# About Us

Mara daoibh a bheachairí! This year marks the 10th anniversary of Donegal Bees!

Donegal Bees was founded in 2013 by Thomas Ellis. Based in Glencolmcille, on the west coast of Donegal, Thomas started out by handcrafting CDB hives in a small shed for some neighbours and friends, and over time realized that it was quite expensive for the average beekeeper to purchase quality beehives and beekeeping equipment in Ireland. It was then that the idea of Donegal Bees was born. Áine Curran joined the company in 2015 with extensive experience in customer service, accounting, office management/systems, and a keen interest in bees! Fast forward a few years and Donegal Bees is now co-owned and directed by Thomas and Áine.

Our goal is to make beekeeping more affordable and accessible for beekeepers, both experienced or new, in order to sustain beekeeping culture in Ireland. We strongly believe in beekeeping being not only a rewarding pastime but also vitally important for our environment. We are also passionate about protecting our bees, particularly the conservation of our endangered native Irish Black Bee.

2023 is an exciting year for Donegal Bees, this year we are celebrating being 10 years in business! We would like to take this opportunity to thank our team here at Donegal Bees and also to you the customer for your support in the last 10 years.

As well as celebrating 10 years in business, we are excited to announce we have 2 major projects in progress. Coming this May 2023 we aim to start hosting educational courses and tours to the general public. Stay tuned for more details to follow soon!

Furthermore we have exciting development plans in progress, we have purchased land in the local area and plan to expand our apiary and also an information center for visitors and the local community to further educate the importance of biodiversity.

At present, our Wax Foundation Machine allows us to supply our customers with Irish-made foundation sheets, and our excellent Wax Exchange service gives customers the opportunity to exchange their raw beeswax for foundation sheets, both wired and unwired. See Pages 18 & 19 for more information.

This year we are continuing to provide you with our full range of high-

quality beehives and equipment, and have added a number of new products to our catalogue. Last year we launched our own Irish Wildflower Beeswax Candles range and introduced Bee Meadow Seed Mixes. Check out Page 59 to see what we have coming in stock later this year. If there's a certain product you need that we don't stock, if possible we can source it for you.

Looking after our customers' needs is of the highest priority to us, and we encourage you to give us a call if you have any questions. We do our utmost best to provide excellent customer service and have extensive knowledge in beekeeping, but if there is something we aren't sure of we will make sure to follow up with any queries you may have.

Áine and Thomas

The Donegal Bees Team

We hope you have a successful beekeeping year in 2023! Beachaireacht shona!

### **Donegal Enterprise Green Award 2022**

Donegal Bees are delighted to have won the Donegal Enterprise Green Award 2022.

The Green Award is in recognition of sustainability intelligence, leadership and innovation in best green practice in Donegal, awarded by Local Enterprise Office.

Donegal Town has been chosen as one of six towns nationwide to take part in a Green Hub initiative, in partnership with Donegal County Council and My Waste. As part of this initiative, the Donegal ETB is facilitating a new course – Environmental Sustainability in the Workplace, and Donegal Bees are delighted to be completing this course in order to improve our general knowledge and understanding of environmental sustainability in the workplace.

Donegal Bees are always working hard to ensure we're doing the best we can in terms of sustainability and being eco-friendly; by completing this course we hope to introduce further additional sustainable practices within Donegal Bees, by promoting biodiversity, reducing our carbon footprint, recycling, advanced waste segregation, and reducing our energy consumption as a business.

#### Gradaim Award Gnó na hÉireann

We won a Gradaim from Glór na nGael. It is a recognition scheme for businesses and companies that are promoting the Irish language through their work and service to the public, through marketing, branding and signage.

We are based in Glencolumcille, in the heart of the Gaeltacht, and as such we like to help promote the Irish language. If you'd like to speak cúpla focal ar an fon one of our friendly staff will be happy to assist!

### **OPENING HOURS**

Monday - Friday: 9am - 5pm Saturday: Hours vary, please phone in advance Sunday: Closed

Closed for Christmas 2023 from 22nd Dec to 4th Jan

If you are planning a visit to our premises please phone us in advance to make arrangements!

Ring us on **074 97 10140** or **087 205 9296** (R.O.I) or **020 3582 3502** (UK) to discuss your beekeeping requirements or to order over the phone. You can also order on our website **donegalbees.ie**

# DUE TO CURRENT ECONOMIC CLIMATE, PRICES MAY VARY DURING THE YEAR.

Donegal Bees are delighted to announce a price reduction in our machinery range. See pages 40-43 & 48 for more details.

