WindTrak 15

#3125 J-Base for WindTrak 10

Spare or replacement for the J-Base that comes standard with WindTrak 10

The J-Base comes with two #10 (5 mm) self-tapping screws. Drill a pilot hole in mast, apply silicone sealant or Loctite® and screw into mast. Installation of J-Base can be accomplished by tapping the mast for 3/16" (5 mm) machine screws or by using epoxy putty to affix base to the mast.

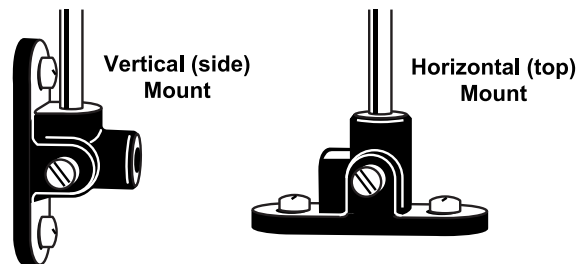

#3155 J-Base for WindTrak 15

Versatile Mount for WindTrak 15

Reduces overall weight aloft by 15 grams when substituted for standard mounting base on WindTrak 15.

The J-Base comes with two #10 (5 mm) self-tapping screws. Drill a pilot hole in mast, apply silicone sealant or Loctite® and screw into mast. Installation of J-Base can be accomplished by tapping the mast for 3/16" (5 mm) machine screws or by using epoxy putty to affix base to the mast.

The J-Base is a glass reinforced polycarbonate fixture for mounting WindTrak to side, top or front of masts on most small boats and dinghies.
