

REBS WINDUP POLE, 15M W/ HANDBRAKE

DESCRIPTION

The REBS Wind Up telescopic pole is a lightweight hand crank hook and climb VBSS and urban access system. The 15m capable pole has superior controllability and releasable braking feature that integrates easily with RHIBs or urban ground deployments. The top adapter of the pole is compatible with all Hulk configured grapnel hooks in order to place a hook with an attached ladder or rope onto a ledge or railing. All belts and moving parts are contained inside the pole for a reliable system with few pinch points.

Option: 10m

Recommended Hook/Adapter:

-Dual 6.8in

-Lockpin Release

CAPABILITIES AND SPECIFICATIONS

PN: 05003 (Pole) Kit (09477)
