STREETLIGHTS

PARKING & WAREHOUSES

Create a safer and greener environment with LED lighting for your parking garages and warehouses. Great lighting is essential to delivering a positive user experience. We help people feel safer and drivers feel more in control by our bright, uniform illumination of LED lighting. This diminishes shadows and improves visibility. All products are easy to install and have low maintenance, ensuring energy savings and decreasing operational costs. We aim to create a safe and cost-effective sustainable solution for your parking garages and warehouses.

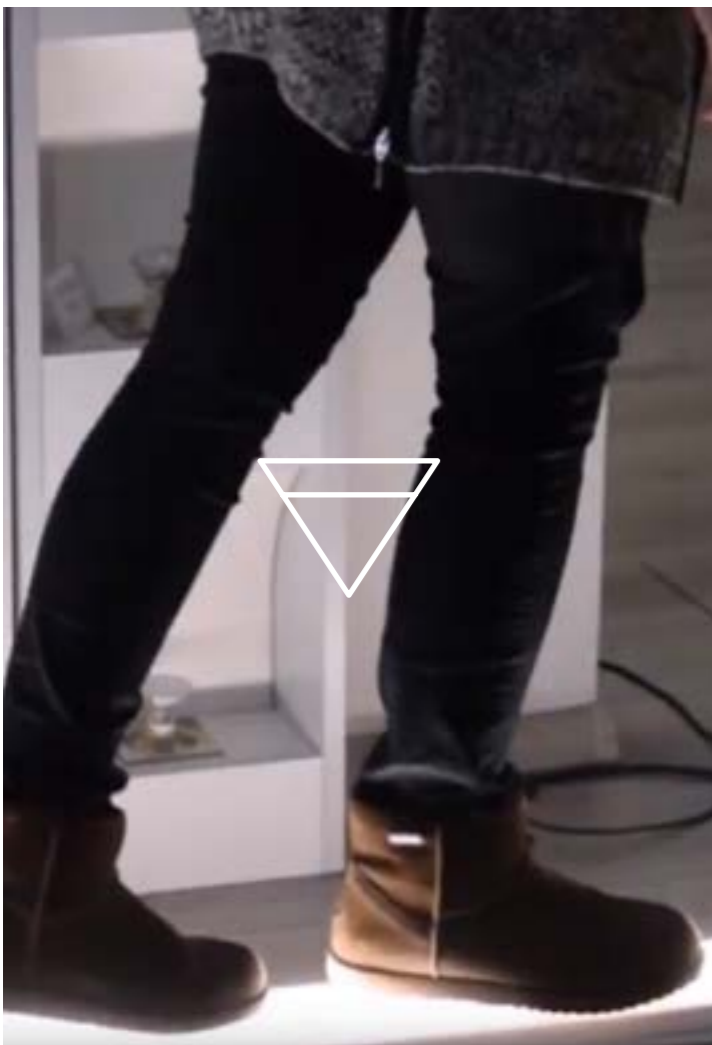

REZISTA PRO

TOUGH, TOUGHER, TOUGHEST

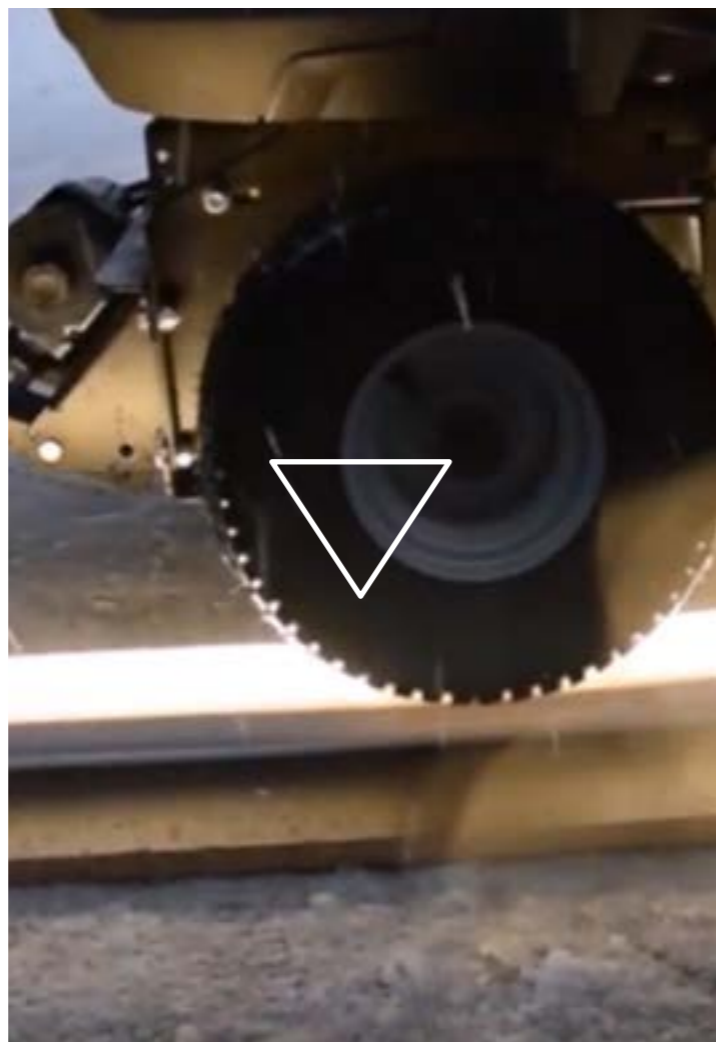

Jibe was among the first manufacturers who started innovations within tri-proof lights. The Rezista is made of a PC diffuser and aluminium body, which make it waterproof, dustproof, vaporproof and impact resistant. It is highly efficient while ensuring that everything is well lit. Available in 0-10v, triac, Dali and with motion sensors. The Rezista is ideal for a long list of places, from parking garages and corridors to supermarkets and airports.

