Productivity Package Option allows casting a second gel while the first is running for increased efficiency

Productivity Package GCMHU-202

APPLICATIONS

 Separation and identification of DNA fragments, RNA fragments, PCR products and synthetic oligonucleotides

FEATURES

- Gel bed size: 7.5cm(w) x 10cm(l)
- All gel trays are winged for easy handling.
- Productivity option allows casting a second gel while the first is running. The addition of the external gel caster and additional gel tray allows the researcher to use time more efficiently.
- Tapered baffles allow easy in situ gel formation with or without gel tray.
- Run up to 32 samples per gel.
- Choice of double-sided adjustable height combs gives researcher more options.
- Combs are printed with catalog number and thickness for easy identification.
- Removable Platinum electrode cassettes. Cassettes are easily removed for for cleaning or replacement.

Mini-Horizontal Productivity Package Option GCMHU-202T

Complete Package:

- Electrophoresis unit with molded tapered baffles
- 2 UV transparent winged gel trays with 2 comb position slots
- UV transparent acrylic gel bed
- 2 dual-sided adjustable height combs
- Safety cover with power leads
- Platinum electrodes
- External gel caster with leveling base

Standard Mini-Horizontal Kit

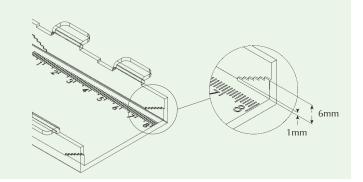

MHU-202T

Complete Package:

- Electrophoresis unit with molded tapered baffles
- 1 UV transparent winged gel tray with 2 comb position slots
- UV transparent acrylic gel bed
- 1 dual-sided or standard adjustable height comb
- Safety cover with power leads
- Platinum electrodes

Mini-Gel tray features:

- 1) Etched migration ruler on base.
- 2) 1mm calibrated gel anchors on all 4 corners. Each 1mm step adds 7.4ml (MHU-202) of agarose.
- 3) Two comb slots allows choice of one longer pathlength or two shorter pathlengths.
- 4) Winged for easy handling

SPECIFICATIONS									
Horizontal System Cat. #	Overall Dimension W x L x H (cm)	Gel Bed Size W x L (cm)	Buffer Volume (ml)	Compatible Gel Tray	Gel Tray I.D. W x L (cm)	Agarose Solution Required* (ml)	# of Slots in Gel Tray	Pathlength/ Slot (cm)	Maximum # of Samples
GCMHU-202, MHU-202	17 x 19.7 x 12.7	7.5 x 10	250	MGT-222	7.2 x 10	36	2	5.5	32

^{*}Gel tray agarose required was calculated using a gel thickness of 0.5cm

STANDARD COMB OPTIONS for 7.5cm wide for GCMGU-202T and

MGU-202T, , adjustable height

material: Polycarbonate or PTFE-coated aluminum*

tooth depth: 6.35mm overall length: 7.0cm
