## Dermastir Twister Eye&lip Contour Lipophilic monodose serums

Dermastir Twister Eye&Lip Contour serum in shiny red monodose softgels is a high performance, antiageing product based on a purified extract derived from Padina Pavonica, a particular brown alga with strong protective action for the skin of eye and lip contour area. Dermastir Twister Eye&Lip Contour serum moisturizes and improves the delicate skin around the eyes and lips, strengthening the natural defence system against free radicals and every-day irritants. Dermastir Twister Eye&Lip Contour serum is a delicate treatment to prevent and treat fine wrinkles around eye and lips, eye bags, dark circles and sagging skin. The eye and lip contour area influences the overall look of the face and, if treated daily with right ingredients and high-quality products, helps to look younger and rested.

### Padina Pavonica

This anti-ageing active ingredient exudes substances that act directly on the GAGs.

It helps to improve skin tone and make wrinkles less visible.

### C12-C15 Alkyl Benzoate

This emollient produces a soft, smooth, non-greasy application.

### Methyl Methacrylate Crosspolymer

These ultra-fine particles feature a tremendous capacity for water or oil absorption.

Dermastir Twisters have a high concentration of active principles. For this reason, Alta Care Laboratoires implements airtight technology to protect the ingredients from oxidation, moisture and contamination. Therefore, it is recommended to keep the Twisters protected inside their packaging.

## Dermastir Twister Eye&lip Contour Lipophilic Monodose Serums

Dermastir Serum Twister – Eye&Lip Contour by Alta Care Laboratoires presented in monodose capsules is a lipophilic serum. The mechanism of action of lipophilic serum is different from a hydrophilic known for its ability to dissolve in the water of the skin.

The lipophilic serum dissolves in the fat and sebum of the skin and forms a protective barrier on the skin surface. Dermastir Serum Twister – Eye&Lip Contour can be applied after a hydrophilic serum, allowing in this way to a hydrophilic serum applied before to remain for a longer time in the skin and to remain more active.

This effect is due to the fact that the skin level where a lipophilic serum performs its action is above the level where the hydrophilic serum is dissolved. Thus, the lipophilic serum thanks to its structure retains and "blocks" the ingredients of a hydrophilic serum inside the skin for a longer period.