- 130 - 150 lumen per watt
- IP65
- IK10
- Quick snap end-caps
- Dimmable
- 23", 47" & 59" inches

WORKING WITH THE ELEMENTS

ALL REZISTAS ARE HEAT, WATER,
SHOCK AND TEMPERATURE-PROOF

REZISTA PLANUS

THE LATEST TECHNOLOGY IN TRI-PROOF LIGHTING

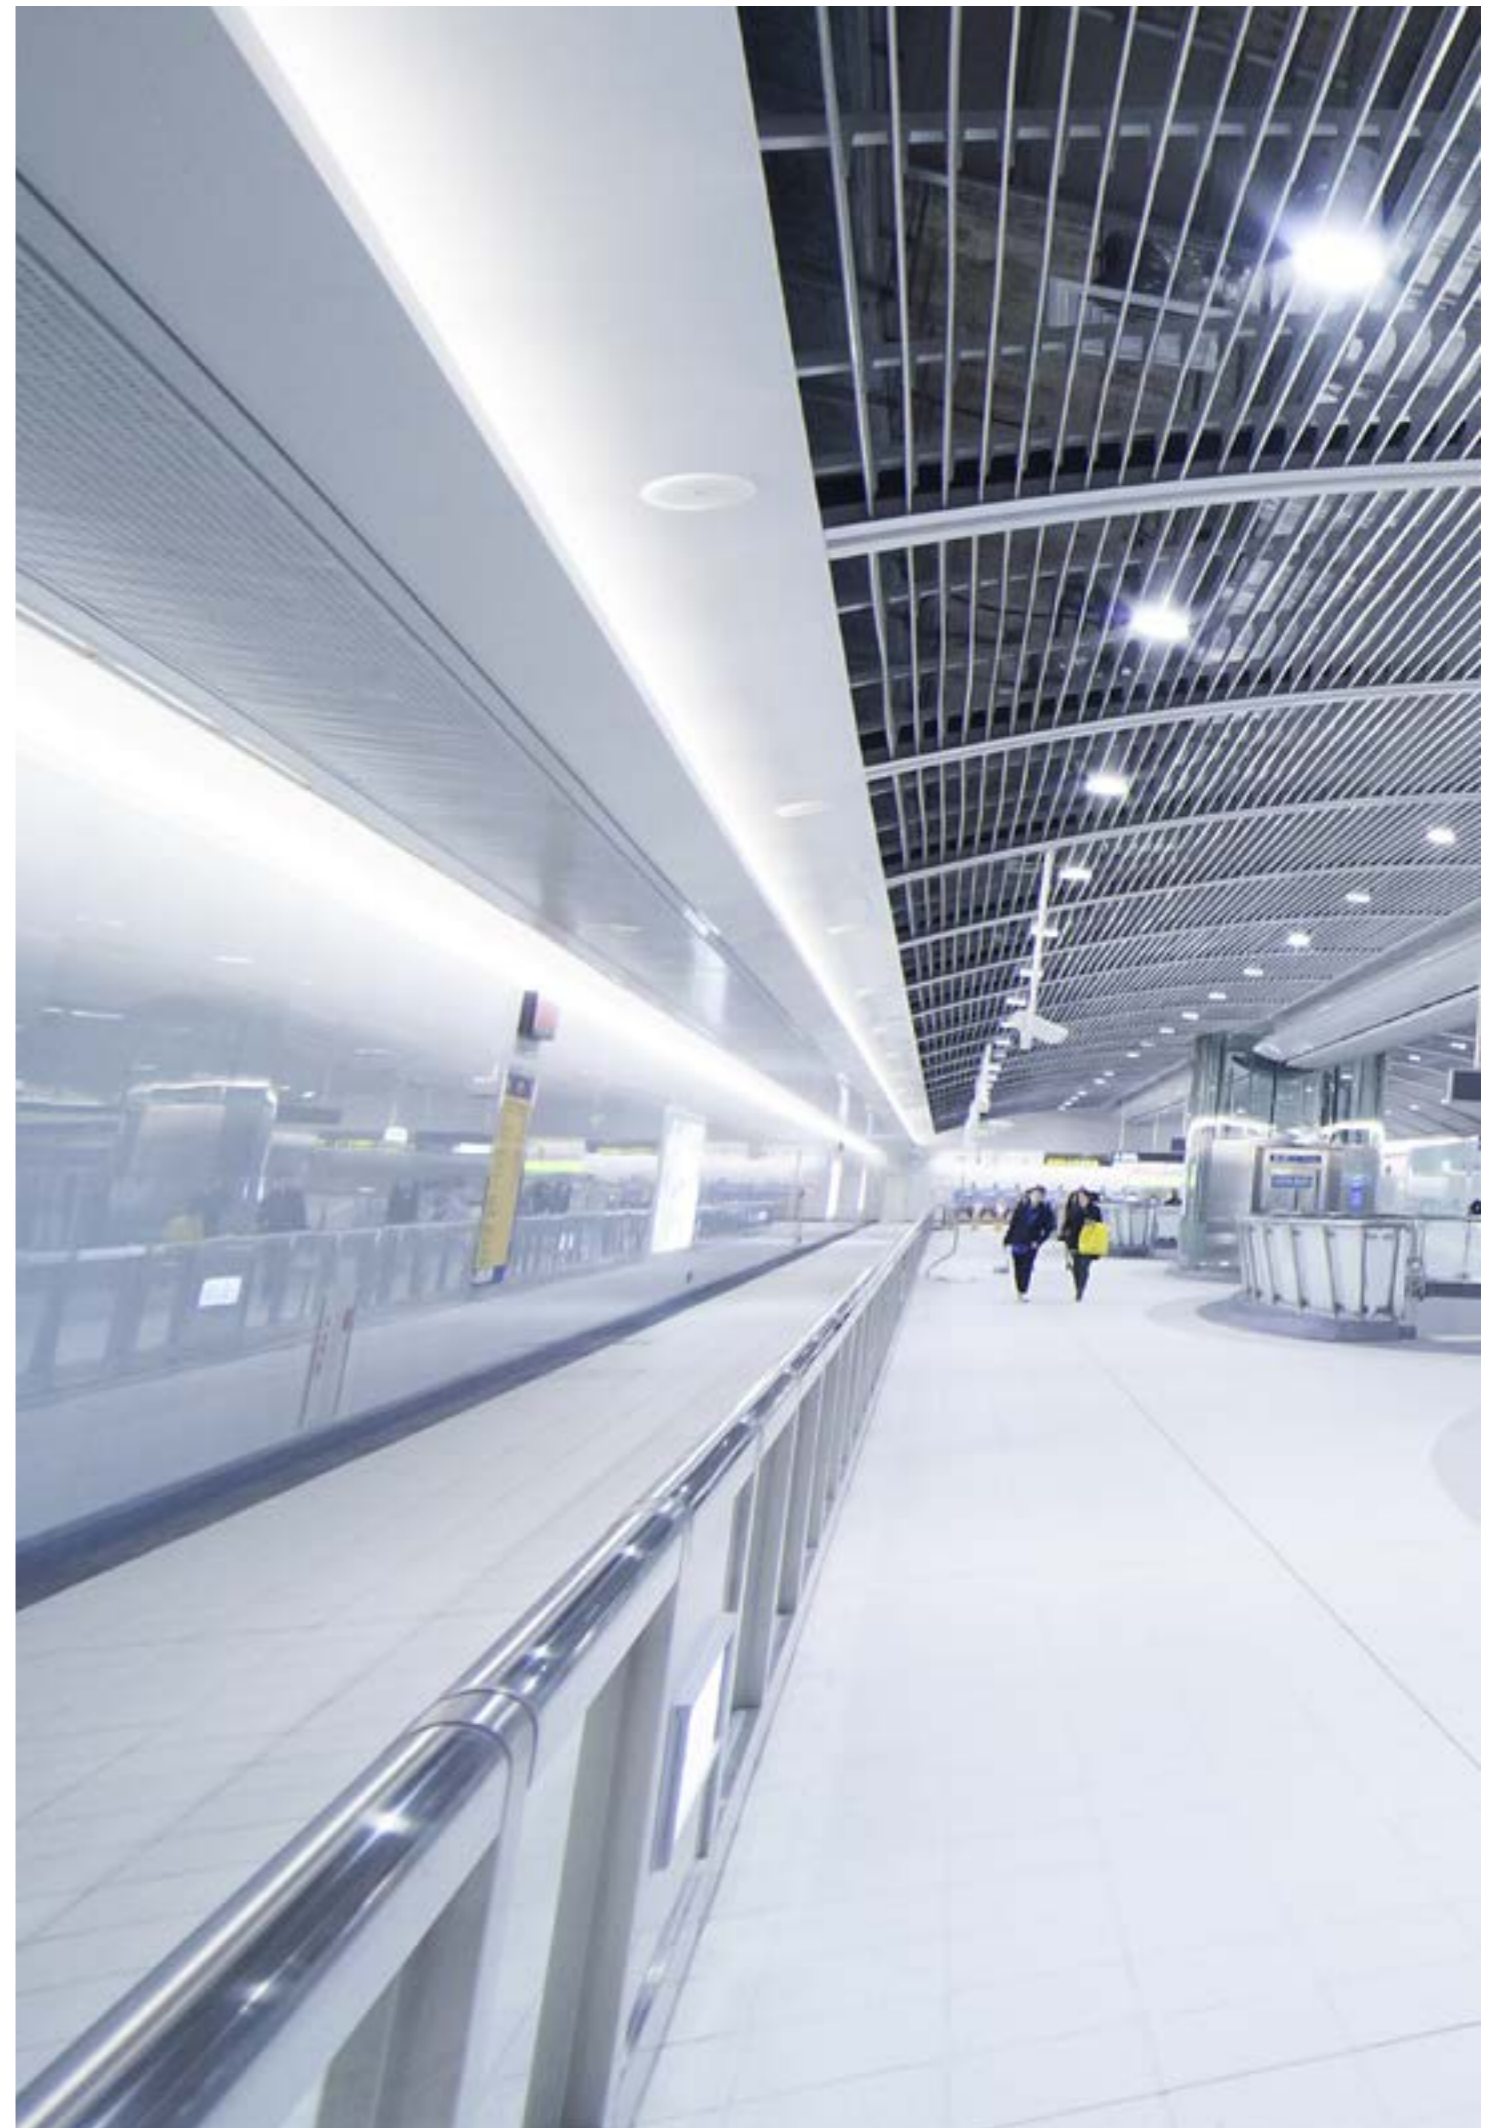

The ultra slim design of 30mm height has been achieved with special lenses placed over the LEDs, enabling the diffuser plate to be closer to the LEDs, making the entire fixture the slimmest of its kind. With its translucent water- and dustproof endcaps, seamless pendant connections can be made with no visible gaps. The Rezista Planus can hang as a standalone lamp or can be connected to countless others creating long lines of light.

