DELUXE MARK 25
with full-field dielectric Beam Converger™

• Full-field dielectric Beam Converger with quartz hardcoat replaces conventional half-silvered mirror. Horizon and astrobody images are combined in a single full-field for easy, reliable sights under the most difficult conditions.
• Special mineral coating is selective for different wavelengths of light. Horizon is transmitted in one color region and the star or sun in another.
• Improved reinforced plastic stiffens frame for greater measurement accuracy.
• High-efficiency LED (solid-state Light Emitting Diode) illumination system, which floods arc and drum with soft light. The LED will last for the lifetime of the sextant.* Batteries, which are included, will last up to 10 times longer than with regular bulbs. This is another Davis first! Positive “push-on” switching action, with vinyl boot water protection.
• Weighs 16.5 oz. (0.47 kg)

MARK 15
• Large, easily adjusted mirrors using new instrument-quality glass and a special baked on salt-spray resistant backing. Both mirrors have protective housings. Horizon mirror is half-silvered. No adjustment wrenches required.
• High-impact, weather-resistant plastic.
• Weighs 14.5 oz. (0.41 kg)

Extra Beam Converger and Index Mirror, Spring & Screw Kit
#R025F $4500 11698 00272 6

TIP A traditional split image mirror can easily be added to the Mark 25. Order a Mark 15 Extra Mirrors, Spring and Screw Kit, part #R026H.

MARK 3 SEXTANT
Learn to Navigate!

• Rugged, full-size instrument suitable for ocean navigation to any port in the world
• Used by professional, amateur and student navigators alike
• Sextant case with foam cushion can be be purchased separately (#R014A)
• Instruction booklet included

#011 Mark 3 Sextant $67.99 11698 06110 1

ARTIFICIAL HORIZON
Practice navigation without going to sea!

More accurate than a natural horizon...

Answers the need of every sextant user who cannot depend on a natural sea horizon. Use for backyard practice, finding exact position when inland, and making exact sextant shot on foggy mornings. To use, fill with water and read the angle of the reflected sun with your sextant. Half your sextant reading is the sun’s angle above the true horizon. Windproof and corrosion resistant, the reflecting surface is completely enclosed. Comes with two sun shades, a lid and full directions. Compact 6 x 4 x 1 1/2” (15 x 10 x 4 cm).

#144 Artificial Horizon $38.99 11698 01440 8

Both Davis Master Sextants feature professional specifications:

• 7” (18 cm) frame radius. Graduation 120° to −5°
• Index mirror rectangular, 1.98” x 1.49” (50 x 38 mm).
• Precision machined slow travel gear and worm mechanism.
• Highly visible, easy-to-read micrometer drum and vernier allowing readings to 2/10 minute of arc.
• Fully ribbed, three-circle sextant body for platform strength and stability.
• Large, contoured handle designed for sure, steady grip and angled back for added control.
• Seven large sunshades allow complete, independent adjustment of shading density for horizon and index mirrors.
• 3 x 27 mm star telescope with anti-reflective coated glass lenses, plus separate hooded sight tube for glare-free sun shots.
• Neck lanyard frees hand and protects sextant.
• Tough, fully padded, shock-resisting carrying case with compartments for extra batteries and mirror kits.

**Adjustable Boat Hooks**

The Most Dependable Twist Lock and Strongest Boat Hook End!

A tough boat hook is a valuable asset when launching, docking, mooring or retrieving your favorite hat. Team telescoping boat hooks adjust to 8’ or 12’ (240 and 370 cm). The threaded end accepts a deck brush, mop, squeegee and other accessories. A highly visible, soft vinyl orange tip covers the threads and protects the boat’s finish when fending off. All Team boat hooks float. The hook of unbreakable Lexan™ is lighter than (brittle) metal alloy ends. Durability GUARANTEED to last a lifetime. Don’t settle for less!

Tube diameters are between 1–1 1/4” (25–32 mm).

**PRACTICAL SAILOR Says It Best:**

“Davis proves to be the best pole and the best value as well.”

“Complicated hook designs (like Davis) are preferable to get a line to a dock or piling.” “It’s rare to find the best product is also the best buy.”

“They (Davis hooks) float while some sink like stones, they’re light to handle, the twist-lock joints withstood a lot of pressure, and we couldn’t break the heads.”

### TELESCOPING PADDLES

Paddles are required by law in many states aboard PWCs and small boats. Team adjustable paddles stow easily and telescope to 3’9” (50 to 115 cm). Our Paddle/Boat Hook combination is great to have on board and at the launch ramp. The bright orange paddle end doubles as a signaling device. Made tough for years of hard use.

**SHOCKLES LINE SNUBBER™**

**Minimizes stress on ALL lines—for use on any boat!**

LineSnubbers feature our **progressive tension design**—the more they stretch the more tension it takes to stretch them. This minimizes the return force and dampens shock loads better than traditional rubber snubbers. LineSnubbers attach to the line by using a traditional clove hitch knot, or by using an optional Davis LineGrabber. The Davis LineSnuber is easily adjusted for varying conditions, and it can be readily be moved from line to line, unlike rubber snubbers where the line is woven into the snubber.

One size fits all boats and all line from 3/8 to 3/4 inch (10–19 mm). LineSnubber can be attached to 1 inch rope (25 mm) by using a Davis LineGrabber #2460.

LineSnubber is stronger than most double-braided line. For example, SWL on 5/8 inch (16 mm) double-braid is 3500 lbs. (1590 kg). When properly rigged and LineSnubber reaches maximum stretch, the line bears the load, not LineSnubber. Internally, a PATENTED **Line Stretch Limiter** is combined with marine-grade elastomer for durability and strength. Hollow, UV resistant nylon webbing is sewn over the internal mechanism and two 316 stainless steel carabiners allow for quick and easy attachment.

Many LineSnubbers are going strong after ten years!

