

MGO
is Methylglyoxal -
a special compound
unique to Manuka Honey

“HONEY, NOT ANTIBIOTICS RECOMMENDED FOR COUGHS”

- NATIONAL INSTITUTE FOR HEALTH AND CARE EXCELLENCE (NICE)

“Evidence showed that honey could be effective at reducing the symptoms of acute coughs due to upper respiratory tract infections”*

100% New Zealand origin

Traceable right back to the beekeeper

Strictly tested for quality, purity & potency

Certified for natural MGO content

Great tasting honey

*The guidelines from the National Institute for Health and Care Excellence (NICE) and Public Health England (PHE) have been developed after looking at the best available scientific evidence.