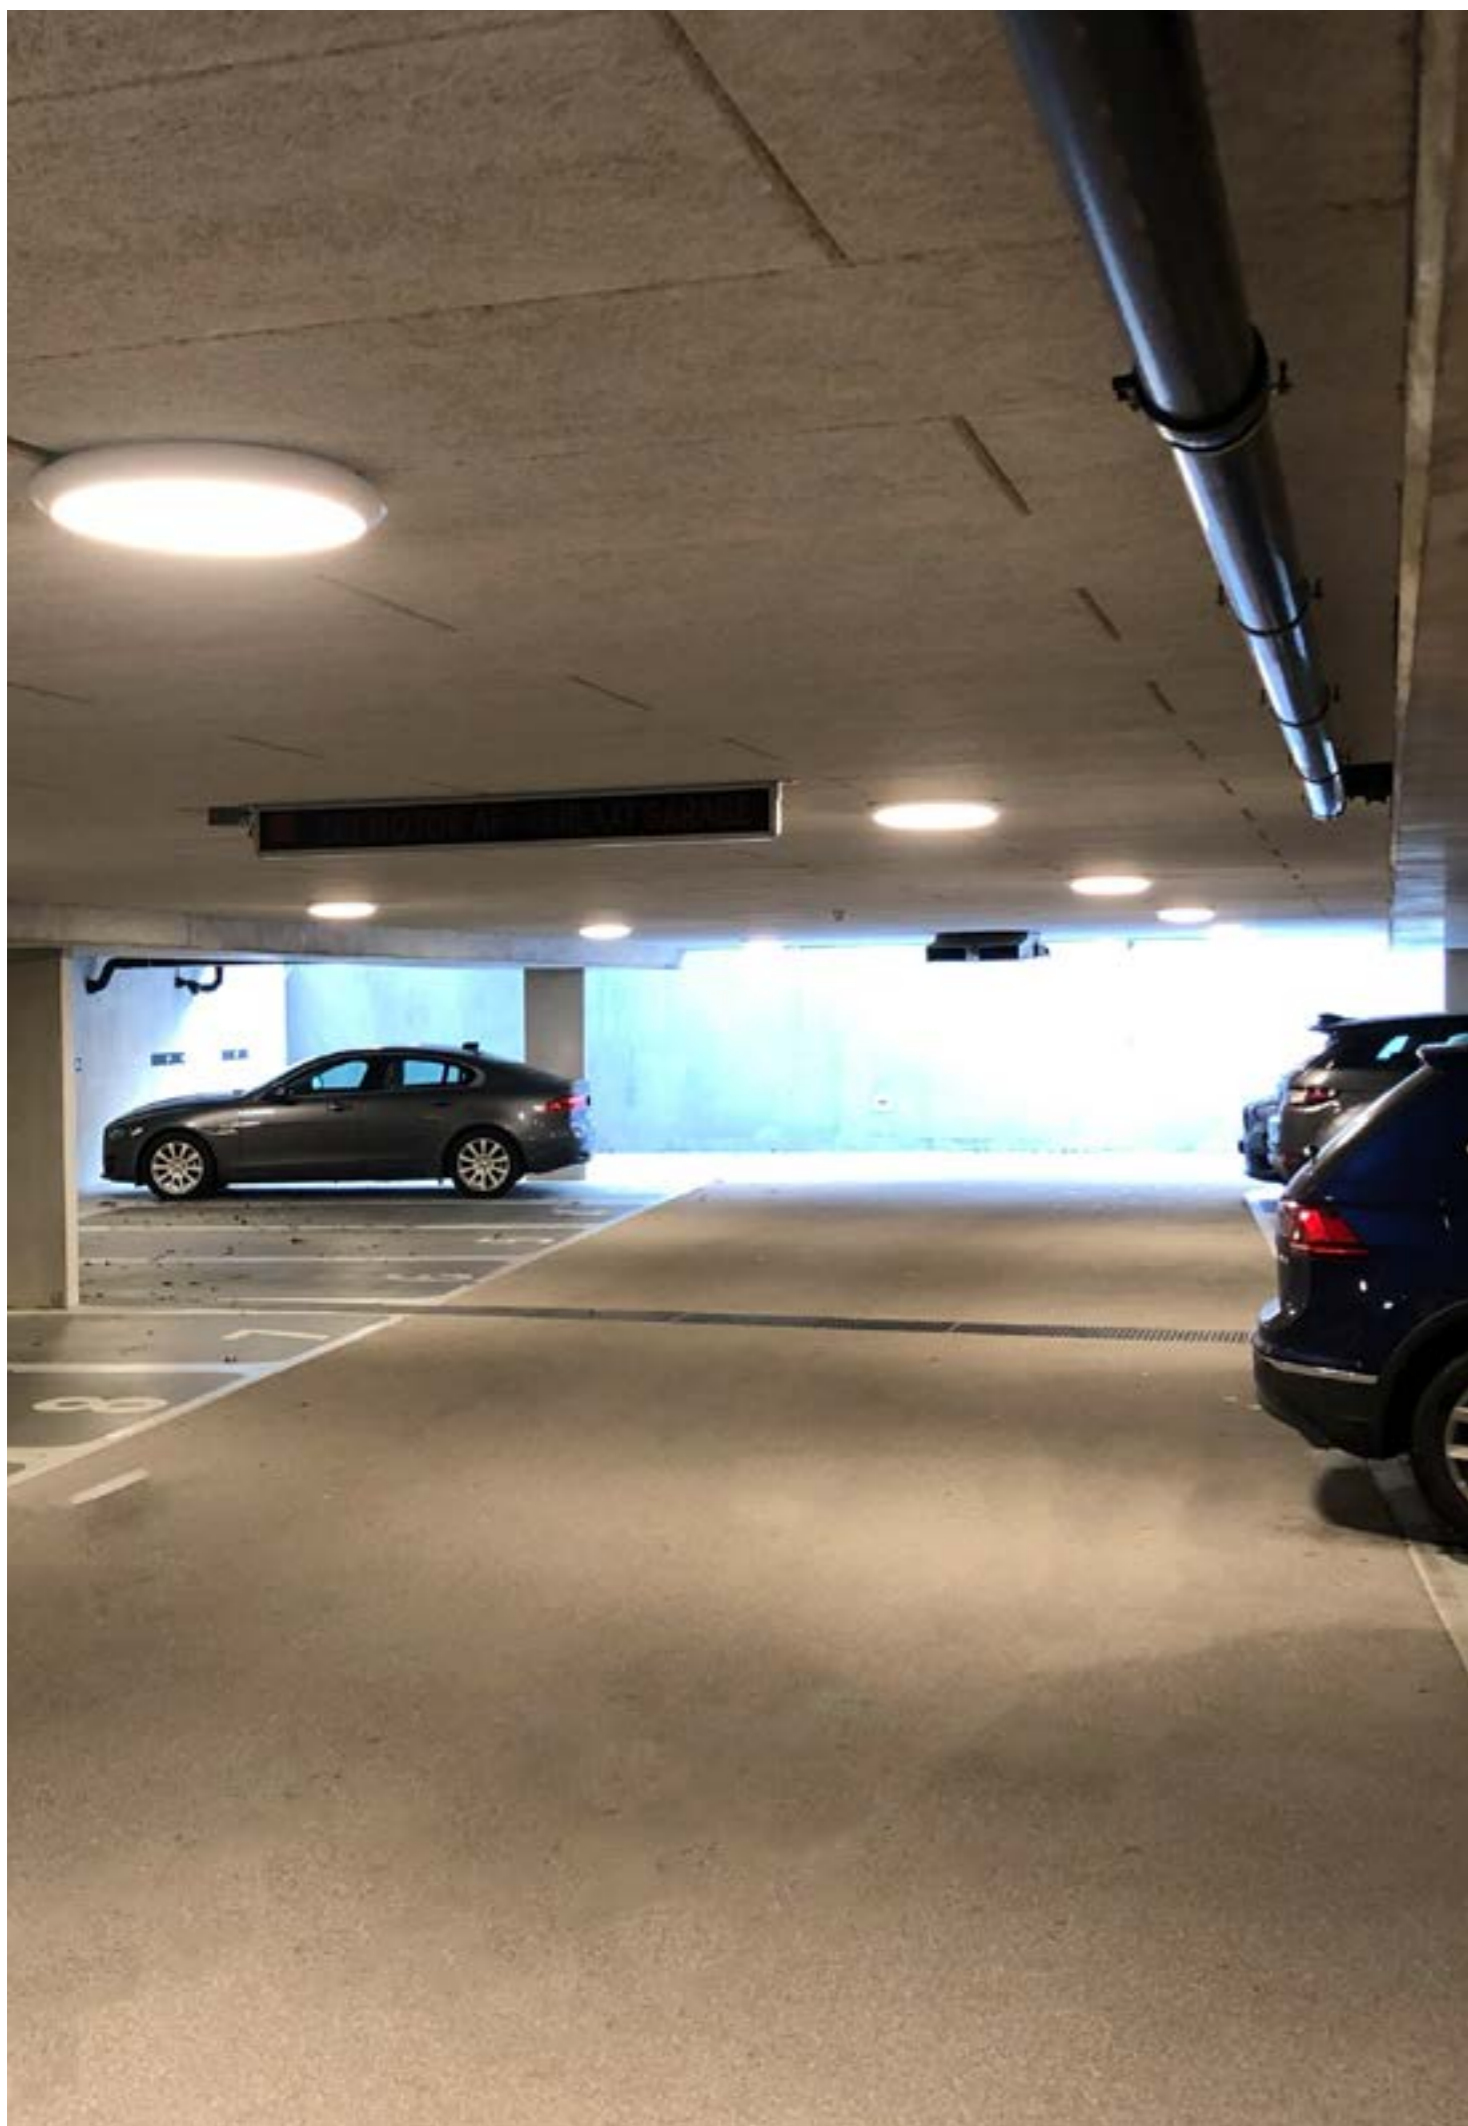

- 130 lumen per watt
- IP65
- IKo8
- Seamless connection
- Dali dimmable
- 59", 83" & 106" inches

SEAMLESS CONNECTIONS

The Rezista Planus has a pendant way of installation. The metal clamps can be positioned at any position, giving the installer freedom of installation. The metal clamps are extra secured by a horizontal shoulder bolt. The seamless connection of the 2 fixtures is done by 2 metal plates and secured by 8 screws.

REZISTA RONDO

DESIGN AND FUNCTION

The Rezista Rondo has been designed for parking garages, offices, supermarkets, shops, schools and hotels. With its IP65 waterproof rating, it can be mounted in harsh and moist environments. Being round, design and functionality go hand in hand. With its quick terminal blocks and detachable ring and diffuser cover, installation is a walk in the park. Maintenance is easy because of its replaceable components like driver and LED PCB. For smart parking garages, extras can be added like movement detection sensor, emergency battery backup and a dimmable driver. With dipswitches, the color temperature can be pre-set at 3000K, 4000K or 5500K.

- 100 lumen per watt
- IP65
- IK10
- Triac, 0-10V and Dali dimmable
- Diameter: 10" , 12" , 16" and 20".

THE UFO II

The HI FLOOD II is a Hi-Bay suspended ceiling light designed for high ceilings such as warehouses. It utilizes the latest HV LEDs from Lumileds and does not require a LED driver. The light output reaches over 140 lumen per watt with almost no flicker. It's sturdy housing with black coating guarantees you many years of maintenance free operation.

The Floodlights are suitable replacements for floodlight luminaires with halogen lamps with an

energy savings potential of up to 90% compared to the conventional light technology. They are waterproof (IP65) and have a shock resistance.

THE HIGH FLOOD

The outdoor luminaires have a housing made of aluminum or plastic. They are characterized by a very homogenous light distribution, a tempered glass cover to reduce glare and their weight and size optimized design.

UFO

FLOODLIGHT

OFFICE

We designed our lighting to enhance employee productivity and well-being, while increasing operational efficiency, energy savings and space utilization. It supports you in reaching sustainability goals, and employee well-being. Our intelligent lighting is the perfect backbone for smart-buildings. All our products are future proof and can help you transition into the new data-driven era.

PIATTO PANEL

The Piatto LED panel is a true light insert for the suspended ceiling. It produces hardly no heat, is extremely thin and suitable to mount in suspended ceilings with very limited vertical space. The light distribution is very homogeneous and smooth while the LEDs cannot be seen. The light coming from the LEDs is distributed over a laser engraved Light Guide Plate (LGP) creating a very relaxing light distribution. The glare ratio is very low and the lifetime extremely long with very little to no maintenance at all.