**For marine applications:**

- LineSnubber reduces shock to any line, cleat or ground tackle, including bow rollers and rigging
- Attaches, adjusts or removes quickly; use a simple clove hitch or a pair of Davis #2460 LineGrabbers (see page 5)
- Reduces or eliminates noise from creaking, groaning dock lines or ground tackle—jarring is minimized, too
- Compensates for tidal surge and chop from wind and waves
- Rigged properly, LineSnubber keeps boats centered in the slip

Shockles are designed to absorb all shock loads at the dock, at anchor, on a mooring and on land. By absorbing shock loads, Shockles quiet anchor chain noise, and extend the life of dock lines and anchor lines by minimizing wear and chafe. When rigged properly, jarring from tidal surge and wind waves is eliminated increasing both comfort and safety aboard.

Shockles are strong, but should always be rigged in-line with the load. Never allow them to bear a load alone. Allowing a maximum of eight inches (20 cm) of slack before the line bears the load will result in many years of service from LineSnubber.
DockShockle was designed to prevent wear and tear on all lines on smaller, lighter boats up to 40 feet (12 m). The same Progressive Tension Design and PATENTED Line Stretch Limiter are used in this smaller version of our LineSnubber. DockShockle comes with a pair of Mini LineGrabbers and two 316 stainless steel carabiners. Use on line from 3/8 to 3/4" (10–19 mm). The webbing is 12" long (31 cm) in the relaxed position.

DockShockle should be set up with 3–6" (8–15 cm) of slack in the line to safely absorb and buffer shock loads caused by wind, waves, chop and tidal influences.

LineGrabber™

Made of 1/4" (6 mm) ultra-high molecular polyethylene fiber with a sewn loop at each end, LineGrabber measures just 9" (23 cm) overall length. Create a strong attachment loop in line from 3/8 to 1" (10–25 mm) by using a basic Prusik hitch. UHMPE fiber rope is tough and durable enough to attach to anchor chain, toe rail, shackles, rails & pulpits, roof racks, etc. to create a secure attachment loop that will hold up to 2000 lbs. (900 kg) tensile strength.

LineGrabber safely carries loads to help solve challenges that pop up like a fouled jib sheet, loose anchor, missing dock cleat, or a bow eye that's too small. Sold in pairs.
Featuring a stainless steel wire gate snap rated to 300 lbs. (136 kg) Safe Working Load, this is truly a bungee cord on steroids. Take MiniShockles boating, camping, fishing or hiking—anywhere you want to secure a load. We all carry valuable things on our boats, RVs, automobiles and off-road vehicles. And, we have all been disappointed by standard bungee cords with hook ends that often hold just 36 pounds (16 kg). UV resistant nylon webbing is sewn over marine-grade elastomer for durability and strength. Three sizes. Black.

**MiniShockles—strong, tough, secure.**

---

**AnchorSnubber™**

*Keep your anchor set.*

AnchorSnubber quiets chain noise and helps keep your anchor set by minimizing shock loads. Use directly on chain, anchor rode, or snubber line. Made with the same features employed in LineSnubber—Progressive Tension Design and PATENTED Line Stretch Limiter. Comes with two 316 stainless steel key pin shackles that can run through most bow rollers and compensate well for chain twist. Fits most anchor chain. Webbing is 20” (51 cm) long. Black.

---

**FenderFriend™**

*Every fender needs a friend.*

FenderFriend is a fender whip, fender hanger and fender adjuster—all in one. Anyone can attach fenders quickly and easily. Attaches almost anywhere. Stretches when fenders get pinched between the hull and the dock. Minimizes loads on stanchions, rails, cleats and lifelines. UV resistant nylon webbing is sewn over marine-grade elastomer with a Nexus® nylon buckle for superior strength. Strap adjusts from 16 to 72” (0.4–1.8 m). Trim strap to useful length with sharp scissors and heat-melt the trimmed strap end.

Two models to choose from; Twin-Eye or Center-Tube. Sold individually. Black.

A little bit of stretch helps keep fenders in place.
The more wind and waves, the better Rocker Stoppers work!

With engines off or sails down, you feel the sea as you stop for meals, fishing, rest or sleep. Rocker Stopper is the solution—efficiently dampening the effects of waves and wake on a stationary boat. Designed for rugged use.

#352 Rocker Stopper, individual unit $1099

14" (36 cm) dia.  1 lb. (.45 kg) weight

TIP Rocker Stoppers are excellent for slowing drift while fishing, and can also be used as a dock stabilizer.

Protect Your Lines with Removable/Adjustable Chafe Guards

Chafe protection is critical at the dock, at anchor or on a mooring. Davis offers a great solution to prevent chafing over a cleat, cap rail, where two lines cross or at the anchor roller. Dock lines can be expensive—extending their life with good chafe protection is not!

Hook-and-loop fasteners along ENTIRE interior surface grip the line—no need for additional ties

Davis Removable Chafe Guards fit braided or twisted line from 3/8 to 1" (10–25 mm). They’re easy to remove and adjust as lines stretch or chafe protection is needed elsewhere. Great for dock, mooring and anchor lines where wearing through a line could cost you the boat. The outside cover is made of tough, UV-stabilized nylon webbing. The inside is lined with hook-and-loop fasteners to grip the rope.

#395 Chafe Guard, White. Pair. 011698 03950 0 $29.99

#397 Chafe Guard, Black. Pair. 011698 01269 5
Get your small craft to and from the water quickly, safely, easily!

Mounts wide on the transom to distribute the load and leave clearance for outboard motors. The boat can be operated without removing the wheels in most cases.

**Wheel-a-Weigh features:**
- Portable and removable
- 316 stainless steel frames and pivot brackets
- Inflatable tires
- Precision molded, non-corrosive wheel hubs
- Stainless steel installation hardware included
- Easy-to-follow instructions

**#1482 STANDARD**
For loads up to 220 lbs. (100 kg)

- 10" (26 cm) inflatable tires
- 220 lb. capacity (100 kg) handles most boats with motors up to 10 HP
- Weighs 9 lbs. 4 oz. (4.2 kg)

**#1483 EXTRA DUTY**
For loads up to 330 lbs. (150 kg)

- 14" (36 cm) inflatable tires and roller bearings inside hub
- Curved wheel frames pivot under the boat for better balance
- 330 lb. capacity (150 kg)
- Weighs 15 lbs. 11 oz. (7.2 kg)

Wheel-a-Weigh products are not designed to be towed behind a vehicle.
**Doel-Fin**

**The Original HYDROFOIL**

*Enjoy the ride! 100% Satisfaction Guaranteed*

Over three decades of testimonials and 1,000,000 customers agree that Doel-Fin delivers!

