

Service First Flag Poles are built to the highest standard and designed for all weather conditions. However some weather events prove too much for any pole. You may also have a flag larger than our recommended (4'x6') size that you would like to fly on your new pole.

In these circumstances we recommend reinforcing your Flag Pole using this simple solution:

1. You will need to go to your local home improvement store and purchase a apx 6-7' steel fence post. Depending on your pole you will need one measuring 1 1/2" -2 1/2 in diameter. This can be purchase for a minimal cost.

6' Steel Fence Post

2. Remove your flag pole and slide the new fence post into the pole. Then replace your flag pole including the fence post into the ground sleeve.

3. This simple reinforcement will add tremendous strength to your pole.
