# TUBES

*Made in Europe.*

After a short absence in the tube market we are back with a completely reworked «Swiss Air» (short SA) tube lineup with many cool features.

As a small rider owned and operated business we were able to do many things differently from our big competitors, resulting in our own and distinctive lineup of tubes. And the most exciting of all: They are made in Europe!

**onza**<sup>®</sup>

### **ONZA tubes in a nutshell**

---

- Made in Europe
- 2 different rubber thicknesses
  - 0.9mm (SA3)
  - 0.6mm light tubes (SA2)
- Available for 26 | 27.5 | 29 MTB sizes
- Unconventional details

onza®

### Something for everyone

Our SA2 and SA3 tubes are available in 26, 27.5 and 29 inch wheelsizes – leaving no wishes open.

**onza**<sup>®</sup>

### **Different wallthicknesses**

---

To offer the right tube for every riding style, our «Swiss Air» tubes are offered in two different thicknesses.

- SA2
  - 0.6mm thick
  - < XC | Trail use
- SA3
  - 0.9mm thick
  - > Trail | Enduro use

### **Made in Europe**

We are excited to bring manufacturing of our tubes to Europe as the only well-known brand!

All ONZA tubes are manufactured to the highest quality standards in our European partner factory.

## Made in Europe

---

Bringing manufacturing of our products to Europe is a very important step for us and the way forward into the future. As a Swiss based company we see many advantages in European manufacturing such as:

- Better working conditions and higher environmental regulations
- Shorter transport routes into key markets reduce environmental impact drastically
- Better control of our processes and quality
- Reliable supply and shorter lead times
- Support of domestic businesses

### Swiss Performance

Our credo is not just a written piece of text – it's also embodied in our products where no detail is being untouched.

Contrary to the prints that the industry is using (and we used in the past) to label tubes, we decided to take the extra mile and emboss all information on our SA3 tubes. Resulting in a super high end finish.

### **47mm Presta valve**

All SA2 and SA3 mountainbike tubes are equipped with a 47mm long Presta valve. This ensures compatibility with all rims with a height between 5mm (single wall) and 35mm.

The valve core is not removable for ease of use and to prevent unwanted trailside surprises.

**onza**<sup>®</sup>

### **Valve cap and nut**

All tubes come with the valve nut and cap pre-deinstalled to and kept in an extra pouch to make tube changes fast and easy. Saving some extra time out on the trail while your friends are waiting for you to fix your puncture or saving an extra step for mechanics in our beloved bikeshops.

onza®

### Cross-selling

As the only tube manufacturer we used our packaging as a cross-selling opportunity to showcase our bestseller: the Porcupine.

Why not get some flashy tires when you have to work on your wheels anyway? ;-)

A person is riding a mountain bike on a muddy trail. The bike is splashing mud, and the rider is wearing a light-colored shirt and dark pants. The background is a lush green forest.

# SEE YOU ON THE TRAILS!