Doel-Fin is the original hydrofoil developed by an aeronautical engineer to improve overall performance on boats with outboard motors or outdrive units. Molded in two pieces of guaranteed unbreakable, high-strength plastic, each foil is designed to flex independently to absorb shock. The positive effects include greater stability, consistent planing at lower RPM, faster out-of-the-hole performance, steadier turns, higher top-end speeds and lower bow rise at all speeds.

- Doel-Fin improves overall performance – even on boats with well-designed hulls
- Save up to 30% on fuel consumption
- Faster out-of-the-hole for happier water-skiers
- Maintain lower planing speeds without constant throttle adjustments for wakeboarding, tubing or beginning skiers
- Less bow rise for better visibility and increased safety
- Simple 15-minute installation; hardware included

Doel-Fin is designed for use with small motors, big motors, and inflatable dinghies. Boats with small motors no longer “porpoise” with the bow-up when the throttle is applied and achieve planing at lower engine speeds. Big motors benefit from less stern suction, faster planing times and steadier turns. All these features add up to increased fuel efficiency.

The Whale Tail XL unique hydrodynamic design extends behind the prop to utilize prop wash energy which is normally lost. Whale Tail transforms this energy into lift for immediate response when the throttle is applied. Use Whale Tail XL in fresh or saltwater.

**Whale Tail XL**

**Aluminum Stabilizer and Ski Boat Fin**

*Improves performance in any I/O or outboard motor*

- Pops skiers up in less time
- Flattens wake for waterskiing; creates positive, skid-free turns
- Stabilizes bow-light boats
- With bow lowered, visibility and safety are improved
- Smooths out ride in rough water
- Reduces porpoising & cavitation
- Increases top speed and fuel savings in most applications
- Mounts on the anti-cavitation plate of all inboard/outboards and outboards
- Installs in 15 minutes with stainless steel hardware included
- Marine grade aluminum with durable anodized finish

**#448**

**WHALE TAIL XL**

Stabilizer & Ski Boat Fin

$88.99

It's simple! Position Whale Tail XL on the horizontal plate right above the propeller, clamp in position and drill, secure with bolts. See complete instructions included.

Lube II allows sticky, hard to move steering rods to be properly and easily lubricated for smooth, easy steering action. The system includes a stainless steel lubricating nut with an oil seal and a grease (zerk) fitting. This lubricator’s unique design keeps moisture and contaminants out while enabling you to pour or pump several types of lubricant in. Your choice: (1) Max Lube (#422) synthetic lubricant with high water separation qualities and anti-corrosion protection. This is the best lubricant available for the purpose. (2) A high grade 90w synthetic gear oil. (3) High quality white lithium grease. Lube II helps correct and prevent steering problems. For both mechanical and hydraulic systems. Fits all major U.S. and foreign motors (7/8” × 14 pitch threads). Easy, 10 minute installation. Marine grade stainless steel for salt and fresh water use.

Cable Buddy is a complete steering cable lubrication system. Includes the stainless steel Cable Buddy nut with plug and sealing washer, oiling tube assembly, and Max-Lube, the ideal lubricant for steering cables. Works on inboards, outboards, and inboard/outboard steering cables. Fits all major U.S. and foreign motors (7/8” × 14 pitch threads). Seals moisture out, puts lubricant in. Prevents corrosion and freezing down to −40°F (−40°C). Cable Buddy lubricates and virtually eliminates all wear in the inner cable, where most problems occur. Easy to install (if you can take the cable off, you can install the Cable Buddy). Install the Cable Buddy now... or deal with the hassle and expense of replacing your steering cable later!

Max-Lube excels under pressure— anywhere oil is required. This proprietary synthetic film has many advantages over other synthetic and premium oils: superior rust and corrosion protection, rapid separation from water, greater stability at temperature extremes, 10–20% reduction in operating temperature, and 5 times greater load carrying. The net result is smoother, quieter, cooler and longer operation. Max-Lube is recommended for steering cables (all boat motors, fresh or salt water), sporting equipment (fishing reels, guns, bike chains), all gears regardless of type or size, and all metals.
Happy Troller is the answer to correct trolling speed
A significant advancement in the sport of troll fishing, Happy Troller mounts on the anti-cavitation plate to allow fine control of trolling speed. Your boat’s stability is enhanced at cruising speed for a smoother ride in rough water, reduced porpoising and cavitation.

Use it year-round in all boating activities—great for use in both salt and fresh water
Made of highest quality stainless steel and marine aluminum, with clear anodized aluminum finish. Installs in 15 minutes with hardware included. Comes with full installation and operating instructions.

Two Models:
Large fits inboard/outboards plus all outboard motors 50 HP and larger.
Small fits outboards from 25 to 50 HP.

Large Happy Troller #460
$171.99
Small Happy Troller #461
$160.99

Two sizes fit all I/Os and outboard motors
Locks in “up” position for cruising, “down” for trolling, with middle position for ultimate trolling control!

A fisherman’s answer to correct trolling speed
- Fits all outboard motors up to and including 25 HP
- Locks “down” for trolling, “up” for cruising
- Made of highest quality polycarbonates with stainless steel hardware, included
- Comes with full installation and operating instructions

For motors above 25 HP see Happy Troller® products #460 and #461.

How Fish Seeker’s depth is controlled: Using a chart supplied with the product, attach your rod line snap swivel to a lettered hole and your leader snap swivel to a numbered hole. Release the amount of line specified, and Fish Seeker will dive to the desired depth.

#510 FISH SEEKER, chartreuse
$8.99
#511 FISH SEEKER, hot pink
#512 FISH SEEKER, clear

Great for SALMON, TROUT, STEELHEAD, WALLEYE, CRAPPIE and STRIPER.
Prop Sox are socks for your prop. They protect your expensive propellers from road kickback when towing. Reflective hot dots alert drivers following too closely behind. People walking by a boat on a trailer can be cut without Prop Sox in place. The bright, molded plastic socks simply slip over each propeller blade and are held in place with a rubber shock cord strap. For use on boats out of water only.