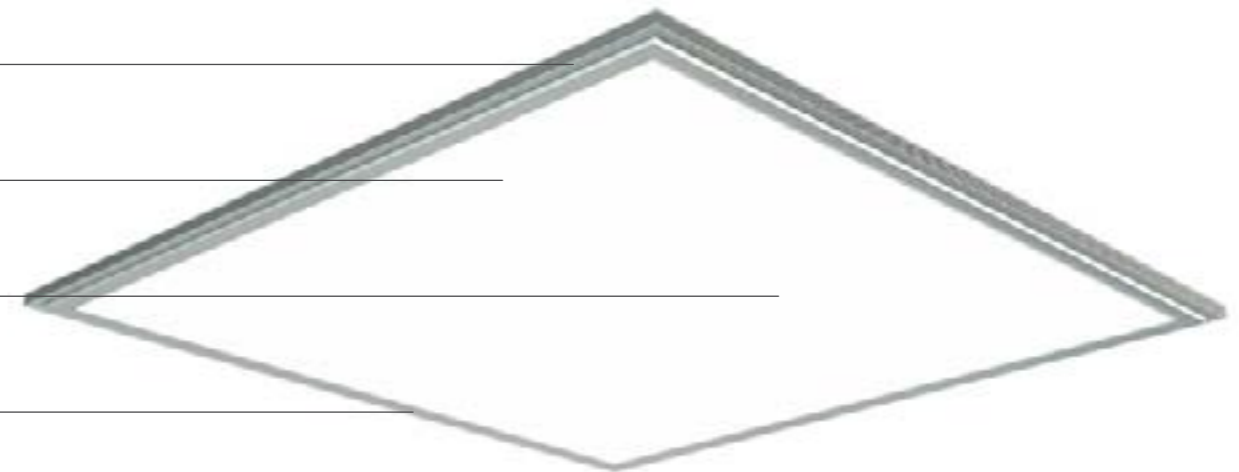

- [FEATURES]
- Vivid and Bright colors
 - Multi CCT, 3000K-4000K-5000K all in one
 - Even and smooth light distribution
 - Very low glare ratio ≤ 17
 - Energy efficient: 100-110 lumens per Watt
 - Dimmable
 - Maintenance free
 - Very long 50.000 hours lifetime
 - Comfortable very low glare
 - Extremely thin
 - LED driver with high Power Factor
 - 5 years warranty

PIATTO PANEL & PIATTO PANEL ROUND

PIATTO ROUND.

The Piatto round LED panel is as thin as it can get. True PL replacement with a high lumen per Watt ratio, no maintenance and very long lifetime. With the LEDs on the side of the housing and a high quality Light Guide Plate, smooth and elegant lighting is being created with low glare to comfort your eyes.

