

DERMASTIR Tsunami Deep Cleanser

DERMASTIR Tsunami is an airless deep cleanser with intense cleansing action that can be used on all skin types.

The deep cleansing action is automated and oxygen bubbles are formed to disinfect the skin surface. DERMASTIR Tsunami is also one of the most frequently used skin eruption treatment.

DERMASTIR Tsunami implements oxygen bubble technology, which is active against anaerobic bacteria. *Propionibacterium acnes* (P. acnes) are the bacteria responsible for acne breakouts. They cannot live in an aerobic (oxygen-rich) environment.

DERMASTIR Tsunami works by introducing oxygen into the pores, thereby acting against anaerobic bacteria.

- ✓ DEEP CLEANSING
- ✓ REDNESS
- ✓ SEBUM REGULATOR
- ✓ SKIN ERUPTIONS
- ✓ BLOCKED ENLARGED PORES

Formula

Peroxide free formula that does not dry the skin.

Application

Suitable to all skin types, no need to rub the cleanser on the skin.

Activity

Leave on the skin for 15 minutes. Ingredients release for a longer period.

Applicator

Special applicator that prevents from excessive use of the product.

Packaging

Airless packaging that maintains ingredients active from the first till the last application.

Technology

Oxygen bubble technology prevents the replication of anaerobic bacteria.

Stability

High stability means high safety profile and performance.

Safety Assessment

No resistance or addiction developed.

Dermastir Tsunami Deep Cleanser

Dermastir Tsunami is presented in vacuum flask packaging that protects the cleanser from exposure to oxygen, bacteria, light, heat and humidity. The stability and the efficacy of the formula are maintained from the first till the last application.

A special applicator prevents the excessive use of the product and releases a sufficient quantity for each application. For this reason, a 100 ml flask of Dermastir Tsunami lasts for a longer time.

OXYGEN BUBBLE TECHNOLOGY

Active against Anaerobic Bacteria

Quantity: 100ml

Oxygen

Airless jar protects from oxidation. The ingredients maintain their bioavailability from the first till the last application.

Heat

Thermos effect. The airless packaging consists of 3 jars nested into 1, protecting from conductive heat.

Light

Metallic coating reflects infrared rays, protecting from the light and direct sun exposure.

Humidity

The airless jar maintains its microclimate and pH level, protecting from the humidity.

Bacteria

Prevents the risk of microbiological contamination. The optimal amount is delivered with the pump. No need to touch the product.

Apply the product once a day.

15-20
MINUTES

1. Cleanse your face to remove any make-up and pat dry

2. Remove the cap of the product

3. Press the top of the bottle to get the desired amount of the product on your fingers or your brush

4. Apply a homogenous layer on the face and neck, avoiding the eye contour area

5. Leave the gel to act and oxygenate the skin for up to 15-20 minutes

6. Massage gently. Rinse off with water; you can also use wet sponges to remove the product

Application

After 15-20min
