

Verratek Lumavision Mini Projector

FAQ's

Display resolution

Q: What is the display resolution

A: Native 720P, with 1080p Support.

Casting / Airplay / Miracast

Q: I can't seem to cast streaming services.

A: Due to copyright issues, most streaming services do not allow for casting, the best solution is to use your projector in HDMI Mode, or use a TV Stick.

Q: The Casting feature is laggy

A: Ensure your Network and device capabilities allow for optimal casting. For better predictable performance use HDMI

Projector size

Q: What biggest screen size

A: The biggest screen size is 140" within the focus limit.

Distance needed

Q: How much room do I need?

A: The LumaVision needs approx. 1m - 4m projector throw distance

Lumens

Q: How many lumens is the LumaVision

A: LumaVision has 5000Lumens.

Audio / bluetooth

Q: Does it support bluetooth audio

A: No, to use a different audio output, use the available output phono jack.

Mounting:

Q: Can this be mounted on a standard projector mount

A: Yes there are mounting points on the bottom of the projector that support standard mount threadings.
