

Assembly and Safety Instruction

Before Use, please read the following instructions carefully in order to avoid any functional disorders or damages.

The mention voltage of **220V-240V~50Hz** should comply with the voltage of your electricity system. If this is not the case do **not** connect the lamp.

The bulb for the lamp should be maximum **60W**. A spare bulb should also be maximum **45W B22**. If you use a bulb with a higher wattage the lamp holder could be damaged.

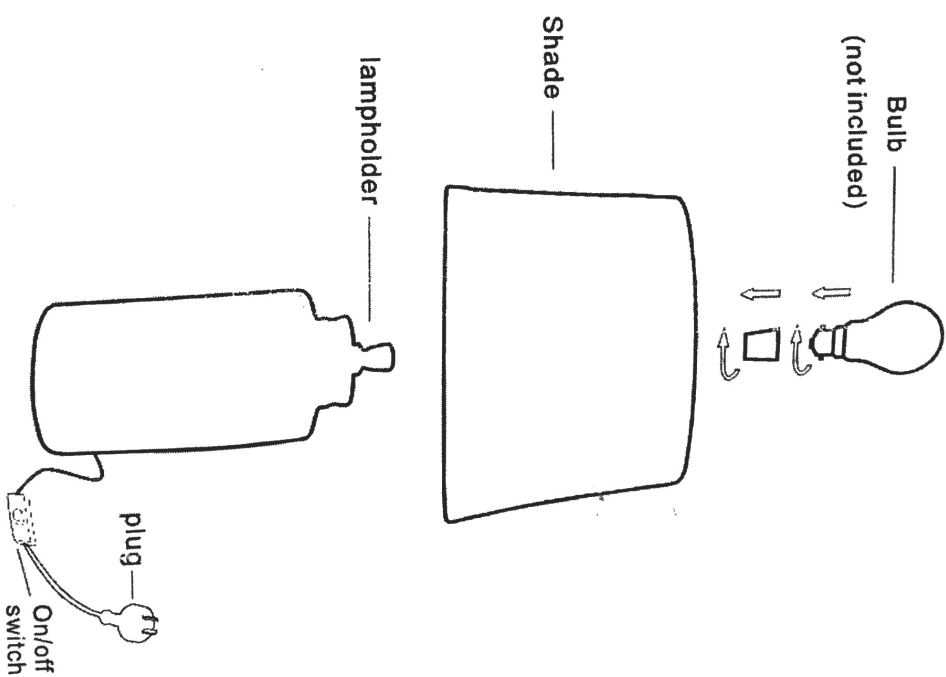

Assembly of the lamp

Caution: Be sure that the power is turned off before starting the assembly.

1. Carefully unpack the lamp and put it on a flat surface.
2. Remove the plastic wrap from the shade.
3. Install the shade to the lamp holder and and tighten it with the ring.
4. Screw the bulb (**Max 60W B22** – not included) into the lamp holder.
5. Connect the plug into main supply. Switch on/off the lamp with on/off switch.

Maintenance and Care

1. To avoid electric shock never uncover the on/off switch or try to insert objects into it.
2. Avoid direct contact of the lamp with water.
3. Always carry the lamp by holding the stand and never by holding the shade.
4. Before replacing a defective bulb unplug the lamp and let it cool down for at least 10 minutes. Only change the bulb if it has completely cooled down. Use a clean fluff-free cloth to change the bulb.
5. If necessary, the lamp can be cleaned with a clean dry or slightly damp cloth. Do not immerse in water.
Caution: please unplug it at least 10 minutes before cleaning.
6. The lamp is designed for indoor use only.
7. If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.