### **GIFT VOUCHERS**

Our gift vouchers are the perfect present for any beekeeper in your life.
Vouchers are available to buy on our website, and can be redeemed online, in person, or over the phone!

We post a monthly blog with beekeeping tips and advice on our website, which you can find at **donegalbees.ie/blogs/news**. Below is a snippet from each month, courtesy of the Haynes Bee Manual (See Pg 50)

#### **JANUARY**

- Visit your apiary occasionally to check that all is well, that no hives have been turned over and no mouse-guards have become detached.
- Bees should be flying on a sunny day when it's warm enough.
- If you're likely to have snow in your area, shade the entrance to discourage the bees from flying.

#### **FEBRUARY**

- Increasing day length means that the queen is starting to lay.
- Greater activity means that bees will start making inroads into their winter stores.
- Heft the hive to check that the colony has sufficient food.
- Make sure that the water source near the apiary is in a sunny spot.

#### MARCH

- On a warm day use a little smoke and lift the inner cover.
- Remove the props under the inner cover and close the feed hole.
- Heft the hive and, if necessary, feed dilute syrup in a contact feeder over the winter cluster.
- Don't look at the brood nest too early or the bees may kill the queen.
- Wait for a warm day and you should be able to inspect your bees safely.

#### **APRIL**

- In mid-April, start regular brood nest inspections of larger colonies.
- Keep records of what you see.
- Look out for signs of swarming.
- Add a queen excluder and super when the brood box is full of bees.

#### MAY

- Continue adding supers as each new box on the hive fills with bees.
- Continue regular brood nest inspections, keep an eye out for swarm cells.
- Remove supers or frames full of honey that are ready for extraction.

#### **JUNE**

- Continue as in May.
- If you have a 'June gap' in your area, make sure that your bees have sufficient food reserves to keep them going.

#### **JULY**

- July is still the main honey month for most beekeepers.
- When the bees seem to have stopped storing honey freely in the supers, remove most of your honey crop when the cells are sealed.
- Don't add more supers unless you know that your bees need them.

#### **AUGUST**

- Remove the supers and extract them.
- Feed your colonies if they have no food reserves in the brood box.
- Make hives bee-tight and reduce entrances to prevent robbing.
- Start appropriate varroa treatment.

#### **SEPTEMBER**

- Assess the amount of honey in the brood nest.
- Feed the bulk of the winter stores required.
- · Heft the hives to check their weight.
- Keep a watch for wasps around the hives.

#### **OCTOBER**

- Make sure all hives are bee-tight and wasp-tight.
- Remove the entrance block and fit a mouse guard to deep entrances.
- · Remove varroa treatments.

### **NOVEMBER**

- In windy locations, place a weight on the roof to prevent it blowing away.
- Leave your bees alone. You must not disturb the winter cluster.

### **DECEMBER**

- Check on your bees every couple of weeks to make sure all is well.
- Use your records to review the past year.
- Make or buy any additional equipment you'll need.

### **Congested District Board Hive**

### **CDB HIVE**

Tá traidisiúin fada beachaireachta ar siúl I nGleann Cholm Cille, Co. Dhún na nGall le breis is 100 bliain. Tá baint mhór ag Coirceog Bhord na gCeantar Cúng (BnaCC) leis an traidisiún sin. Tá an choirceog an-fhóirsteanach d'aeráid fhliuch ghaothach an cheantair agus tá an choirceog athdheartha seo déanta speisialta leis an toradh meala is fear a fháil.

Beekeeping has been a tradition in the remote area of Glencolmcille, Co. Donegal for over 100 years. The Congested District Board hive (CDB Hive) has been a big part of this. This hive is well suited to our wet and windy climate and our redesigned CDB allows for the production of both run and section honey.

Timber used: White/Red Deal This hive is compatible with National Hoffman Frames Comes with either a solid or mesh floor

### **CDB** Hive

Product Code HI01002

Tháinig an chéad Choirceog Warré (nó coirceog na ndaoine) as an Fhrainc sa naoú haois déag mar dhaigh níos simplí agus níos saoire le beachóga a choinneáil. Tá an choirceog seo an-fhóirsteanach do na beachóga. Is coirceog nuálaíoch í a bhfuil rogha ann le painéal gloine a chur isteach inti sa dóigh gur féidir na beachóga a fheiceáil istigh inti.

