

# CONFORMA LE

## BREAST RECESS COMFORT SYSTEM

Earthlite is proud to introduce its latest innovation in massage comfort, the Conforma LE. The Conforma LE eliminates breast discomfort and improves spinal alignment for women (and men) during face down spa and medical treatments. With continuous one-touch, whisper-quiet motorized adjustments, therapists are able to create a luxuriously padded alcove, tailored to each individual client, ensuring maximize comfort and optimizing spinal alignment. The compact Conforma LE Breast Comfort System is now available on the Ellora™ treatment tables.

### Improves Spinal Alignment

Large chests (both men and women) can create spinal alignment issues when face down. The Conforma LE addresses this issue by creating space underneath the client's chest to improve spinal alignment.

### Smooth, Whisper Silent Adjustments

Your clients will feel, but not hear the smooth adjustments made by the Conforma LE's whisper quiet motor.

### Client Adjustable Controls

Your clients can make their own discrete adjustments to the settings of Earthlite's Conforma LE with our easy to reach and intuitive controls. Privacy and discretion are preserved.
