

DERMASTIR®

Dermastir Post-Filler Collagen

Quantity: 4x4ml

The structure of skin changes over time. Skin ageing is caused both by endogenous and exogenous factors, responsible for the first signs of ageing such as loss of volume, firmness and brightness.

The progressive decrease in collagen is visible through deep and marked wrinkles and sagging skin. Collagen, being the most abundant protein in the body, is essential for skin tone and elasticity.

Inspired by dermatological collagen treatments, Alta Care Laboratoires has developed and produced Dermastir Post-Filler Collagen that is applied onto the wrinkles to diffuse them out.

Dermastir Post-Filler Collagen deals with all types of wrinkles, e.g.: forehead wrinkles, wrinkles around the eyes, bunny lines, brow furrows, nasolabial folds, vertical lines around the mouth, neck lines.

DERMASTIR®

Dermastir Post-Filler Collagen

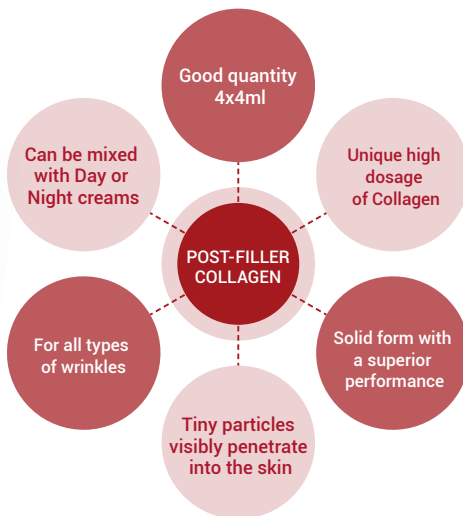

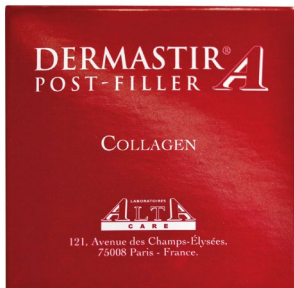

Quantity: 4x4ml

Dermastir Post-Filler has a high concentration of collagen in solid form with superior activity and performance compared to competing products.

Collagen in Dermastir Post-Filler is presented in tiny particles that visibly penetrates into the skin. The level of penetration is deeper and more intense compared to other collagen-based products on the market.

Collagen in Dermastir Post-Filler is stable and can be dosed on the respective areas of the face that need more lifting and anti-age, such as wrinkles.

Dermastir Post-Filler Collagen can be mixed with the cream and enhance its anti-aging effect.

Use one ampoule per week to see visible results.

1. Cleanse your face to remove any make-up, dirt or oils. Rinse well and pat dry with a towel.

2. Push the cap down to break the seal of the Dermastir Post-Filler ampoule before taking off the cap.

3. Mix the particles with a cream and apply the mix on the wrinkles and areas subjected to sagging.

4. It is possible to apply Dermastir Post-Filler directly on the wrinkles.
