PORCUPINE RC

When it get's rough...

From muddy days to loamy forests and deep dust – the PORCUPINE RC is made to keep you on track in even the most demanding conditions. Designed in collaboration with some of the worlds fastest downhill racers, no compromises were made in the quest to develop ONZA's most aggressive tire to date.

The PORCUPINE RC is the answer for gravity pilots looking to maximise grip and confidence. Full on shuttle days, Enduro races or steep terrain and natural riding are your thing? Look no further.

onza®

The PORCUPINE RC in a nutshell

- Aggressive tire tread for progressive riding in rough conditions (RC)
- Skinwall sidewall
- Available in 29 only
- Soft Compound 50 rubber for maximum grip
- New GRC Gravity Casing
- New hotpatch design!
- Most aggressive skinwall tire on the market

application & characteristics

APPLICATION GUIDE

HARD PACK	LOOSE OVER HARD	MEDIUM SOIL	LOOSE SOIL	WET	MUD

CHARACTERISTICS

ROLLING EFFICIENCY

CORNERING CONTROL

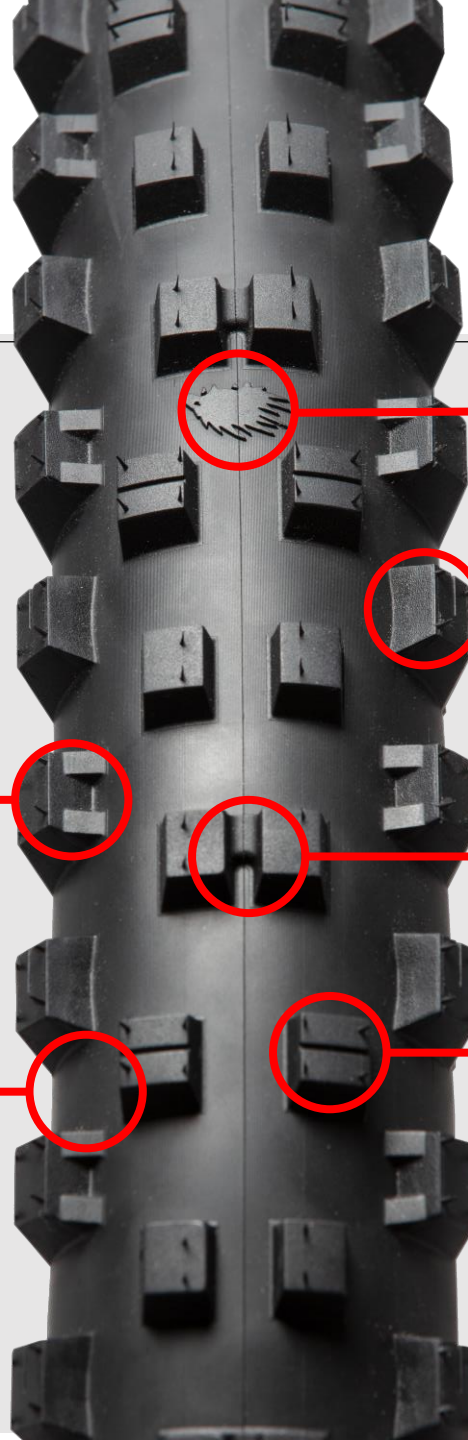

onza[®]

**Aggressive and open tread
for demanding conditions**

Dual support to prevent
sideknobs from folding while
cornering

Uninterrupted channel
between sideknobs and
center knobs for maximum
control and predictability

PORE icon

High and aggressive knobs dig
deep into the soil

«bridge» to support center
tread

Siped knobs to perfectly
adapt to the terrain

Recommended rim width

The Porcupine RC is designed to work best with modern rims that feature a 28-35mm inner width.

Sidewall information such as the recommended rim width, the TLR tubeless ready icon and our credo «Swiss performance» are subtly molded into the sidewall.

A person is riding a mountain bike on a muddy trail. The bike is splashing mud, and the rider is wearing a light-colored shirt and dark pants. The background is a lush green forest.

SEE YOU ON THE TRAILS!