Motor Caddy securely attaches to outboards to provide a safe and secure handle for carrying, hoisting and lifting. Makes handling cumbersome motors safer, simpler. Sized to be quickly attached to most outboards from 2–15 horsepower. This unique design features a longer strap to fit 4-stroke motors and an added security strap for today’s streamlined engine cases. Made of UV resistant materials that will endure the marine environment for those who prefer a semi-permanent installation. Glass filled Nexus® nylon buckles insure easy installation and removal. May be installed with buckle on either side of the motor. The webbing is one continuous piece; pulling on one side will tension the other side. The self-centering handle serves as the lifting point for lanyards and hoists, or balanced lifting by hand.

STAINLESS STEEL HARDWARE

Polished 316 stainless steel stands up to the toughest marine and outdoor environments. Very competitive prices.

- **#2470 Carabiner.** Captive, 3/8" stock (10 mm) by 3½" long (10 cm). Safe working load 1200 lbs. (500 kg).
  - $21.99

- **#2480 Key Pin Halyard Shackle.** Captive, 5/16" stock (8 mm) by 3½" long (8 cm). SWL 1500 lbs. (700 kg).
  - $19.99

- **#2490 Wire Gate Snap.** 1/4" stock (6 mm) by 2½" long (6 cm). SWL 415 lbs. (188 kg).
  - $8.99

- **#2500 Wire Gate Snap.** 5/16" stock (8 mm) by 3½" long (8 cm). SWL 968 lbs. (438 kg).
  - $10.99

Prop Sox are socks for your prop. They protect your expensive propellers from road kickback when towing. Reflective hot dots alert drivers following too closely behind. People walking by a boat on a trailer can be cut without Prop Sox in place. The bright, molded plastic socks simply slip over each propeller blade and are held in place with a rubber shock cord strap. For use on boats out of water only.
Awareness of the rudder angle is a most important safety factor. This is especially true while moving in and out of your berth, drawing alongside another boat, picking up a skier, mooring, or any other “close call” situation. Davis’ Rudder Position Indicator gives instant visual reference of rudder angle. The pointer swings a full 30° with each revolution of the wheel. Mounts easily with its self-adhesive pad directly to your hub. Indicator is approximately 2” (5 cm) in diameter. Rugged, hermetically sealed, weatherproof and sunproof housing ensures long life. No cables, adjustments, or electricity required; gravity power makes it simple and service-free. Suitable for boats with mechanical and single station hydraulic steering systems.

**Avoid Veering—and Collisions!**

RUDDER POSITION INDICATOR

| #385 | Rudder Position Indicator | 011698 03850 3 | $32.99 |

Line Snubber helps reduce stress and wear on your lines and cleats. They’re available in 22” length (56 cm). Molded of highest quality rubber for years of service. Packaged in pairs. Sailors, fishermen and other boaters will find many uses for Line Snubber, from anchor snubbing to trailering. Using them on parallel lines maximizes their effectiveness. Sailors can use them to lash a tiller, tie down a halyard or rig a boom preventer. Snub docking lines and mooring ropes. Reduce shock on fishing lines, too. Line Snubbers will secure a dinghy in place or keep one steady while being towed. Protect your lines, cleats, boat components and surfaces from wear with Line Snubber.

| #1468 | Line Snubber 22, PAIR | 011698 00651 9 | $18.99 |

The Swim Stirrup provides safe, easy access to small boats for swimmers or water skiers. Durable, reliable design attaches to gunwales, transoms, or open bows.

- Perfect for rowboats, ski boats, dinghies, sailboats
- Adjustable length to fit your boat
- Complete hardware and instructions included
- Easy to install, easy to use—it even floats!

**The Safe Solution to a Slippery Situation**

| #1466 | Swim Stirrup | 011698 00649 6 | $28.99 |

NAVIGATION RULES

A Must for Safe Boating in an Easy to Use Format

#125 011698 01250 3

A proven navigation tool used by the U.S. Coast Guard, U.S. Power Squadrons, and U.S. Coast Guard Auxiliary. Navigation Rules feature U.S. Buoyage System, inland and international rules, right-of-way, lights, sound signals, and bridge signals. All presented in graphic summary and easy to read. Complete, precise, accurate.

INTERNATIONAL NAV RULES

The Latest Information Covering Oceans & Waterways of the World

#127 011698 01270 12

A comprehensive guide incorporating the International Maritime Buoyage System and COLREGS. Clarifies differences between Cardinal and Lateral buoyage systems and buoyage regions, key to reducing confusion and danger when entering unfamiliar waters or busy harbors. Complete details on right-of-way, sound signals, entering and clearing a foreign port, lights and day shapes, collision prevention procedures, signal flags.

WEATHER FORECASTING

Making Marine Forecasts Using Nature’s Own Signs

#131 011698 01310 4

Shows the use of wind direction, barometric pressure and cloud type to predict the weather. Includes full listing of radio weather stations for official broadcasts. Has key information on navigation in fog, hazardous wave and surf conditions, storm warnings, hurricane avoidance, and more! “Time tested method...easy to understand. This is a complete guide for becoming ‘weather wise.’”
—Ken Lilly Jr., CDR. NOAA (ret.), marine meteorologist

All cards feature:
• Full color both sides
• Punched for binder or bulkhead mounting
• Weatherproof high strength plastic
• Full 8½ x 11” (22 x 28 cm) size

U.S. Coast Guard Auxiliary

Quick Reference Cards were designed in close cooperation with the U.S. Coast Guard Auxiliary and U.S. Power Squadrons. They are standard equipment on many U.S. Coast Guard and state boating administration patrol boats.

U.S. Power Squadrons

COASTWISE PILOTING

It’s easy to forget the procedures and find yourself lost or in danger!

#126 011698 01260 2

All the piloting information you need at your fingertips: dead reckoning basics, true and magnetic compass relationships, position finding, estimating distance off, current and leeway corrections. Helpful hints on chart reading, preparations and checklists, fog navigation, and depth soundings without a fathometer. Includes time, speed & distance calculator, relative bearing gauge for distance off calculations, common chart symbols.

