FIND YOUR RING SIZE

First - Take these steps for an accurate measurement

1. Before printing this guide, make sure your printer paper document size is set to Letter and page scaling is set to either 100% or “none”.
2. Measure the line on the top to ensure it's exactly 2 inches. No ruler? No problem, place your credit card on the bottom line and check that it fits exactly inside the lines.
3. If the measurement is accurate, you're good to go! If not, double check your printer settings to make sure you're printing full size.

Please note that the ring size measurement will not be accurate if this step is not completed properly.

OPTION 1 - MEASURE BY MATCHING AN EXISTING RING

1. Choose a ring from your existing collection that fits your desired finger well.
2. Place the ring over the circles below. Match the inside edges of the ring to the closest fitting circle. You should only see the dark color circle inside - no white space.
3. If the ring falls in between two sizes, we recommend going with the larger size.

OPTION 2 - PAPER SIZER

1. Carefully cut out the paper sizer below. Make a small slit on the line indicated.
2. Wrap the sizer around your finger with the numbers facing out and slide the rounded tip through the slit you made.
3. For the best accuracy, pull the sizer tight over the widest part of your finger. *Consider the size of your knuckle – if its bigger than the base of your finger, you will likely have to find a size between the two so that it can cross from the knuckle to the base of the finger and at the same time not be too wiggly at the base.
4. Read the number that lines up to the slit, that's your paper sizer number.
5. Compare this number with our size chart below to find you suitable ring size.
6. If the paper sizer number falls in between two sizes, we recommend going for the larger size.

PRO TIP – Measure your finger later in the day when its at it's largest (has had time for natural swelling to occur). Avoid measuring when it's cold as that will affect your finger size too. Be mindful that your finger may swell in warmer temperatures.
