

D-FENZ™ Fabric Protectant

Up to 30 Washes of Lasting Protection

- Prevents Mold, Mildew & Bacteria from Growing on Dried, Treated Surfaces
- Locks Out Tough, Everyday Odors
- Bleach Free
- Color Safe
- Multi-Purpose: Laundry, Upholstery, Carpets & More

Textiles create the ideal breeding ground for microorganisms, therefore a powerful antimicrobial technology is necessary to maintain cleanliness, durability, and longevity.

D-FENZ Fabric Protectant primes various textiles, such as bedding, athletic gear, undergarments, towels, clothes, upholstery, and more, with an invisible barrier capable of warding off contaminants.

D-FENZ Fabric Protectant uses an advanced colloidal silica technology designed to inhibit the growth of odor-causing bacteria, molds, and mildews on textile surfaces.

D-FENZ Fabric Protectant remains bonded to textile fibers for up to 30 washings making it optimal for household or commercial laundry. Pre-treat laundry or apply to fabrics already contaminated or exposed to offensive, odor-producing microbes. It can also be added to the fabric during the final stage of the textile manufacturing process.

**Efficacy may vary depending on fiber type, application dosage of the treatment, fabric impurities, and application procedure.*

**Antimicrobial properties built in to protect the product. Product does not protect users or others against bacteria, viruses, germs, or other disease organisms.*
