

Wall Mount Flagpole Solar Light

Inner pages

Instructions:

1. Remove the solar power light from the box and remove all packaging material. Batteries are pre-installed and will have some charge.
2. Turn the light to the ON position.

3. With the light in the ON position take the light into a dark room, the light should turn on automatically. (The solar light has a photocell that allows the light to turn on when it is dark)
4. Remember the light is designed to work in the dark. If there is ambient light, the LEDs may appear dim or not turn on at all.
5. Install the light on top of your Wall Mounted Flag Pole by using the finial to secure the light to the pole. The light will require a full day of sun before the batteries are fully charged. Once fully charged the light will have a run time of 10-16 hours.

About your Service First Solar Light

Your Service First Light has been designed and built to the highest standards. This light uses Li-ion power and will illuminate your flag properly allowing you to fly your flag proudly 24 hours a day.

Service First is owned and operated by Parker McCumber, an OEF Veteran who served with the 2nd Cavalry Regiment and 1st Cavalry Division as a Forward Observer and Fire Support Section Chief. Parker has also served several years in the Utah National Guard. We know the sacrifice service members make and recognize their contribution to our great nation as we pay respect to our flag and all it represents.

"I believe every American should be able to fly our nation's flag proudly, and the mission of WeAreServiceFirst.com is to make it easy and affordable for everyone to have a beautiful flagpole in their yard and at their home"

- Parker McCumber