BOATING GUIDE

Small Craft Seamanship, Vital Boaters’ Safety Information

#128 011698 01280 0

Covers all the basic procedures and equipment. Includes predeparture check-list, recommended equipment & spare parts, fueling procedures, engine troubleshooting, radio use, trailering, launching, anchoring, water skiing hand signals. Gives rules of the U.S. Buoyage System and right-of-way. Helps in emergencies by covering distress signals, fire procedures, towing, weather warnings, first aid (hypothermia & CPR).

CELESTIAL NAVIGATION

Determine Location Using the Sun & Stars

#132 011698 01320 3

A simplified, yet complete, Celestial Navigation system. Makes it easy, proving that lengthy instruction is not necessary to master celestial navigation. Includes everything you need: sextant use and corrections, starfinder for 18 stars, data entry form and step-by-step sight reduction and plotting procedures. May be scored and separated; large portion fits in sextant case for quick reference and, small part acts as a waterproof data reduction card.
FSR is a unique stain absorbing gel that serves a variety of purposes both ashore and afloat. It’s ideal for removing oil, rust, exhaust, waterline and transom stains, yet it can also be used anywhere else fiberglass stains may crop up—shower stalls, furniture, etc. Use for removing road soil from trailered boats and recreational vehicles. Its non-abrasive quality means that it’s safe to use on white painted surfaces as well as on gel-coat. Requires no sanding or compounding. Simply apply with a brush, sponge or cloth. Wait a few minutes and then wipe off or rinse. USE ON SHOWERS AND SPAS, TOO.

- Great for exhaust and waterline stains
- Removes rust from stainless steel stanchions and railings
- Excellent for removing “rust bleeders” from hull or deck
- Removes road dirt from RVs and trailer boats
- Removes rust stains from clothing, sail cloth, and other fabrics
- Safe on white painted surfaces

Apply, wait a few minutes, rinse or wipe off. Waterline stains gone!

TIP Take FSR home to the kitchen to bleach and sanitize wooden cutting boards

Test a small area first to be sure FSR will not damage finish

#790 FSR

Quick Fist

Super Quick Fist

Tiller-Tamer

Cable Covers

### Quick Fist

**Standard Quick Fist** is ideal for stowing or transporting tools. Can also be used as a pipe stand-off (do not use on exhaust pipes). Mounts easily with one #10 (5 mm) bolt or screw (not included). Can be mounted with strap facing any direction. To clamp, pull strap through jaw and lock into place. Sold in pairs. Multiple Quick Fists can hold larger tools.

- Holds objects from 7/8–2 1/4" in diameter (22–57 mm)
- Each clamp supports approximately 22 lbs. (10 kg)

### Super Quick Fist

**Super Quick Fist** is ideal for holding fire extinguishers, oxygen cylinders, CO2 tanks, and other equipment. Mounts easily with three #10 (5 mm) bolts or screws (not included). Can be mounted with strap facing any direction. To clamp, pull strap through jaw and lock into place. Strap can be trimmed off for neat installation.

- Holds objects from 2 1/2–7 1/2" in diameter (64–191 mm)
- Each clamp supports approximately 50 lbs. (23 kg)

### Tiller-Tamer

*Tiller-Tamer* maintains cruising course with no hands, in any weather or wind conditions. The tension is smoothly adjustable from fully locked to fully free. Tiller-Tamer gives improved control and feel to the tiller handle. Does not interfere with automatic steering systems. No loss of cockpit space. No need to lash the tiller when boat is moored or trailered. Equally adaptable to inboard rudder tillers, too!

### Cable Covers

**Spread end of cable cover and snap over cable**

- Keep sails clean, prevent wear
- Slit along covers for quick “snap-on”
- Tough, durable plastic with more ultraviolet absorber than other brands—last longer!

### CABLE COVERS

A pocket-sized tool perfect for all outdoor activities, including boating. This deck plate key with an attitude is a serious tool for serious use outdoors:

**Fishing**  **Climbing**  **Biking**  **Sailing**  **Hiking**  **Boating**  **Camping**  **Tailgating**  **RV**

19 tools in one! The button snap and zipper pull features make working with canvas a “snap” instead of a chore. And this is a deck plate key that fits most deck plate caps. It’s also a pocket-sized hex wrench and screwdriver with both slot and Phillips heads. The cutting blade is designed to cut fishing line and small cord—and the shackle key works on stainless or galvanized pin shackles. Made of corrosion resistant stainless steel, it’s both thicker and stronger than other inexpensive deck keys—all at an affordable price. At five o’clock this new Snap Tool Multi-Key is ready to become your best friend!

#382 Snap Tool • Multi-Key
2.75 x 4.48” (7.0 x 11.4 cm)
Unit weight 2.8 oz. (80 g)

**HANDY • UNIVERSAL • STAINLESS STEEL • STRONG**

**MANY FEATURES**

- 7 hex wrenches
- 3 deck plate keys
- 2 screwdrivers
- 2 button snap tools
- 1 scraper
- 1 cutting edge
- 1 zipper pull
- 1 shackle tool
- 1 bottle opener

Fits all these deck caps

- Hook used to pull ring
- Screwdriver
- Shackle key

**Canvas shrinks, button snaps corrode—no problem!**

**Weathered zippers are hard to pull—not anymore!**

Constructed of specially hardened stainless steel. **Will not corrode or break…ever!**

**TIP** Attach a Key Buoy self-inflating key ring #530 to Snap Tool • Multi-Key to avoid losing your favorite tool in the water!

**Deck Plate Key**
Fits most caps: water, fuel, waste

**Un-Snap Canvas Snaps**
Handling button snaps made easy, especially on shrunken canvas or corroded snaps

**Snap Canvas Snaps**

**Zipper Puller**
Tames stiff, sticky or oxidized zippers

**Cutting Tool**
Fishing line, paracord, webbing, cardboard boxes, emergency use

**Hex Wrench**
Popular sizes: 5/16, 3/8, 7/16, and 1/2 inch—plus 8 mm, 10 mm and 13 mm

**Screwdrivers**
Both Phillips and slot

**Scraper**
Removes labels, tape, dry paint

**Pin Shackle Key**
Tightens or loosens pins on most galvanized anchor shackles and stainless steel pin shackles

**Bottle Opener**
Enough said!
**The rotation of Turbo Meter's freely turning turbine, suspended on sapphire jewel bearings, is sensed by an infrared light beam.** The resulting signal is processed electronically. The display has been made larger, brighter for excellent viewing in full sun or dark conditions. Auto Power-Off.

