Office Visual Basic for Applications (VBA) is an event-driven programming language that enables you to extend Office applications. VBA programming in Office. This reference is for experienced Office users who want to learn about VBA and who want some insight into how programming can help them to customize Office. The Office suite of. Visual Studio 2019 for Mac. Develop apps and games for iOS, Android and using.NET. Download Visual Studio for Mac. Create and deploy scalable, performant apps using.NET and C# on the Mac.

Office Mac 2011 is an Office Suite that makes doing work in the office and home more efficient and fast. Ideally, navigation through the different functions is easy due the easy to use interface Mac ribbon. Notably, the new ribbon is a significant enhancement of Office 2008. To start with, ribbon is built entirely with Apple's Cocoa development framework. This feature makes the Suite feel more like Mac than Office.

With Office Mac 2011, several people can work on the same document and have a threaded conversation right next to the relevant text. It does not matter if you and the workmates are in the same room or at different places. Moreover, Office for Mac 2011 enables instant communication among people working on the work.

Matrix multiplication

Further, Office Mac 2011 features a focus mode for reading and writing. Focus mode minimizes all the commands leaving only the commands you need thus creating an uncluttered environment.

Searching for anything on a document is remarkably easy. You can search for a word, a phrase and even a character in the search bar and it will be instantly highlighted in the document. Moreover, once you open the sidebar, you can see all the search results, find and replace text and search for special characters.

PowerPoint has also too been made more efficient. It features a new PowerPoint presenter view that allows a user to display the current slide, next slide, speaker notes while projecting only the current slide to your audience. More so, Office Mac 2011 enables easy sharing of presentation and even simultaneous sharing of presentations and even enabling persons to work on a presentation simultaneously.

Supported file types:

- Documents(, HTML, DOC,MHT, MHTML,TXT, XML,WPS..)
- Audio(MP3, AAC, WMA, FLAC, OGG, AIF, APE..)
- Video(MPG, FLI, FLC, MP4, AVI, WMV, MPEG,…)