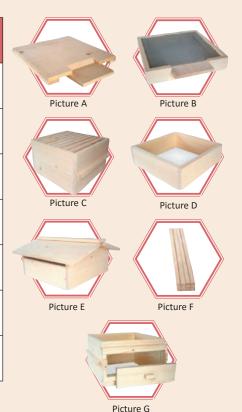

The Warre Hive (The People's Hive) originated in France in the 19th century as a simpler and more economical way to keep bees. It is a bee friendly hive that allows the bees to build downwards which promotes a healthier hive. It is attractive hive with the option of a glass panel to observe your bees at work.

# \* Foundation Machine \* \* \*

In 2021 Donegal Bees purchased a brand-new German manufactured wax band machine and foundation embossing machine. The wax band machine allows us to produce endless rolls of flat beeswax sheets and the foundation embossing machine embosses and cuts the sheets to any size. We now produce foundation at our

premises in Donegal and our customers are able to buy Irish produced foundations sheets.

We will be using a combination of Irish and European premium beeswax to produce high quality foundation sheets for our customers. We can arrange to collect your beeswax or can pick it up at any of the shows and events we attend throughout the year. See our wax exchange tables and our straight purchase rates below.

Wax Exchange up to 50lbs

Easy Swap - foundation for beeswax

See below how many sheets of foundation per lb of beeswax you receive. No cash involved. You decide the size of foundation you require. Converter 1kg=2.2lbs

Wax Exchange up to 50lbs	Wired Sheets per lb	Unwired Sheets per lb
National B.S. Deep	4	5
National B.S. Shallow	6 ½	8 ½

#### Spur Embedder

Spur Embedder is used for wiring foundation. The device is designed to embed wire into the foundation by rolling the tool over the wire pushing it into the wax foundation.

Product Code	Туре	Price	Picture
FF03001	Spur Embedder (Wooden Handle)	€7.50	F
FF03005	Spur Embedder (Plastic Handle)	€7.50	G
FF03002	Electric Spur Embedder	€13.50	Н

### **Frame Prod**

Product Code FF03006

This is a very useful tool for cleaning eyelets. Over time the eyelets become blocked by wax, honey etc, this tool enables you to clean the eyelets very efficiently.

Price €5.00

### Wire Crimper

Product Code **FF03003** 

This tool is used to aid in the process of wiring foundation. The device crimp and tighten your frame wire prior to embedding. This avoids straining of the wire or sore hands.

Price €10.00

### Frame **Eyelets**

Product Code FF03004

The advantage to having eyelets on the side bar of a frame is that it prevents the wire from damaging or scratching the frames. The Eyelets are punched into the side bar of a frame by a eyelet punch.

Per 500 Pack	€10.50
Per 1000 Pack	€20.00

### **Transformer for Wiring Wax Foundation**

Product Code FF03007

This device can be used for both running you own wiring board and for embedding wax into pre-wired frames.

€55.00 **Price** 

### **Sections & Frame Accessories**

### Frame & Foundation Wire

(1kg Spool)

Product Code FF03008

Our 1kg spool of high-quality, galvanised Frame Wire can be heated and melted into sheets of beeswax foundation or cut and mounted inside your frames. **SPOOL DIMENSIONS:** 

– Width: 9cm – Diameter: 10cm

**Price** 

€10.50

### **Frame Wire Dispenser**

<b>Product Code</b>	Product	Price

# Trust HiveAlive to Protect & Maximise colonies

- Stronger, more productive colonie
- Outstanding yields
- Promotes intestinal well-being
- Proven long-term protection
- Quickest and easiest to use
   Prevents syrup from fermenti

### **Hive Alive**

Hive alive is a complementary feed for bees to maintain honey bee colony strength. As a guide, 100ml of HiveAlive will treat up to 10 hives

<b>Product Code</b>	Quantity	Price
FH01006	100ml	€18.00
FH01017	500ml	€72.00
FH01018	21	€175.00

### **Mineral Bee**

Minerals and Trace Elements FOR BEES is 100% natural minerals, trace elements, amino acids and fatty acids for honeybees. Bees actively try to source minerals and trace elements however due to environmental stresses they are often unable to find them. Sugar syrup has very little nutritional value apart from carbohydrates, however it is necessary for the feeding of bees when there are insufficient stores of honey available. Bees need minerals and trace elements for a healthy life. Minerals and Trace Elements For Bees provides these essential minerals and trace elements... and more.

