op Bio-Cellular Retexturizing Neck Mask is unique in its genre and different from other products on the market. It is the most occlusive which means that the mask wakes up skin cells, improves their response to treatment and closes properly the work of a medical practitioner in post-op phase.

POST LASER

NECK

LOOSE NECK

ANTI-WRINKLE

NECK LIFT

Palmitoyl Pentapeptide-4

Known also as collagen pentapeptide for its structure-giving properties with the visual impact on fine lines and wrinkles. It launches retexturizing skin processes, evens skin tone and decreases bruising post-op.

Hyaluronic Acid

The hydration provided with the HA is extremely important, since the lack of moisture in the skin may lead to its drying out and cause premature signs of ageing.

Hydrolyzed Elastin

It has sebum regulating properties, smoothing and calming action, useful in treating symptoms of various skin disorders and conditions.

Tocopherol (Vitamin E)

Radical scavenger. Known for its strong antioxidant properties.

DIRECTIONS FOR USE

Apply once or twice a week or post-op for 30-45 minutes.

1. Cleanse your neck to remove any make up, dirt or oils. Rinse well and pat dry with a towel.
2. Remove the outer layers of the bio-cellular mask's packaging to reveal the elastic and translucent bio-cellular mask inside.
3. Place the mask on the neck. Pat it gently to ensure it adheres to the skin.
4. After 30-45 minutes, remove the mask. Massage the rest of the serum on the skin.
5. Proceed with the normal skin care routine without washing off the serum.
