GROUND ADAPTER KIT

When extreme weather conditions are present, it is recommended to lower and store the flagpole.

Patent Pending

ADAPTER USE

NOTE: This adapter is to prevent digging up and re-setting a previous installed flagpole sleeve nylon sleeve.
This adapter works with sleeves ranging from 1 7/8" - 2 3/4" ground sleeves.

Insert the nylon spacer over the smaller end of the adapter. Depending on the size of your sleeve, the included nylon spacer can be used to ensure a snug fit. In some cases, the nylon spacer will not be needed.

Insert the ground adapter into the ground sleeve.

Slide the smaller end of the adapter into the existing ground sleeve.

Insert the flagpole into the ground adapter and tighten side bolts.

OPTIONAL: For a more finished look use a Service First flash collar before sliding the adapter into the ground sleeve. Place your flash collar over the hole and then insert the ground adapter and flagpole.

Parts Included In Your Adapter Kit

A. Ground Adapter (1)

B. Nylon Spacer (1)

For use with sleeves ranging from 1 7/8" - 2 3/4" ID ground sleeves.

Flagpole and Flash Collar not Included.
