• How did they discover the Grainsense device?

I got information from ABP Engineers and then we demoed it.

• Why was this device needed?

I needed it to get quick and on-site results.

• What benefits has the Grainsense device brought to our company?

This year, we made decisions about purchasing and storing Durum Wheat with the help of the results I received from the GrainSense device.

• How has it helped business development?

Time savings and pricing

• How has GrainSense improved its daily activities?

I had the opportunity to buy from the field.

• How has it facilitated business decisions?

I had the opportunity to purchase from the field. I was able to price the wheat at the beginning and direct the course.

• What can you tell about our device in one sentence?

Being able to instantly access and record the most important parameters for wheat is a great innovation.

Quote from the text:

"Being able to instantly access and record the most important parameters for wheat is a great innovation. We chose Grainsense to get fast and on-site results in this regard. As a result, we saved time and pricing..."
