

A Portfolio of Hands-on Solutions to Help Young Students Learn Through Play

As children learn primarily through play at this age, teachers facilitate learning by creating fun and engaging experiences that awaken and open students' imaginations. Our unique LEGO® Education Early Learning solutions are built for this. Using LEGO® and LEGO® DUPLO® bricks and rich teaching resources developed based on national guidelines and standards, these solutions help preschool teachers to cultivate a strong foundation for their students within key learning areas: early math and science, early language and literacy, social and emotional development, and creative exploration. Find our newest solution within early coding below.

I have never seen anything like Coding Express, and I am very intrigued with its structure and the varying ways it can teach children specific skills they might not have gained through play before. I love its versatility and how the many different areas of play will keep most children occupied for a very long time.

– **Kate Lathem**, Preschool Teacher, USA

CODING EXPRESS SOLUTION INCLUDES

CORE SET

234 LEGO® DUPLO® BRICKS
 (including Push & Go train with lights and sounds, motor, color sensor, 5 color-coded action bricks, 2 railroad switches, and 3.8 meters of toy train track including crossings, stops and 5 traffic signs)

Coding Express App

UNIT PLANS

A LEGO Education Continuum of Learning

Studies have shown that being physically engaged before, during, or after learning something helps your brain retain that information better. LEGO Education believes that hands-on learning is an effective way to teach students of all levels skills like problem-solving, critical thinking, and more. Whether you are working with the youngest students just beginning to make sense of the world around them, or teaching design engineering principles to advanced learners, sound STEAM solutions from LEGO Education help you engage your students with real-world, relevant projects.
