

human ACE2 protein, human Fc tag

Catalog Number : RPC-006

Protein Construction :

A DNA sequence encoding the human ACE2 (Gln18-Ser740) protein was expressed with the Fc region of human IgG1 at the C-terminus.

Target Name :

ACE2
Angiotensin-converting enzyme 2

Source : Human

Accession # : Q9BYF1

Expressed Host : CHO cells

Tags : human Fc Tag C-Terminus

Molecule Mass :

The recombinant human ACE2 protein, human Fc tag consists of 967 amino acids and predicts a molecular mass of 110.9 kDa.

Predicted N Terminal : Gln18

A.A. Sequence :

Conc. : 1 mg/mL

Vol. : 0.1 mL

Purity : >90%

Structure :

human ACE2 (18-740)

human Fc Tag

SDS-PAGE :

Formulation : liquid

Buffer : PBS(pH7.4)

Storage : -20°C to -80°C

Notes : Avoid repeated freeze-thaw cycles.
