Record, produce, compose, mix, master, and perform all from one intuitive application. Designed with ease of use in mind, Studio One® 5 is your creative partner from the studio to the stage. The home page provides everything you need to get started with your creative process, including a dashboard with all of your songs, projects, and shows, as well as a custom user profile that lets you add your own metadata to all of your creations.

Open the song page and you will find everything you need to record, compose, edit, create and mix with a full suite of virtual instruments, effects, innovative arranging tools, and a new improved score view based on the award-winning PreSonus Concept app. Integrate your external instruments with the ease of a virtual instrument by dragging and dropping. Then collect and create a masterpiece on the project page. Projects and songs are related, so you know that the mix you master is always up to date.

PreSonus Studio One 5 Professional Overview

And when you're ready to take the stage, Studio One will be by your side. New in version 5, the program page allows you to add backing tracks, virtual instruments, and add-on effects to your live instruments with an easy-to-use song list, allowing you to sculpt your performance and change your program every night. , or quickly edit on the fly when inspiration strikes. The standard for continuous production, only Studio One 5 moves smoothly with you from initial inspiration to full production, from final mix to mastered album, from digital release to onstage production, and lets you create really without limits.

Original drag and drop interface

Studio One pioneered a drag-and-drop workflow that remains the guiding principle of our design philosophy. Sound loops, virtual instruments, plug-in effects, and even presets can be dragged into a session from the innovative Studio One browser. Copy effect chains from one channel to another simply by dragging and dropping them. Convert MIDI to Audio or Audio to MIDI with just drag and drop. New Clip Gain Envelopes let you polish your performance or eliminate glitches by adding a plugin to your effects chain. Ease of use is the essence of Studio One, so you'll get to work faster than ever.

The composition is done correctly.

Modern composers need tools that allow them to combine electronic elements with the traditional soundscape. The new Score view in Studio One brings together the best features of PreSonus' award-winning music notation software, Notion, in Studio One 5. You can view multiple score staves at the same time, or just one track at a time. Use the score symbols palette to change dynamics, add trills, tremolo, and more during playback. And you can choose a music editor view for each track so that you can switch between score view, drum view, and normal keyboard view according to your needs for each track, or see the same note data in different views at the same time, providing rare flexibility. It is not often found in the world of digital audio.

Produce without limits

Forget time-consuming moving, cutting, pasting, and repositioning when organizing. With Scratch Pads for testing arrangements, an arrangement track that makes the moving parts of a song as easy as the moving parts, and innovative harmonic editing, the most flexible implementation, no other software comes close to organizing and composition offered by Studio One. 5. Inspirational virtual instruments and unique multi-instruments that allow you to create your own sound. Your studio sound is larger than life—now your stage persona can be, too.

Master Mastering

Studio One Professional is the only DAW that links songs and links them to finished and mastered projects. Transfer your mixes or mixed basics to the mastering project page, but if you hear something that needs to be changed, just go back to composing and make your changes; The updated version is a one-click update, so you can continue to master without losing your old work. Use Studio One Native Effects and your favorite third-party plug-ins to provide the ultimate EQ, dynamics, and picture control you need to create professional sound.

You'll also find analysis tools such as spectrum analysis, M / S processing, K-System, and EBU loudness measurements, a phase meter, an expandable level meter, and an oscilloscope to visually confirm what you're hearing and help align with the existing transmission standards. and duplication. Apply processing to individual tracks or the entire collection to take your teachers to the next level. And when your masterpiece is ready, you'll find options for DDP Export, CD Burning, and Direct Upload to Soundcloud and PreSonus Sphere to share your recorded masters with your clients and collaborators or release your albums to the world.

Key Features of Studio One 5 Professional Crack:

- Automatic delay compensation with an advanced automation
- Compatible with any audio interface (ASIO, Windows Audio, etc.)
- Complete effects suite and virtual instruments collection
- Easy to use sidechain routing and user-friendly sampler
- Extremely easy to use with powerful drag 'n' drop functionality
- Integrated mastering with automatic mix updating, effects, editing, etc.
- Intuitive real-time audio time-stretching and resampling
- Unlimited audio tracks, MIDI, instruments.

What's New in PreSonus Studio One Professional 5.0

The Show Page

Studio One 5 introduces a powerful, fully-integrated, live performance environment capable of running complete shows from a single computer. The Show Page combines playback of backing tracks with patch management for virtual and real instrument players inside a single window

Composition Tools

Composers and arrangers will appreciate Studio One 5's new dedicated Score View for the Note Editor. Based on PreSonus' Notion® music composition and notation software, the new Score View is available on its own or as a companion side-by-side view with the Piano and Drum views, allowing users to enter, view, and edit notes in standard music notation.