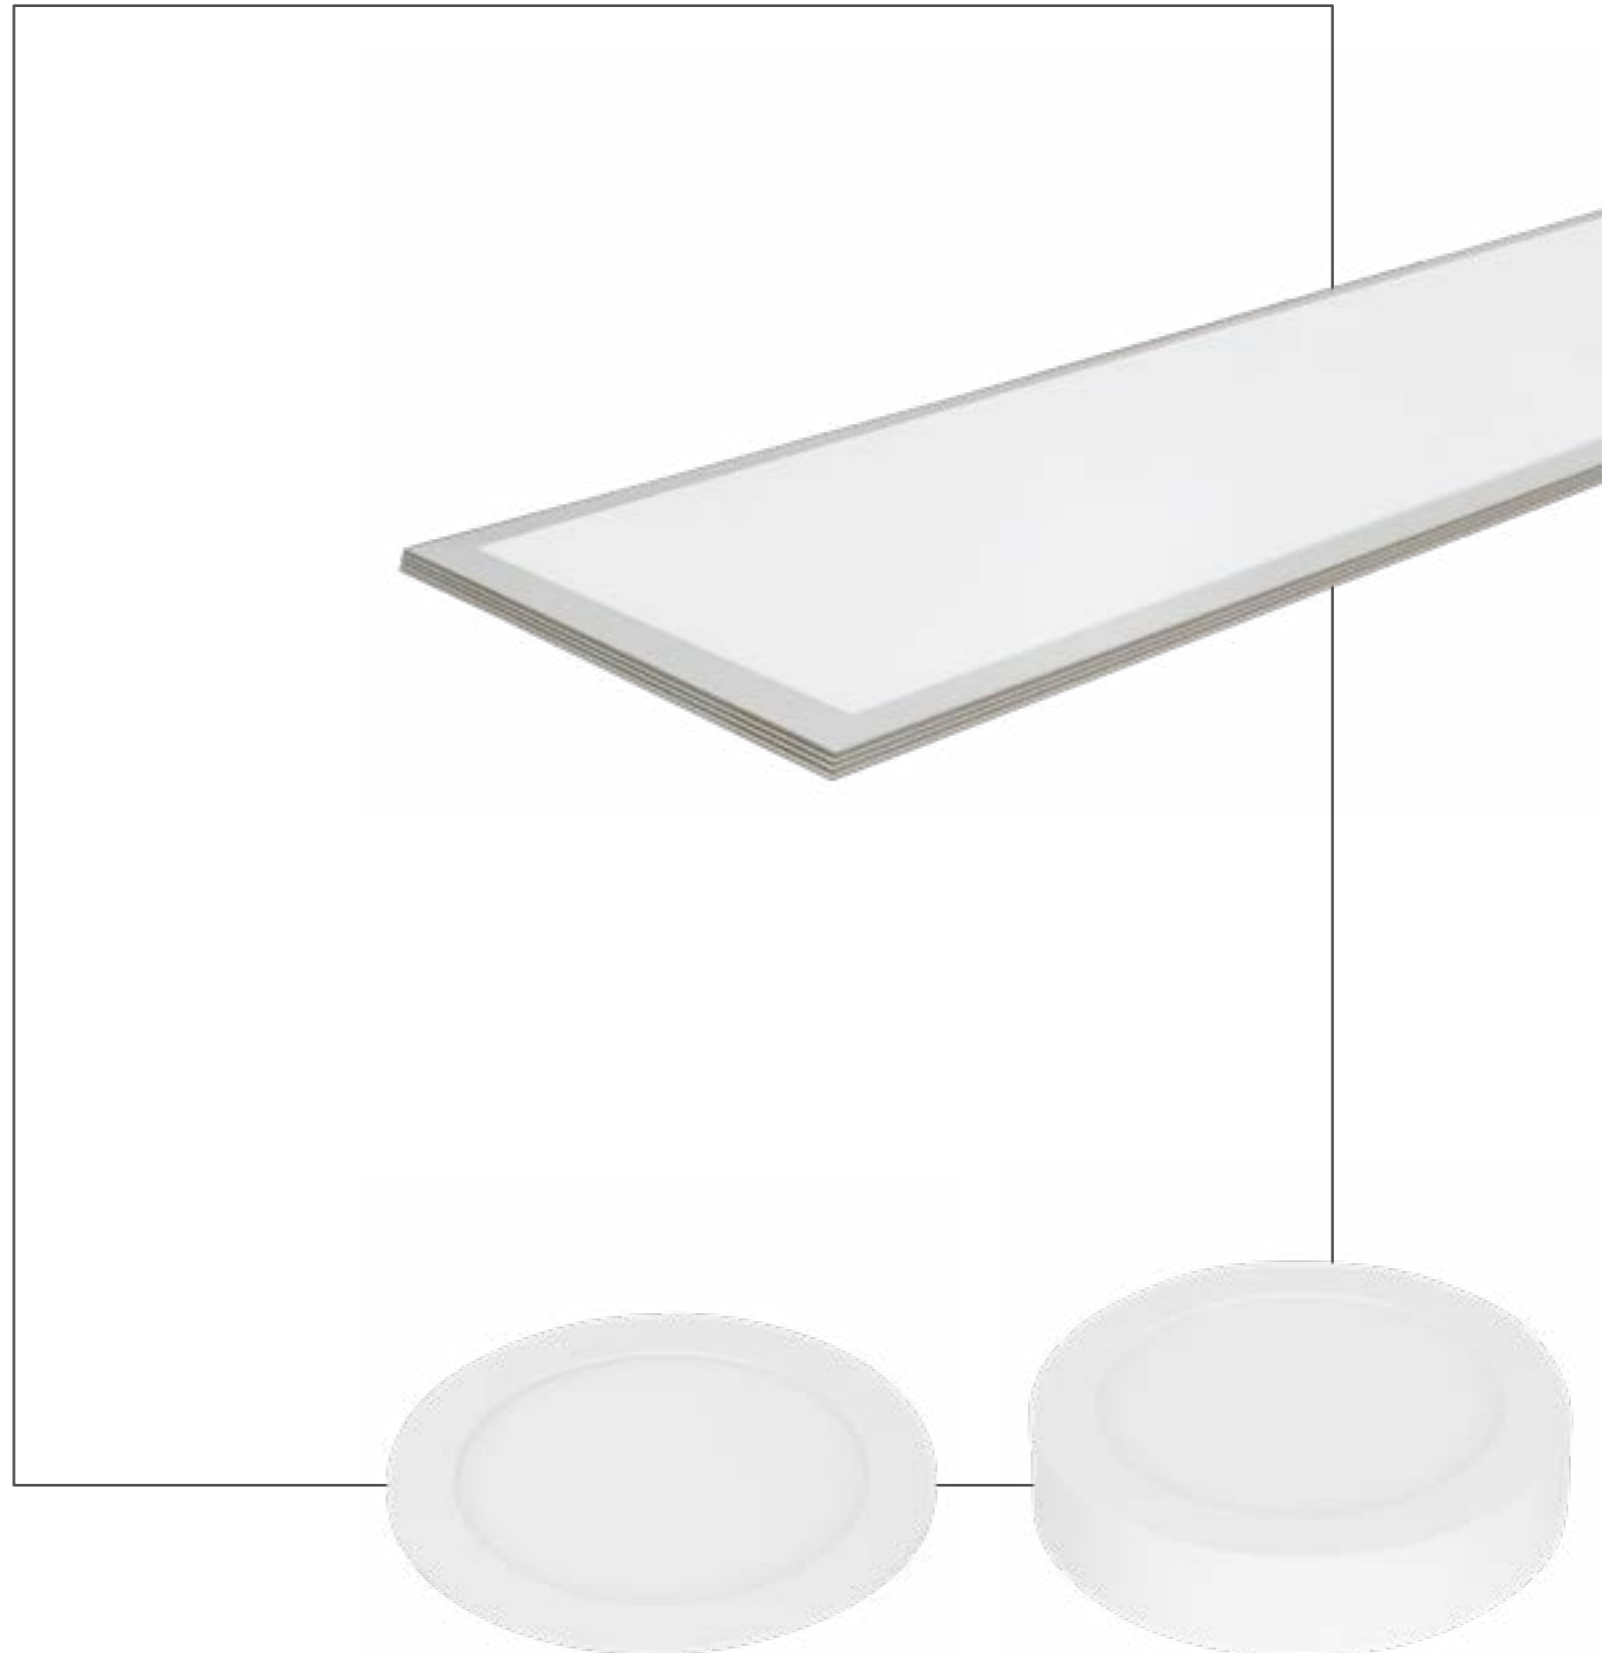

PIATTO 47X12 PANEL.

The Piatto 47x12LED panel is a true light insert for the suspended ceiling 47x12" inches. It produces hardly no heat, is extremely thin and suitable to mount in suspended ceilings with very limited vertical space. The light distribution is very homogeneous and smooth while the LEDs cannot be seen. The light coming from the LEDs is distributed over a laser engraved Light Guide Plate (LGP) creating a very relaxing light distribution. The glare ration is very low and the lifetime extremely long with very little to no maintenance at all.

LONGUM LINK

Office art by introducing a sleek and slim designed intelligent line light that is ready for the future of intelligent buildings. Anodized Aluminium, Tunable white downlight with no glare, and amazing blue uplight creating a future like atmosphere..

