

FACE

CARBON / HOLLYWOOD FACIAL

60 min / \$249

The Carbon Facial, also known as the 'China Doll Facial' or 'Hollywood Facial', is an advanced skin rejuvenation treatment that was first made popular in Asia to achieve a flawless complexion. It is now in demand globally.

What's involved?

Carbon Facial treatment combines IPL technology with a special carbon cream applied to the face. The IPL and carbon cream work in synergy to **reduce skin imperfections** such as **enlarged pores, hyperpigmentation, acne and expression lines**, while also **purifying and toning skin** for an instantly radiant complexion.

This is a non-invasive treatment and there's no post-treatment downtime – so you can get back to your usual daily activities following your session. Some redness may occur, which will usually subside within a few hours and may be covered up with light mineral makeup.

Glowing results after your first treatment!

As Carbon Facial treatments sheds off the outer layer of dead skin cells over the following days / weeks, your skin is instantly exfoliated and deeply cleaned, resulting in a noticeably more radiant complexion after just one session. Therefore, Carbon Facials are a popular choice for celebrities and public personalities, as they can achieve an instant luminous glow before a big event when their skin has to look and feel its best.