**Compact size (2.6 × 4.7 × 1.2”, 7 × 12 × 3 cm) and lightweight (3 oz., 85 g). Wrist lanyard, protective case included.**

- Responds to Lightest Winds
- Four Scales
- Easy to Read Day or Night
- Weather and Shock Resistant

**Electronically wind speed indicator**

For intermittent use only above 12 MPH (1000 FPM). Requires 3 AAA alkaline batteries (not included). Redesigned for even longer battery life.

**#271 TURBO METER**

**$176.99**

**Turbo Meter is useful in many fields:**

- Yachting
- Boating
- Windsurfing
- Aviation
- Sky Diving
- Hang Gliding
- Hot Air Ballooning
- Track & Field Events
- Skiing
- Mountaineering
- Archery
- Shooting
- Model Flying and Sailing
- Kite Flying
- Meteorology
- Air Flow Testing
- Crop Dusting
- Ventilation
- Wind Sensitive Construction and Spraying
- Anywhere wind is a factor

**When it's time to lower your sail, you can rely on Davis' SAIL TRACK STOPS to hold your sail and its slides in place on the mast and boom. Large knurled wheels are released with ease. Made of heavy-duty, black anodized aluminum and marine grade nickel plated brass. Flat stops come with lanyard holes.**

**#2350 ROUND**

**.50” dia. × .875” (13 × 22 mm)**

**$10.99**

**#2351 FLAT**

**.75 x 1 x .125” (19 x 25 x 3 mm)**

**$10.99**
Say Goodbye to Mold, Mildew and Moisture

Air-Dryr is a silent, inexpensive and effective way to combat moisture, cold drafts and corrosion. Designed to operate anywhere continuously 24 hours a day—just plug it into any 110/120 volt outlet and leave it on. It works best when placed low on the floor of any damp, enclosed space allowing Air-Dryr to draw in cool, moist air. The damp air is gently heated to the point where moisture is held in suspension (above the dew point), then released through the top vents of the device. As warm air rises, more damp air is drawn into the unit, where it too is heated. The resulting natural convection circulates the air and prevents moisture from settling. In a perfect situation, ventilation will remove the moisture laden air, replacing it with drier air.

Air-Dryr fights humidity with a different and simpler approach than dehumidifiers or chemicals that sometimes empty liquids into a sink (or onto the floor when spilled!). Silent, energy efficient operation costs no more to use than a single incandescent light bulb. Designed with a thermal cut-off switch to turn Air-Dryr off if air flow is impeded.

No switches or thermostats to set. Just plug it in and enjoy the results.

Features of both Air-Dryr models:
- Attractive, neutral beige housing made of polycarbonate for strength and durability
- Slim and stable; can be placed out of the way in confined spaces
- Handle a high volume of air
- Low operating cost; designed to be left on 24 hours a day
- Silent in operation, safe to the touch
- Trouble free—no switch, fan, or thermostat
- Safe for marine use—no components which cause sparking
- Air-Dryr is equipped with a THERMAL CUTOFF to prevent overheating due to blocked vent holes, but continued caution is advised.

Use at Home or Office
Basements, closets, under desks, storage units, tack rooms, pump rooms, gun cabinets, pianos

Use in RVs and Airplanes
Motor homes, trailers, cars, aircraft

Use in Boats
Cabins, bilges, engine rooms, V-berths

Listed

CAUTION: To prevent fire or damage to the unit, do not block vent holes. Keep out of water to avoid electrical shock. Do not touch hot surfaces. Unplug and allow the unit to cool before cleaning or storing. Do not place on or near a hot gas or electric burner, or in an oven.

Two models

#1459 Air-Dryr 500  Handles up to 500 cubic feet of living space (14.2 cubic meters). Draws only 0.6 amps, 70 watts. Rectangular unit measures 13.5 × 5.5 × 4.25” high (34 × 14 × 11 cm high).

$65.99

#1458 Air-Dryr 1000  Handles up to 1000 cubic feet of living space (28.3 cubic meters). Draws only 1.1 amps, 130 watts. Circular unit measures 13.5” in diameter, 4.25” high (34 cm dia., 11 cm high).

$84.99
ECHOMASTER

Ranked One of the World’s Best Radar Reflectors!

Giving ships a chance to see you in fog and low visibility conditions is a must for serious boaters.

ECHOMASTER’s full 12.5” (32 cm) diameter circular reflector plates provide 13.2 square yards (12 sq. meters) of maximum effective radar cross section in the X or 3 cm band (9–9.6 GHz frequency), based on optimum orientation between the reflector and radar. Offers equivalent radar cross section of a conventional triangular plate reflector with approximate 17” (43 cm) diagonal dimension.

Robust, marine-grade aluminum plates are sufficient thickness to minimize flexing; dimpled to minimize angular distortion. Tough injection-molded, captive corner latches assure minimum angle error. The 11/4” (32 mm) windage holes reduce aerodynamic drag and allow assembly of the reflector around a backstay. Easily assembled or demounted. Stows flat.

ECHOMASTER with Marine-Grade Aluminum Plates
12 square meters of radar cross section. Plates are made of sturdy, stamped 1.3 mm thick aluminum with riveted nylon corner latches for quick assembly or disassembly. Install around a backstay using corner blocks from #156 Mount System, or make your own hanging bridle as described in the 16-page Radar Reflector Booklet included with Echomaster.

#152
011698 01520 7
$9699

HANGING MOUNT SYSTEM (no reflector)
Use the hanging mount system to suspend your Echomaster unit from a mast or rigging in the perfect “catch rain” position.

#156
011698 01560 3
$1699

Echomaster’s proven superiority:
• Ranked one of the best radar reflectors and one of the top ten sailing products by Practical Sailor.
• Rated “superior” by SRI after the most rigorous tests ever conducted on radar reflectors, some costing 10 times as much.
• Performance diagrams from the Admiralty weapons test, England, showed Echomaster’s high response to incoming radar at all angles:

Make your boat visible to other vessels.
Find your way home in less than perfect conditions. Mount a radar reflector on a buoy or piling to help identify your dock or mooring.
Mark hazards to navigation to supplement official channel markings. Install radar reflectors on specific hazards—bridges, rocks, submerged trees, sunken boats.

