

INSTRUCTIONS

See separate document for standard size Quick Fist (#540) instructions.

Super Quick Fist® is a one-piece rubber clamp that mounts easily to keep equipment firmly in place. Ideal for holding fire extinguishers, oxygen cylinders, CO₂ tanks, and other equipment. Use on boats, off-road trucks, military equipment, ATVs or any vehicle. Can also be installed in structures such as storage sheds.

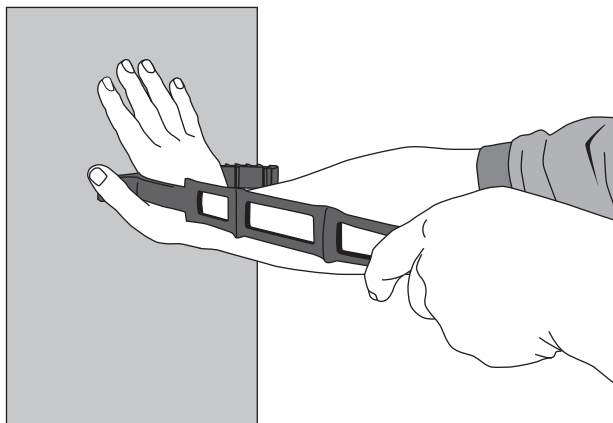

Quick Fist clamps are made of heavy duty transportation grade rubber. They're UV resistant and withstand extreme heat or cold. Ideal for marine use, since Quick Fist will not rust or corrode. Mounts easily with three #10 (5 mm) bolts or screws (not included).

- Holds objects from 2 1/2–7 1/2" in diameter (64–191 mm)
- Each clamp supports approximately 50 lbs. (23 kg)
- Mounting base measures 7/8 x 6" (22 x 152 mm)

To Install:

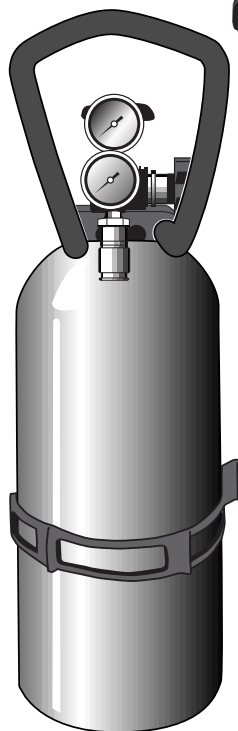

Super Quick Fist can be mounted with the strap facing in any direction. Use three #10 bolts or screws to fasten. Do not over tighten.

After mounting Super Quick Fist, stretch the strap by putting one hand on the base and using the other to pull in a perpendicular direction several times on the strap.

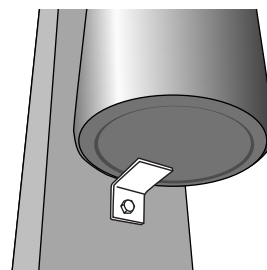

#544 Super Quick Fist®

For mounting smaller equipment or tools, use standard size Quick Fist (#540)

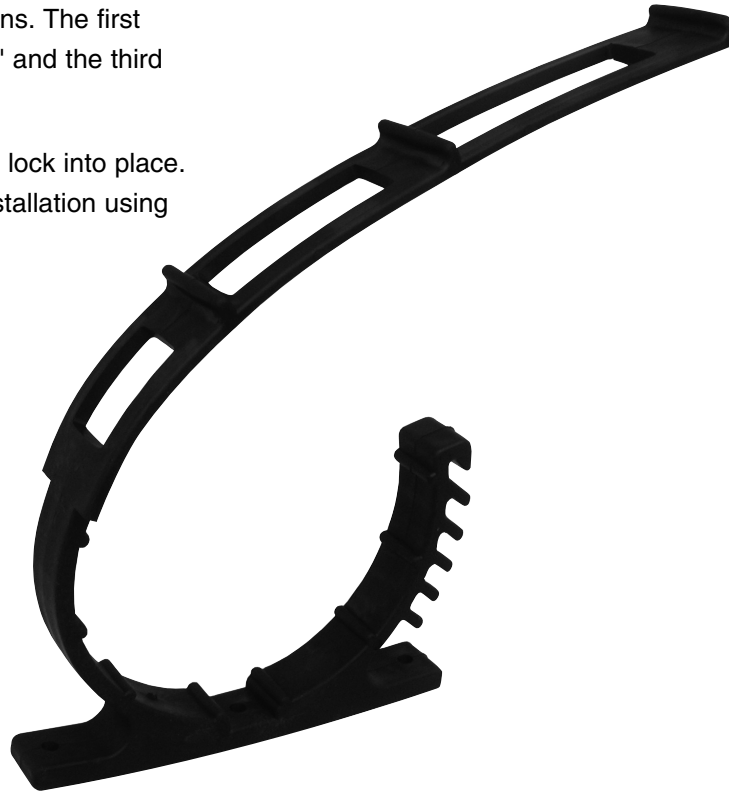

If you plan on holding a large cylinder with the base unsupported, it is advisable to use a piece of angle iron, wood block or shelf bracket at the bottom of the cylinder. This will prevent slippage (especially on a vehicle) and will also make it easier to lock the clamp in place.

To Clamp:

The strap is divided into three sections. The first holds objects up to 3", the second 5" and the third up to 7" (8, 13, and 18 cm).

To clamp, pull strap through jaw and lock into place. Strap can be trimmed off for neat installation using wire cutters or scissors.
