

Vantage PRO2™ INSTALLATION DIAGRAM

Cabled Weather Envoy™ with a Cabled Station

This diagram shows a cabled Vantage Pro2 sensor suite connected to a cabled Weather Envoy™. A cabled Vantage Pro2™ system allows for a cable connection of up to 100' (30 m). This connection can be extended up to 1000' (300 m) with optional extension cables. In a cabled system, the cabled Envoy can only receive data from a cabled Vantage Pro2 sensor suite.
