Only available from **ServiceFirst™**

# SERVICE FIRST

## Veteran owned and operated

Service First is owned and operated by Parker McCumber, an OEF Veteran, who served with the 2nd Cavalry Regiment and 1st Cavalry Division as a Forward Observer and Fire Support Section Chief.

Parker has also served several years in the Utah National Guard as a Targeting NCO, and is continuing his service and transitioning to officer-ship with the Utah National Guard. We know the sacrifice service members make, and recognize their contributions to our great nation as we pay respect to our flag and all it represents.

“I believe every American should be able to fly our nation’s flag proudly, and the mission of Oldgloryflagpole.com is to make it easy and affordable for everyone to have a beautiful flagpole in their yard and at their home.”

-Parker McCumber

# PARTS

The 30' sectional pole has 5 sections

# INSTRUCTIONS

## Installing your ground sleeve

A complete installation video is available at [www.ServiceFirstProducts.com](http://www.ServiceFirstProducts.com) or scan the code to the right to be taken directly to the page.

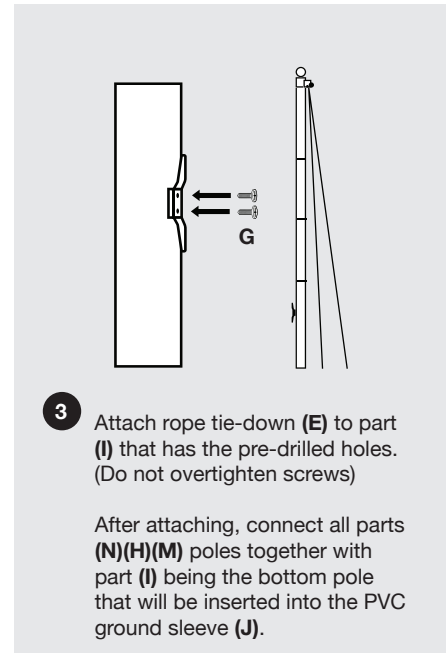

- 1** Dig a hole approximately 18" deep x 18" wide. Depending on your soil type and wind conditions you may want to dig slightly larger, however in typical conditions 18"x18" will be sufficient.
- 2** You will need anywhere from 3-6 bags of 50 lbs concrete to fill around your PVC sleeve
- 3** Once the hole is finished place the sleeve vertically in the hole and fill around the sleeve with concrete. You can either fill with premixed (water & concrete) concrete or fill with dry concrete and then add water to the dry mix.
- 4** Begin to level the flagpole sleeve in the ground by slipping Section 1 (Part I) into the sleeve. Then apply a level on all sides of the flagpole to ensure it is perpendicular. More information on how to do this can be found in the installation video found on our website. Make sure to do this while the concrete is still wet to allow for adjustments.
- 5** Allow the concrete to cure as directed. Install your Flagpole inside the PVC sleeve.

**Optional:** Use the Service First Flash Collar to cover exposed concrete for a finished look. (Collar sold separately)

# INSTRUCTIONS

## Building your flagpole

# INSTRUCTIONS

## Building your flagpole

Attaching  
rope to  
flag clips

- Step 1
- Step 2
- Step 3

- 4** Attach the flag clips (**K**) to the rope (**L**), at the desired spacing, using the method shown above. Now attached the clips to the flag..

- 5** Your Flagpole assembly is now complete. Carefully raise the entire flagpole and place inside the previously installed ground sleeve (**J**). Using the halyard (rope) raise your flag and tie the rope off at the rope tie down.

**6**

Once all sections are assembled the flagpole should resemble the diagram above. Joined together the 3" diameter tapered swedge design creates a strong and durable flagpole.

Note: The 25' Delta Flagpole has 4 Sections. The 30' Flagpole has 5 sections. The numbers on the pole will vary depending on the size flagpole.

# ACCESSORIES

## Flagpole Accessories

**Additional flag clips**  
Fly multiple flags on your pole

**Flash Collar**  
Give your flagpole the perfect finishing look. Covers concrete base.

**Flag Tether & Weight**  
Allow you to fly a flag at half staff, reduces stress on the flagpole, and gives you a nice clean look.

**Flagpole Adapter**  
Allows you to keep an existing 2" ground sleeve while upgrading the flagpole to a 3" design. No tearing out concrete.

**Gold Eagle Finial**  
The perfect finial for your flagpole

**Gold Eagle Finial**  
The perfect finial for your flagpole

**Additional Flags**  
We carry hundreds of different flags, including state, political, military, sports teams and more.

**Solar Lights**  
Achieve the perfect light for your flagpole without hard wiring a light system. Charges by day and automatically lights at night.