MOVABLE OF FIXED SUSPENSION RODS
Free choice of fixed or movable suspension clips in order to prevent unwanted suspension mounting in precious (climate) ceilings.
The Longum Link will make your Return on Investment count. Because of it's the state-of-the-art LED and lens technology, a very high 150 lumen per watt can be achieved. High lumen per watt means low energy consumption and longer LED lifetime. Available

in different lengths thereby avoiding unnecessary cabling, connectors and drivers to keep the cost of ownership low. All LEDs are placed on a Metal Core PCB allowing them to cool better and faster for less color shift and light depreciation. For the Downlight, 2 colors of LEDs have been placed that can be controlled seperately. 3000K - 6500K (tunable white) allowing for a full range of colorshift between these two colors. For the uplight dimmable blue LEDs have been placed to create an

amazing ambiance onto the ceiling. The control gears are Dali DT8 enabled and allow digital adressing and bus control that includes dimming, tunable white control, lamp and device status, running hours, power-on level, system-failure level etc.
Fixed suspension at both sides of the fixture perfectly integrated with the AC and Dali cable input. While it might be necessary to have a flexible suspension cable position to cater for different ceiling types.

The Longum Link has tunable white downlight with colored uplight for creating a futuristic ambiance, or to catch the attention of people passing by at night. For the downlight; Warmwhite creates a warm ambiance used during (lunch) breaks and at the end of the day. Neutral white is normally used during "normal" office hours. Coolwhite has a lot of blue in it, that is being received by a receptor in the back of our eyes signalling our body to lower our

melatonin levels keeping us awake and focussed. Often used after 15:00 hours or when working during evening or night hours.

RETAIL

The retail industry is in constant transformation. As customers become more demanding, there is also extra pressure to exceed their expectations about the product, service and overall experience. Our LED-lighting will not only light the aisles, but guide the clients through the shop. Highlighting preferred products, make the food look fresh or make rich and vibrant colors come to live.

JIMS

DLT-210

JIMS stands for the Jibe Interchangeable Modular System. The amazing JIMS DLT-210 spot light is a trimless ceiling mounted 2-axis spot light. It is implemented in those retail outlets/office environments where exact color representation and a very bright and vivid product presentation is of great importance. Customers will be attracted to your merchandise and revenues will rise. It is extremely easy to install in (suspended) ceilings. The 15 degrees narrow beam is easy to change by changing the optional reflector in 24,40 or 60 degrees. It's also adjustable over two axis with a cut-off of 30 degrees.

DOWNLIGHTS

This family of products can be used for a wide range of projects from residential to hotels, restaurants, retail shops and much more. JIMS provides a high level of visual comfort, while the products come with ceiling care mounting design and changeable bezels. These downlights are integrated harmoniously into the environment and hardly appear to be a design element. They provide balanced ambient lighting and are used for economical and light-intensive lighting tasks.

LIGNUM TRACKLIGHTS

LG1

The amazing PEAK spot light is one of the most versatile spots available. It is implemented in those retail outlets where exact color representation and a very bright and vivid product presentation is of great importance. Customers will be attracted to your merchandise and revenues will rise. The 12 degrees narrow beam allows you to exactly pinpoint the merchandise that you want to highlight. It is extremely easy to change the narrow beam for wider versions by instant on the spot exchange of the reflector.

LG6

LG9

The PITCH spot light has been elegantly designed. The Pitch can be placed close to the object due to its very small form factor and unique sleek design. The hinge is part of the housing and beautifully integrated into the lamp body. Especially when you have low ceilings or tiny object like jewelry or art, the Pitch is the right choice for you.

The amazing Apex spot light is truly unique. It is the evolution of its predecessor the Broadway spot. It is more refined and more elegant and has smaller dimensions. With its integrated multi current driver and optional barn doors, this product is your pick for your store. The 15 degrees narrow beam allows you to exactly pinpoint the merchandise that you want to highlight. The integrated driver can be set at 3 drive currents. The layout of the LED, deep inside the housing and the antiglare ring, creates great comfort to the visiting customer with hardly no glare. With 1 optional lens, any light setting can be made.

BAR, HOTEL & RESTAURANT

We like to make your client feel at ease, and have the best experience possible. Lighting will help you in creating an amazing customer experience.

OUTDOOR

LED outdoor-lighting is a sustainable, efficient and effective way of enlighting your outdoor places. Due to the challenges of 24/7 operation, we developed products with superior lighting quality, virtually no maintenance and significant energy savings. .

STREETLIGHTS

HGH1

The HGH1 is the new LED street light. The luminaries vary from 30W to 300W, have ultra safe in-rush currents for maximum safety and are designed with the environment in mind. The optical lenses and LED chips offer great efficiency in brightness as well as energy savings. It's particularly suitable for roads, highways, parking lots and bridges. It can be equipped with a single- or two-seater pole connection, and it can be installed with a wall arm .

HGH4

The HGH4 high-powered light can work as both area lights as LED floodlights. It delivers incredible efficiency without sacrificing performance. With Type2 Type3 Type4 light distribution from 180W-600W, the HGH4 is a good alternative for traditional street lighting.

HGH7

A fluent line, appropriate size, smooth body. It has impressive details such as easy opening and Maintenance, solid protection, adjustable angle etc. The product can be used for many projects with power ranging from 15W to 150W.

BRICKLIGHTS

We always focus on the details of the products, which creates high quality and a stable performance. We chose a polycarbonate lens which protects against ultraviolet light, water exposure and immersion (UL746C). The whole front cover is made out of aluminium and is serving as a heatsink. The bricklights are available in multi CCT, ranging from 45-100w (the 45w replaces the HPS150w, the 70w replaces the HPS250w and the 100W replaces HPS400w) generating energy savings of a stunning 70%.

BULKHEAD

The bulkheads are a cost effective solution to fulfill emergency lighting requirements. They are available in 8, 20 & 30w and have a 3 hour emergency function (including self-test) which creates constant light output, even during a black-out. The bulkheads are multi CCT and have numerous dimming functions like 'stand-by to a certain %', 'corridor function' and 'dim when unattended'. The products are IP65, CE, ROHS certified and have lifespan of 50.000 hours.
