

ATTENTION

TUB CLEANING GUIDE

- Always refer to your state and local codes for specific cleaning requirements.
- NEVER USE abrasive cleaners on any surface area. Failure to comply can cause damage and void your warranty.

Foot Bath Additives

Provide an enhanced pedicure experience with essential oils, aromatherapy, and other additives, knowing all residue can be easily removed. The Sanijet® foot bath can be used with most foot and skin care products, provided that the cleaning protocols and local codes are strictly followed.

Products NOT Recommended

- Silicate based bath additives/scrubs - may void warranty.
- High foam agents (use only low foam solutions).
- Abrasive cleaners that might damage the system components, and scratch/dull the basin surface (major scratches will require professional refinishing).
- To avoid discoloration, products with petroleum distillates must not remain on surfaces.

Cleaning After Each Use/Client

1. Drain the tub of all water.
2. Rotate the jet cover to unlock. (Fig. 1)
3. Remove the jet cover. (Fig. 2)
4. Remove the magnetic impeller/rotor from the jet case. (Fig. 3)
5. Place jet cover and impeller/rotor into a sink. Use a non-abrasive antibacterial cleaner and clean brush to remove any visible residue. Rinse with fresh water, and dry with a clean paper towel.
6. Use a non-abrasive antibacterial cleaner and clean brush to scrub and clean the tub basin, drain stopper, and light casing, followed by a rinse with fresh water.
7. Refill the tub with clean water and add the correct amount (read manufacturer label for mixing instructions) of an EPA-registered liquid disinfectant that is labeled as a bactericide, fungicide, and virucide. Turn on the jets to circulate the water for at least 10 minutes.
8. Drain the tub, rinse with fresh water, and wipe dry with a clean paper towel.
9. Reinstall the magnetic impeller/rotor.
10. Reinstall jet cover by aligning at the 10 o'clock position. Maintain even pressure and rotate jet cover to lock into place at the 3 or 9 o'clock position. (Fig. 1 shows 9 o'clock position.)

IMPORTANT: Jets will not run if not locked into place properly.
