

# Z3 BMW Seat Mod Seat Tilt Kit

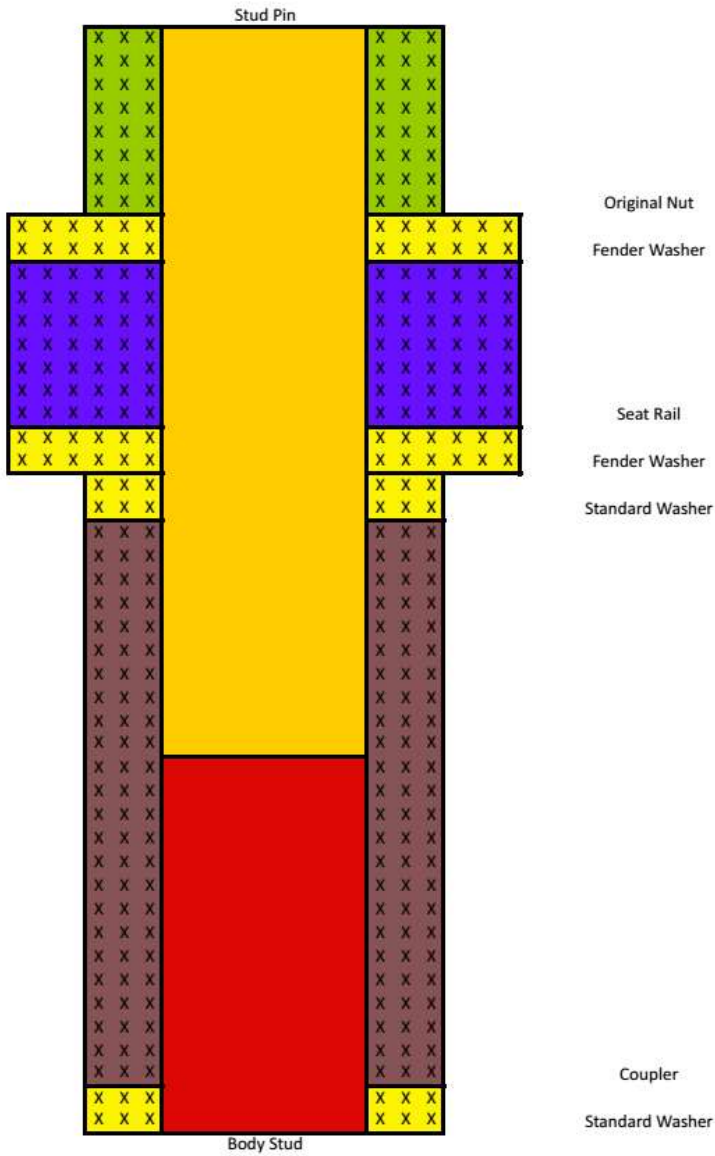

Fitting aftermarket modifications to your car is dangerous. It is important to understand one's technical ability and skillset before proceeding with any modification. Additionally, the modification detailed here and/or the hardware provided, is not a factory approved. We will not be held responsible for any injuries or damages as a result of product purchase, installation and/or ownership. If you have any doubts or concerns, do NOT proceed with the installation.

## Basic Instructions:

- Move seat full forward.
- Fully incline seat back.
- Remove rear seat bolts w/ 16mm socket or wrench.
- Move seat backwards just enough to clear front nuts.
- Remove front nuts w/ 13mm wrench.
- Prop seat up to gain access to body studs.
- Place standard washer on body stud.
- Place coupler on body stud and tighten w/ 13mm wrench.
- Using a 4mm allen key, insert extension stud into coupler.
- Place a standard washer followed by a fender washer onto the stud.
- Unprop seat and lower onto new studs.
- Move seat full forward.
- Reinstall rear seat bolts w/ 16mm socket or wrench.
- Move seat full back.
- Place fender washer over stud and reinstall factory nut w/ 13mm wrench.