Product Code	Quantity	Price
FH01021	250ml Bottle	€23.00
FH01022	1 Litre Bottle	€37.50

### **Bulk Discount Available-Contact Office For Further Details**

Product Code	Quantity	Price
FH01014	14kg Drum	€26.00

### **Apimix**

Apimix is a liquid syrup with high fructose content, one of the most valued sugars by bees. Apimix prevents crystallidesation ensuring the colony can consume the feed even at very low temperatures.

It contains high levels of vitamins, protein and essential amino acids, which are necessary to stimulate the beehive brood. Increase in Productivity in the beehive.

#### **Especially Recommended for:**

- Spring stimulation
- Creation of new colonies
- Ideal feed for when the Honey Crop has been removed

#### Frame Feeders

Frame feeders are manufactured from birch plywood and red deal. They are fully sealed to contain liquid feed. Each feeder comes with an internal float

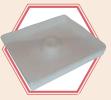

Product Code	Product	Price
FH04001	14X12 Frame Feeder	€11.50
FH04002	Langstroth Frame Feeder	€11.00
FH04003	Rose Frame Feeder	€8.00
FH04004	Commercial Frame Feeder	€11.00
FH04005	National Frame Feeder	€8.50

#### Large Plastic Feeder

Large Feeder with one centre hole with fits national, commercial and CDB Hives.

Product Code	Quantity	Price
FH03010	Single	€16.00
FH03015	10 Pack	€155.00

#### 4 Pint Rapid Feeder

This feeder is made from a durable, food-grade plastic. It has capacity for approximately 4 pints (1.89L) of feeding syrup.

Product Code	Quantity	Price
FH03014	Single	€6.30
FH03007	10 Pack	€60.00

#### **Contact Feeder**

This 5 litre feeder is designed to hold liquid feed. Simply place the liquid feed into the container and make sure that the lid is pressed on correctly. Turn the container upside down to airlock the mesh.

Simply place over feeding hole on the crown board. These contact feeder are designed to fit inside a super.

Dimensions: Height 190mm, Diameter 235mm

Product Code	Quantity	Price
FH03009	Single	€7.50
FH03001	5 Pack	€36.50

#### **Entrance Water Feeder**

This Entrance Feeder has a screw cap tread that works with plastic bottle. Place the Entrance Feeder through the entrance of the hive and and hold in place with a elastic band and 2 drawing pins.

Product Code	Quantity	Price
FH03011	Single	€2.50
FH03002	5 Pack	€10.00

#### **Entrance Feeder**

This Feeder can be placed at the hive opening and is suitable for liquid Feed. The Feeder needs to be level to avoid spillage.

Price

€3.50

### Langstroth Polystyrene Feeder

Ashforth style feeder suitable for langstroth poly hives. Holds up to 10 litres.

Price

€53.00

### **Nuc Feeder**

Langstroth Poly Nuc **Product Codes** 

Commercial Poly Nuc: FH03004 Langstroth Poly Nuc: FH03005

Price

€17.00

### **Polystyrene Nuc** Feeder Type 1

Compatible with type 1 Polystyrene nucleus only.

Price

€33.50

### Polystyrene Hive

National Poly Feeder designed to work with the National Poly Hive for maximum feeding capacity. Includes clear cover screen.

**Price** 

€32.00

### **National Feeder** 10 Litre

Holds up to 10 litres. Compatible with all national and commercial wooden hives and our Type 3 Polystrene Hive

Price €49.00

### **Box Feeder 1 Litre**

Price €5.00

### Circular

Compatible with all poly Crown boards

Circular shallow feeder suitable for Poly Nuc Type 1. Diameter 250mm

Price

€5.00

### **Ekes, Hive Cleaning**

### **Ekes**

Our Ekes allow a cavity to be created under the roof of the hive/nuc for feed and treatment of bees

# Propolis Cleaner 500ml

Product Code FH05002

Removes propolis from unwanted areas. Can be used on a range of materials including stainless steel, plastic and rubber. Antibacterial and economic product. 500ml bottle

€15.80 Price

### Soda Crystals 1kg

Product Code FH05001

Ideal for removing propolis and wax from hive tools, smokers, poly hives and frames

Price €2.50

### Oxalic Acid Strips, pack of 20

Strips are impregnated with 33% oxalic acid and 67% Vegetable glycerine. The pack contains 20 strips and the active ingredient is traditionally used in beekeeping for sterilising and improving the condition of the hive

Price

€11.00

# **Copper Slug Repellent**

Product Code HP03001

Copper tape roll 4m long x 3cm wide A reliable product for repelling slugs from your hives

Price

€5.00

### **Treatments & Microscopes**

### Treatments

### **Vapouriser**

An oxalic vapouriser offers excellent, clean method for controlling varroa mites during the Winter months.

