MATERIALS

1 NON-REFLECTIVE (NR)

ORACAL® 651 INTERMEDIATE CALENDERED VINYL FILM

2.5 mil, calendered PVC film. Gloss finish. Used for Building Signs, Vehicle Graphics, Window Graphics and Decals.

1 REFLECTIVE (HIP)

3M HIP HIGH INTENSITY PRISMATIC

Meets middle grade performance standards and ASTM D4956 Type IV. Used for reflective traffic and road signs. Performance warranted for up to 10 years.

2 3M TM SERIES ELECTROCUT FILM

3M™ ElectroCut™ Film is a transparent, acrylic film with pressure sensitive adhesive for application over reflective sheeting. This material is highly transparent and gives equal or better retro-reflective performance than sheetings screened with transparent inks.

3 MAX METAL ALUMINUM

MAXMETAL is an aluminum composite material comprised of two, pre-painted .15mm aluminum panels bonded to a solid polyethylene core. It's lighter in weight and more durable than both MDO and solid aluminum panels, plus it resists scratching and denting better than wood panels. Can be cut to any shape and sizes.

HOW TO SEND ART WORK

Please provide us with any text, special characters, colors, logos & layout instructions and our design team will create a full color rendering. Once the final rendering is approved we will begin the order. Our printing process creates custom designs directly from the approved proof, eliminating the possibilities for misspellings or errors

ACCEPTABLE FILE TYPES : .ai .pdf .eps .svg .jpg

Please note that vector files are preferred. If you do not have vector graphics, a high resolution .jpg is acceptable. Please note design time may result in additional charges. If you are in need of additional graphic info, you can reach out to us or check us out online at:
