

# Line Snubber™

## INSTRUCTIONS

Line Snubber™ is a rubber shock absorber for your boat's docking lines and mooring ropes. Continuous shock from wind and wave action can cause docking lines to fray, surfaces to wear, cleats to pull out. Line Snubber helps reduce stress on your lines and cleats. Sailors and other boaters will find many uses for the Line Snubber, from anchor snubbing to trailering. Can be used to lash a tiller, tie down a halyard, or rig a

boom preventer. Use Line Snubbers on parallel lines to maximize their effectiveness. Line Snubbers can help secure a dingy in place or keep one steady while being towed. They work for fishing lines, too. Line Snubber is available in both 15" and 22" lengths (38 and 56 cm). Molded of highest quality rubber for years of service. Economically packaged in pairs.

Line Snubbers may also be purchased in bulk, ideal for commercial applications such as fishing fleets:

**1468b** Line Snubber 22, bulk pack of 50 snubbers