FH06005 €15.00

Price

€140.00

### Syringe 60ml

A food grade syringe for the clean, hassle free application of treatments to your hives

Price

€1.80

### VarroMed

Treatment against varroa, suitable for use during autumn, winter and spring.

Price

€40.00

### **Apiguard**

Thymol based treatment for varroa, box of 10 trays suitable for treatment of 5 hives.

Price

€33.00

### **Apivar 500mg Strips**

10 strips per pack 40cm x 210cm long strips. Fits neatly between frames. No need to cut or bend strips. 99% efficacy against varroa FH06012 mites.

Price

### Varroa Shaker

Proven method of testing for Varroa in your hives. Recommended by the Native Irish Honey Bee Society (N.I.H.B.S.). See link on our website for full instructions for use.

Price

€5.00

### **Apibioxal**

Oxalic Acid based varroa treatment. Apibioxal can be used, by trickling between the frames or in a vaporiser a 35g treats up to 10 hives. Full instructions included in pack.

Price

**ApiBioxal** FH06010

€15.75

#### **Formic Pro**

Formic Pro is an allnatural product that targets varroa mites where they reproduce, under the brood cap. Manufactured in readyto-use strips, it features an extended shelf-life of 24 months and no storage limitations.

### **Microscopes**

### **SP27 LED Microscope**

This is an extremely versatile instrument with excellent LED illumination

allows it be to used away from an electricity supply. It includes a rotating monocular head with a x10 widefield eyepiece and four position turret with x4, x10, x40 and x100.

Price

€275.00

### **BM1 Long Arm** Stereomicroscope

This long arm stereomicroscope is supported at the end of an extended horizontal arm which can be clamped to allow viewing at any convenient angle.

€36.00

Price

€305.00

### **DM2 Stereomicroscope**

An excellent introduction to genuine stereomicroscopy at an affordable price. The unit has upright eyetubes with x10 widefield eyepieces and a pair of x2 objectives. Focus is by pillar adjustment for coarse movement with a rack and pinion fine focus system.

Price

€110.00

### SP22 Microscope

The monocular head on this microscope rotates through 360o and has a wide field x10 good quality eyepiece. The slide platform is a full mechanical stage with drop down coaxial controls that make fine movement in the required direction very easy

Price

€165.00

### MX4 x10 & x30

### **LED Microscope**

This turret mounted twin objective Microscope allows a choice x10 and x30 magnification. The LED gives a much brighter light and this microscope is ideal for Bee dissecting.

Price

€220.00

### **Aluminium Case for**

### Queen Breeding

#### **Butler Cage**

The original queen introduction cage. Place queen in cage and wrap open end with paper holding in place with an elastic band. For best results place cage with paper end down between 2 frames.

Product Code	Quantity	Price
AC04016	Single	€2.50
AC04001	5 Pack	€11.00

#### Puzzle Cage

The puzzle cage can be used to send a queen by post or for introducing a queen into a hive.

Product Code	Quantity	Price
AC04027	Single	€0.80
AC04003	5 Pack	€3.50

#### Oueen Cage

This queen cage can be used as an introduction cage. Fondant is placed in one side of the cage and the queen in the other. As the worker bees eat through the fondant they become familiar with the pheromone released by the new queen. One side allows for this close contact and the other for releasing the queen.

Product Code	Quantity	Price
AC04008	Single	€0.65
AC04002	5 Pack	€3.00

# **Oueen Rearing**

**Frames** 

Queen breeding pack not included

Product Code	Description	Price
AC04030	National Queen Rearing Frames	€8.00
AC04031	Commercial Queen Rearing Frames	€8.00

#### One Handed Queen Catcher The catcher is comprised of a

flexible sliding shutter which controls entry to the chamber and a sliding plunger which is used to push the queen up to the marking mesh. These are enclosed in a clear, durable plastic casing. The open queen catcher can be placed over the queen and the sliding shutter closed with one hand.