To SURFACE MOUNT an Echomaster, use the corner blocks from the #156 Hanging Mount System with five pipe fittings commonly found in hardware stores.

To order the Radar Reflector Booklet separately, contact customer service and ask for #R155E ($3.00).

Radar Reflector

Excellent as a back-up aboard larger vessels or primary reflector on smaller boats that might not normally carry a radar reflector. Made of plastic-metal foil laminate. Opens in seconds and is very lightweight. 11.5” (29 cm) in diameter. Performs almost as well as Echomaster (see performance diagrams above). Economical enough for any boat. Stows flat.

#151
Emergency Radar Reflector
011698 01510 8
$3299

Echomaster meets U.S. Coast Guard requirements for lifeboat and liferaft radar reflectors under SOLAS 74/83.

To order the Radar Reflector Booklet separately, contact customer service and ask for #R155E ($3.00).
**RIGGING KNIFE**

*High Quality, Sensibly Priced*

The Davis Deluxe Rigging Knife is made entirely of top quality stainless steel, with dura-edged blade. This tool features a marlin spike, slot head screwdriver, shackle key and a stainless steel loop to attach a lanyard. This is a sturdy, quality knife that a yachtsman will be proud to own—at an affordable, go-to price.

**Tough • Versatile • Sensitive**

*Black Max* is a versatile, high performance wind direction indicator that attaches quickly to masts and booms on most small boats such as Lasers and Sunfish. The tough, high impact plastic vane is designed to withstand years of punishment and the abuse of small boat sailing. The stainless steel mounting arm and set screw, as well as a tough plastic mounting base, add to the system’s durability. Wind vane length 8” (20 cm).

**Designed especially for catamarans, the Davis Telo-Cat is durable and highly visible. Installs on the headstay bridle in seconds; easily removed for trailering (no tools required). Comes complete with high visibility 8” (20 cm) vane, adjustable tacking arms, and mounting hardware to fit most catamarans. Made of high impact plastic with a stainless steel shaft and tacking arms. The vane rides on a super sensitive nylon bearing system for extreme accuracy in light or heavy weather. Highly visible markings. Adjustable reference arms. Telo-Cat can take the abuse of catamaran sailing.**

Wind vane length 8” (20 cm).

| #1450 Telo-Cat | $55.99 |
| #1452 Extra Vane | $15.99 |

**Sail on the Edge!**

*Black Max attached to a boom*

*Black Max comes in its own unbreakable protective storage tube.*
**WindTrak**

WindTrak wind vanes are well-suited for boats from 15–100 feet and above (4.6 to 30 meters). Every WindTrak features a sapphire jewel suspension bearing, vane with a large fin and low inertia, and an easy-to-read, fully adjustable tacking tab system. Reflective tape on the vane and tabs makes WindTrak highly visible in low levels of light—easy to see at night.

WindTrak vanes are sturdy and durable, wind-tunnel tested to wind speeds of 80 knots! Installed properly, they offer many years of hassle-free use. WindTrak is the standard of quality in the sailing industry.

All sailors appreciate the accurate sensitivity, time-tested durability, and best value that WindTrak provides. Next time you’re on the water, look up and see what most sailors choose!

- Sapphire jewel suspension bearing
- Large fin, low inertia vane molded of highly UV resistant plastic
- Adjustable tacking tabs
- Clearly visible reflectors on the tacking tabs and vane
- Optional LED WindTrak Light (#3200) for viewing at night

No other wind vane in the world is more sensitive to super light air and small puffs—or more responsive when breeze picks up.

---

### For Small Boats and Dinghies

Sapphire suspension bearing, 10” vane (25 cm) and adjustable tacking arms with tabs. Vane and tabs feature reflectors for high visibility day and night. Includes glass reinforced polycarbonate J-Base for side, top or front of mast mounting on most dinghies, smaller boats and sport boats. Stands just 9.25” (23.5 cm) tall and weighs 1.2 ounces (31 g).

- **#3120** WindTrak 10 $39.99
- **#3101** Spare Vane only $21.99

### WindTrak 10’s J-Base allows mounting on side, top, or front of mast.

---

### The Choice for Most Sailors

Sapphire suspension bearing, 15” vane (38 cm) and adjustable tacking arms with tabs. Vane and tabs feature reflectors for high visibility day and night. Through-bolt or drill & tap mounting socket; 5/16”-18 stainless stud, washers and nut included. WindTrak 15 weighs just 3.9 ounces (111 g). Stands 12.75” (32 cm) tall. Bird-proof spike extends above vane to keep birds off your mast. Optional WindTrak Light #3200.

- **#3150** WindTrak 15 $59.99
- **#3151** Spare Vane only $32.99

---

TIP Sailors concerned with weight aloft can shorten the bird-proof spike.

The J-Base can be purchased separately for WindTrak 15 (#3155).
**Some tips for using your WindTrak:**

- Always assemble your WindTrak with Locotite® or use silicone seal on the threads to eliminate the possibility of the unit unscrewing in use from vibration.
- Prior to unstepping your mast, take your WindTrak down first. Periodically check the assembly screws holding your WindTrak together.
- Spare parts can be ordered from your local dealer or from Davis; identify which model you have before calling.
- Lubrication is never needed, but years of salt or dirt build-up should be rinsed off with fresh water occasionally.
- Use our Universal Masthead Mount, #1705, for installations requiring more room at the masthead. This mount extends WindTrak away from the masthead up to 12 inches (30 cm).
- Add a WindTrak LED Light, #3200, for nighttime sailing.

**WindTrak AV™** installs onto most whip antennas, including Metz™ and Shakespeare™ brands, with a whip diameter less than 1/8” (3 mm). Combine two installations into one to reduce masthead clutter, weight and windage aloft. Rides on low-friction Teflon™ bearings. Complete with 15” (38 cm) vane, reflective tacking arms, hardware and instructions for easy installation. Antenna not included.

