

High Falls Hemp

NEW YORK

30ct 1050mg CBN + CBD Advanced Sleep Blueberry Gummy

INDEPENDENT LAB REPORTS

At HIGH FALLS HEMP NY, our mission is to provide you with premium products and education. Lab results help you ensure that the money you are spending on a CBD product contains the amount of CBD that's advertised. Third party lab testing means that we send our products to an independent company to test CBD concentration, and to ensure that there are no traces of pesticides, residual solvents, biological contaminants or heavy metals. Our pledge to you is our complete transparency about what you are putting in and on your body. Natural alternative wellness solutions to feed your mind, body, and soul. This report validates that we are providing you with the highest and purest quality product possible. We test your CBD at every step in the process from the seeds we grow to the product in your hands.

TEST 1

PLANT TESTING

Each cultivar must meet New York state's Department of Agriculture compliance requirements of 0.3% THC (or less).

TEST 2

EXTRACTION TESTING

Once all the crops are stripped and stored in a climate controlled facility, they are tested for heavy metals and pesticides before our hemp is sent to our extraction partner, who processes the biomass into Full Spectrum distillate (FSD). After extraction, the FSD and CBN distillate is again tested to meet High Fall's internal requirement to ensure that they are free of heavy metals, pesticide residual solvents and biological contaminants. High Falls Hemp NY has, in fact, met the compliance standards of the New York state Department Of Health to distribute our CBD distillate to the New York state Medical Marijuana program.

TEST 3

PRODUCT TESTING

After all the hard work of cultivating and extracting, our tinctures are then formulated in New York state at our cGMP certified lab. To assure you are receiving the purest CBD products, our finished goods are again sent out to an independent lab to ensure they meet the potency and safety panels, and other requirements of all state and Federal agencies, consistent with what is on the label. The lab report being shown here is that of the finished products made by High Falls Hemp NY.

Ratio of Total Potential CBD to Total Potential THC				N/A
Ratio of Total Potential CBG to Total Potential THC				N/A

SAMPLE IMAGE

CANNABINOIDS % Weight

*Total Cannabinoids refers to the sum of all cannabinoids detected.

*Total Potential CBD = (0.877 x CBDa) + CBD. *Total Potential THC = (0.877 x THCa) + THC. *Total Potential CBG = (0.877 x CBGa) + CBG.

*Total Potential THC/CBD are calculated to take into account the loss of an acid group during decarboxylation.