**Price** 

€10.00

### **Plastic Queen Catcher Pipe**

A great way to examine your queen. Remove foam and place plastic catcher over the queen. Hold upright and she will walk up the plastic. Remove rubber bung for transferring gueen into butlers cage/puzzle cage for posting. Replace foam and blow gently through it. The queen should move swiftly into your cage. Easy way to examine queen without touching her.

Price

€6.00

### Clip Catcher

AC04011

An easy to use device for catching your queen. Worker bees can escape, if also picked up, through the slots.

Price €5.00

### **Turn and Mark Tube**

Designed for clipping and marking queen. Queen is gently pushed up the tube and the bottom tube can then be rotated to position the queen correctly for clipping and marking.

Price

€6.00

### **Queen Marking Ring**

A handy plastic cage for observing and marking the queen on the comb.

Price

€1.00

### **Press in Cage**

A handy plastic cage for clipping and marking the queen on the comb. It also allows the worker bee to pass through it.

**Price** 

€4.00

### Var Control Cage

This cage confines the queen bee but still allows worker bees access. During the period of confinement the queen bee stops laying. For caging we recommend the Queen Collector.

€7.00 **Price** 

### Queen Collector Kit

For fast and secure marking and to confine the queen bee for use with Var Control Cage

**Price** 

€25.00

### Fresnel Magnifying Lens

This business card size plastic magnifier is an excellent tool in the apiary. It can be used as an aid to monitor varroa levels in colonies and to view eggs and young larvae.

Price

€2.00

### **Queen Breeding**

### **Crown of Thorns**

Used to observe and mark the queen whilst on the frame. Metal pins with trellis top.

Price

€9.00

#### Plunge Marking Cage

A gentle way to hold and mark your gueen. Foam covered plunger gently pushes queen up the tube up to the mesh for marking.

<b>Product Code</b>	Туре	Price
AC04012	With Cloth Mesh	€8.00
AC04026	With Plastic Mesh	€7.00

### **Traps, Buckets & Tanks**

### Wasp/Hornet Trap

Wasp invasion is a very a common problem for beekeepers and when this happens you may lose you hive of bees and your honey. A sugary solution is placed in the bottom of the container and helps lure the wasps. The entrance of the trap is a cone design which allows the wasp to enter the container but not exit. The entrance is also designed so that a honey bee may enter and exit the trap and therefore they do not get trapped inside. Also available for hornets.

### Honey Creamer & Liquefier

This machine has 2 functions:

- 1) to carry out the process of creaming honey
- 2) to heat and Melt crystallized Honey

The heating tank of these machines have heating cables placed around the drum which allow for a uniform and consistent heating. This device also has a temperature controller which prevents the honey from overheating. It is made of stainless steel which is designed to create precise creamed honey using temperatures of up to 40o. This process changes the honey from crystallized to liquid. When the process is complete the honey reaches a consistency similar to butter.

All machines are 240V power with temperature control 30°C - 70°C

### Candle Moulds & Wicks

Per 10 Metre: €3.00 Per 50 Metre: €11.50

### Round Candle Wick

Choosing the correct wick size depends on the size of the diameter of the resulting candle. With cast or drawn candles the wick thickness and diameter of the candle are equal. Example: for a candle of diameter 1cm, the wick thickness is no. 1. If the diameter of the candle is halfway between 2 wick thicknesses always choose the wider wick. This ensures the candle stays burning when lit. (Example: for candle of diameter 0.5cm, the wick

When rolling candles from beeswax sheets double the diameter of the candle to determine the wick size required. The wick must also be dipped.

### Irish Wildflower Beeswax Candles-

From the seed to the flower to the bee to the hive; our candles are made from the highest quality Irish beeswax and carefully hand-crafted here in Co. Donegal. As the only producers of Irish beeswax foundation, we take pride in saying our candles are truly Irish.

The bees work hard to source nectar from our beautiful flora and fauna from around the countryside, which they use to create their wax. When you light one of Irish Wildflower's candles and smell the natural scent of pure beeswax, take a moment to reflect on the hard work that went into the creation of your new beeswax candle.

The Irish Wildflower beeswax candle range includes 7 candle sizes, hand-rolled using our 100% natural beeswax foundation sheets, with each named after a native Irish wildflower. Beeswax candles are known to purify the air when lit, aiding in stress relief and eliminating odours with its natural honey-like scent. They also burn longer, brighter and cleaner than regular candles, and are naturally biodegradable.

Every Irish Wildflower candle order comes carefully packaged in a gift box. Gift wrapping and gift notes available, leave us a message when checking out!