- #3160 WindTrak AV     011698 31600 7
  - $41.99
- #3161 Spare Vane only  011698 31610 6
  - $29.99

**WindTrak LED Light**

Light up the reflector tabs and vane on your WindTrak for easy viewing at night with LED WindTrak Light. Waterproof and non-corroding silver parts give long-life light at less than 100 ma current draw. Fits under WindTrak 15, WindTrak 10 or J-Base™ mounting socket.

- #3200 WindTrak LED Light  011698 32000 4
  - $29.99

**J-Base™ Versatile Mount for WindTrak 15 and WindTrak 10**

Standard with WindTrak 10, the J-Base can be ordered as an option for WindTrak 15. Allows for side, top or front mounting on most masts, on big boats or dinghies alike. J-Base is made of glass filled polycarbonate, 2” (5 cm) long. Includes stainless steel set screw and two #10 self-tapping screws. Reduces overall weight by 15 grams when substituted for standard WindTrak 15 mounting base.

- #3155 J-Base for WindTrak 15  011698 00195 8
  - $9.99
- #3125 J-Base for WindTrak 10  011698 00194 1
  - $9.99

**Universal Masthead Mount**

Extend your WindTrak 10 or WindTrak 15 vane away from masthead obstructions and turbulence. The 13” (33 cm) arm comes with hardware allowing side or top mounting and offset angles up to ±20 degrees. May be attached securely to flat, curved, vertical, horizontal, or inclined surfaces. Gain space aloft and improve mounting position of wind finders and other equipment. Mount on the back of the mast for easier viewing from the cockpit. The mount adapts to virtually every masthead situation.

- #1705 Universal Masthead Mount  011698 17050 0
  - $32.99
The Spar-Fly combines needle bearing balance, high impact plastic, and marine grade metals for unsurpassed sensitivity and durability. Spoiler holes in the vane reduce lift and increase accuracy. Spar-Fly is unaffected by angle of heel. Easily seen from the deck because of its V-shaped silhouette and bright red color. Weighs only 1.25 oz. (35 grams).

**#1310 Spar-Fly**

$32.99

**#1311 Extra Spar-Fly Vane**

$8.59

---

**Olympic**

For boats 13–20 ft. (4–6 m). Dimensions 9 × 9” (23 × 23 cm). Weight 0.5 oz. (14 g). Handmade of 3D carbon and duraluminum. J-base included for side, top or front of mast mounting.

**#3184**

$64.99

---

**Horizontal**

For Laser, Melges 14, Optimist, Finn and Sabot. Dimensions 12 × 7.8” (30 × 20 cm). Weight 0.8 oz. (23 g). Handmade of 3D carbon and duraluminum. Adjustable mast clamp.

**#3188**

$64.99

---

**Air-Flow Tels™**

Lightweight, ripstop nylon Air-Flow Tels attach to sails with waterproof adhesive locator discs. No holes required. Tels show the air flow across the sails, allowing you to trim sails for maximum performance. Each kit includes 14 Tels and full instructions on where to apply them and how to read them.

**#950 14 TELS**

$8.59

---

**Wind-Tels™**

Utilizing port and starboard colored plastic vanes, Wind-Tels are ideal for saltwater sailing. The unique method of attachment prevents sliding or fouling of your Wind-Tels on the shrouds. Effective at any angle of heel in the lightest winds. Marine grade metal parts for durability.

**WIND-TELS™**

Fit All Shroud Sizes

Utilizing port and starboard colored plastic vanes, Wind-Tels are ideal for saltwater sailing. The unique method of attachment prevents sliding or fouling of your Wind-Tels on the shrouds. Effective at any angle of heel in the lightest winds. Marine grade metal parts for durability.

**#1260 Wind-Tels, 2 Pack**

$41.99

**#1261 Extra Wind-Tel Set**

$7.99

---

**The Original SPAR-FLY™**

America’s Most Popular Wind Indicator!

The Spar-Fly combines needle bearing balance, high impact plastic, and marine grade metals for unsurpassed sensitivity and durability. Spoiler holes in the vane reduce lift and increase accuracy. Spar-Fly is unaffected by angle of heel. Easily seen from the deck because of its V-shaped silhouette and bright red color. Weighs only 1.25 oz. (35 grams).

**#1310 Spar-Fly**

$32.99

**#1311 Extra Spar-Fly Vane**

$8.59

---

**J-BASE is standard with Olympic and Sport Boat**

---

**3D Carbon sheet, strong and lightweight, and super responsive to wind shift. Duraluminum hard-coat anodizing for long lasting cosmetic wear.**
HAND BEARING COMPASS

- Sailboat racing
- Cruising
- Sailing schools
- Navigation classes
- Camping, hiking
- Fishing

Using this precision marine hand bearing compass, you can easily obtain quick magnetic bearings on shore or floating objects. Simply align front and rear sights on an object and read off bearing. Uses include quick bearing or position set, determination of angular gain or loss on the competition while racing, checking distance offshore, establishing lee-bow set while cruising or racing in currents, drift vectoring and plotting a line of position.

The stable, liquid-damped compass card is graduated in 5° segments, with bold graduations every 15° for easy reading. Solid-state LED illumination system floods the compass and sight vane with soft light. The LED will last for the lifetime of the compass.

Average LED “half-life” is approximately 10 years if operated continuously.

Instrument is lightweight, made of high impact plastic. Large, contoured handle designed for sure, steady grip and angled forward for added control. Positive “push-on” switching action, with vinyl boot water protection. Lanyard included. Battery housing has high watertight integrity. Batteries included. Complete instructions.

Never Worry about Power Consumption Again!

PARALLEL RULES
The most basic course plotting instrument

Mega-Lights come with two easy-to-change light bulbs. LED bulb draws less than 23 milliamps (1/50 amp). Lasts up to 10,000 hours. #1893 incandescent bulb provides “soft” lighting; draws 320 milliamps (0.32 amp). Mega-Lights include a light sensor that automatically switches the light on at night and off at dawn. Fresnel lens projects light for up to two nautical miles (3.7 km). 100% waterproof O-ring seal.

Masthead model features a stainless steel mounting bracket. Comes with 12" (30 cm) lead wire. On-off switch and fuse holder for hard-wire installation not included.
